FACT SHEET

NE 95TH ST SIDEWALK PROJECT

August 2016

PROJECT DESCRIPTION

New sidewalk is coming to northeast Seattle! This project includes:

- 1 block of new sidewalk on the south side of NE 95th St, between NE 32nd and NE 35th streets
- new corners and curb ramps at the intersection of NE 95th St and 32nd Ave NE
- drainage improvements on the south side of NE 95th St, between NE 32nd and NE 35th streets
- trees between the new sidewalk and curb
- preserved on-street parking on the south side of NE 95th St

NE 95th St connects Lake City Way to Sand Point Way and to businesses and transit routes on NE 35th St. This sidewalk will connect NE 95th St to the sidewalk at the southwest corner of NE 95th St and 35th Ave NE and sidewalks on 35th Ave NE.

BENEFITS

Sidewalks are the building blocks of our pedestrian network and we're adding to this network, one block at a time. They create a safer, more accessible, and more comfortable environment for people walking. Sidewalks create a designated walking space and help improve safety and predictability for all travelers.

SCHEDULE

Community members initiated the need for new sidewalk on NE 95th St in 2011 and we began design for the project in the summer of 2014. We finalized design in the summer of 2016 and construction will begin in late 2016 or early 2017. We expect the project to be complete in spring 2017.

FUNDING

This project is funded through SDOT's Sidewalk Development Program, with funds from the 9-year Levy to Move Seattle, approved by voters in 2015. Learn more about the levy at www.seattle.gov/LevytoMoveSeattle.

OUTREACH

We've worked closely with the people who live alongside the new sidewalk during design. As we approach construction, we'll raise awareness in the neighborhood and notify community groups of this new sidewalk, construction schedule, and impacts.

Email is the best way to stay up to date on project progress. Visit the project webpage at the URL below to sign up for email updates.
