

Organizations per Neighborhood

Square Feet per Neighborhood

Which neighborhoods are the cultural neighborhoods?

The view on the right shows that cultural space, counted foot-by-foot, is highly concentrated in the Downtown Core and at Seattle Center, with tiny slivers representing some of the less central neighborhoods. When counted organization-by-organization, however, as seen above on the left, the picture emerges of a far more democratically spread presence of arts and culture. Which neighborhoods are cultural neighborhoods? Apparently *all* of our neighborhoods are cultural neighborhoods.
