DESIGN STANDARDS FOR: BENCHES

1. BENCH STYLE SELECTION:

   A. The selection of the appropriate bench (from the approved list) shall be done as part of the design and design review process. In most cases, the SPR Standard Generic Pipe Frame bench shall be used. Exceptions, as approved through the design review process, shall be made from the approved list and shall be made according to the appropriateness for its use in the particular Park setting. Matching the style of other existing benches located in the Park shall be the most important criteria. If the Park is new and there are no furnishings to match, then benches shall be chosen form the approved list and they shall match other furnishings being used in the park. For Olmsted Parks or other historic sites, furnishings shall be made from the approved list

   B. Generally, either Galvanized Steel shall be used unless colored furnishings are desired, then either Black or Dark Green shall be used. Powder coated painted finishes are required for all colored furnishings.

2. INSTALLATION:

   A. All benches from the list below shall be installed with paved slab/mow strips included as shown on SPR' Standard Details and Images and per manufacturer's recommendations.

   B. Generally, 4" cast in place concrete slabs shall be installed except where asphalt, crushed rock or other paving method is approved through the design review process. The paving shall extend at least 1' beyond the outside edges of the bench on all sides.

   C. Brass plaques may be included in the paving if the bench is installed as part of the Parks site furnishings donation program. Plaques shall be installed flush with the paving surface and shall be directly in front of the bench, centered, and oriented so that the plaque shall be read which sitting on the bench.
