Upgrading the underground electrical system in a section of West Seattle

NOTIFICATION: WORK IN YOUR NEIGHBORHOOD

OVERVIEW:
City Light will be upgrading the aging electrical cable in a section of West Seattle and will be working with a company called UtilX during construction. UtilX will test and where possible, inject underground cables with silicon to fill cracks in the cable insulation. The work will extend the life of the cable and improve electrical reliability. We have successfully used this lower-impact, cost-effective method of cable rejuvenation on 34 previous projects. If cables are not suited for injection, they will be replaced at a later time.

A project map showing the work zone is on the back side.

TIMING AND COORDINATION:

- **Project Start:** Second week of October
- **Duration:** The entire project is expected to last approximately seven to eight weeks
- **Schedule:** Mon-Fri from 8:30 a.m. to 4:30 p.m.
- **Holidays:** Work will not occur during holidays on Nov. 11, Nov. 27 and Nov. 28.

IMPACTS:

- Up to three power outages lasting about 8 hours are necessary to do the work safely. Outages will not occur on consecutive days. All affected customers will be notified the Thursday before the next week's outage. The outage dates and times will be specified on the notification.
- Work will be postponed in the case of unseasonable cold weather.
- Some traffic and parking impacts are expected in the immediate work area.
- Flaggers will be used where needed on residential streets.
- Crews will be careful to try and maintain access to driveways.
