Dear Neighbors;

We will be starting on a renovation project at Fire Station 25 in May. The project is funded by the 2003 Fire Levy and will improve the building's function and seismic strength. While most of the work will take place inside the building, you will see some outside work being done as well. The exterior work will involve some drilling and inserting of piles next to the tall training tower on the north side; **No pile driving hammering will occur.** We will also fill in some concrete openings in several locations, and you can expect to hear roto hammers for several days as we perform concrete work.

The Fire Department will continue to operate out of the facility, which is being remodeled in several phases.

Work will take place between the hours of 7 a.m. and 6 p.m., Monday through Friday, with the possibility of some work outside that time for special circumstances. If you have any questions or concerns, please feel free to call me at the number below.

Sincerely
