

Input Needed!

CARKEEK PARK

PLAY AREA RENOVATION

Seattle Parks and Recreation invites the community to meet the design team and review the preferred schematic design for the future Carkeek Park Play Area. SPR is excited to present the design that is based on input received from the community during the outreach process. This project will replace the existing play area and make accessibility improvements to the pathway from the parking lot to the play area and restroom. This project will use synthetic safety surfacing in the play area. This project's scope expanded to include an internal renovation of the restroom building to meet all current accessibility requirements.

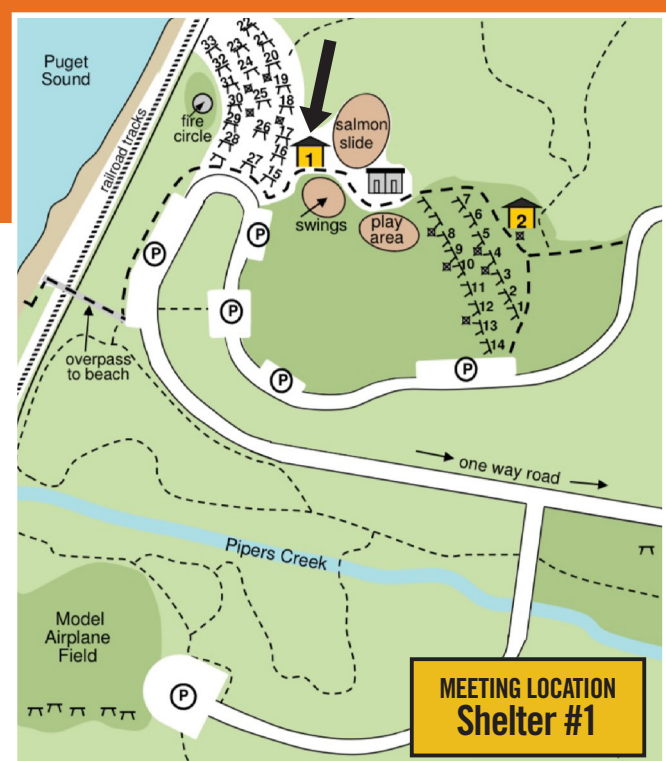

SPR is enthusiastic to share the preferred schematic design and s'more making treats!
