Environmentally Critical Areas Update Process

WE WANT TO HEAR FROM YOU!

Was the January 21 Code and Policy Update Workshop informative? ☒ Yes ☐ No

Did you feel that your concerns were heard and/or recorded? ☒ Yes ☐ No

However, there were some geotech person monopolizing the "don't" workshop. Need more control next time

If you have additional comments about the four main questions, please let us know:

1. What is currently working well with the ECA regulations? What is not working as well?

   What is not working is that the code was written in a very confusing way. Try to make clear what are the ECA exemptions & procedures.

2. What has been your experience with the ECA regulations (e.g., participated in the permit process, observed problems, etc.)? How have you been personally affected by the ECA regulations?

   Participated in 2 permit review processes.

3. How can we improve protection of critical area functions and values while allowing reasonable development opportunities?

   Goal should be to aim for a balance

4. How can incentives for property owners enhance protection of environmentally critical areas? What incentives should be available for ECA protection?

   Don't Know.
   Good luck.
