Seattle School District Number 1 History, General Historical and Building Context¹

Early Development of Seattle Area Schools

The first school in Seattle was established in 1854 in Bachelor’s Hall, a boarding house for single men located near the present-day First Avenue and Cherry Street. The sole teacher was Catharine P. Blaine, who arrived in Seattle in 1853 with her Episcopalian minister husband. An initial three-person school board was created around 1861, and in 1862, the first public funds were used to pay a teacher a salary for the twenty-three children attending school then held in the new Territorial University Building on Denny’s Knoll, located at University Street and Fourth Avenue. Until 1866, when tuition-free classes were established, public funds were exclusively earmarked for teacher salaries. In 1869, Seattle received a city charter from the territorial legislature, and residents approved a funding levy to build the city’s first free public school building, Central School, near Third Avenue and Marion Street. The school opened in 1870 with 120 students and the city’s first public school teacher, Lizzie Ordway. Other tax levies were later approved to construct a few smaller schoolhouses of one or two rooms scattered throughout the town.²

In 1877, the legislature established the Territorial Board of Education, and by 1881, it had granted appointments of school superintendents in incorporated cities. Subsequently, Edward Ingraham was named the first superintendent of the Seattle School District in 1882.³

In 1883, a new twelve-room Central School (1883, Isaac A. Palmer, a.k.a. the Sixth Street School, demolished) located at Sixth Avenue and Marion Street opened, offering Seattle’s first high school classes. The following year, the twelve-room Denny School (1884, Stephen J. Meany, demolished) at Fifth Avenue and Battery Street opened for elementary students. The district’s first high school commencement was held in 1886, for twelve graduates.⁴ **See figures 1-2.**

Student enrollment in the district expanded more than fourfold from 1,500 students in 1885, to nearly 6,650 in 1893, with many students attending classes held in rented rooms. Acute overcrowding, exacerbated by the loss of Central School to a fire in 1888, resulted in a major school construction program. Eight school buildings were built between 1889 and 1890. The city’s third Central School (1889, demolished 1953), replaced its destroyed predecessor, and the South School (1889, demolished 1909), located at Twelfth Avenue S and S Weller Street, were Seattle’s first brick masonry schools, both designed by the architectural firm of Boone & Meeker.⁵

The district’s third superintendent, Frank J. Barnard, was hired in 1890, replacing Julia Kennedy, who had replaced Ingraham in 1888. Barnard oversaw the construction of fifteen schools the district completed between 1891 and 1900. Three were wood-frame school buildings with identical plans designed by the architectural firm of Saunders & Houghton, as well as four schools designed by John Parkinson based on programs developed by Barnard.⁶ **See figure 3.**

District schools completed between 1890 and 1899 included:

The financial panic of 1893 slowed the development of new schools, but Seattle prospered during the Klondike Gold Rush of 1897.⁷ In the aftermath of the Great Seattle Fire of 1889, local designers and builders focused on fireproof masonry as a primary building material, looking to post-fire Chicago and its brick masonry buildings for inspiration.⁸

Early 20th Century Seattle Schools and James Stephen

Frank B. Cooper was hired as superintendent in 1901. During his twenty-one-year tenure, he led the Seattle School District's transformation into a major urban school system. Cooper encouraged this development by establishing many specialized programs, including kindergartens, parental schools, and classes for adults in evening schools, as well as those for special-needs students. Cooper and the school board planned for smaller neighborhood elementary schools and comprehensive high schools.⁹

James Stephen became the school architect and director of construction in 1901, developing a "model school plan" for standard wood-frame elementary schools. This plan was used as a basis for several elementary schools designed for the district, partially offsetting a short-term financial shortfall. These schools provided a flexible and economical approach to school construction. The standard floor plan facilitated a phased construction process in which an eight-, twelve-, or twenty-room school could be constructed and later expanded. While standard floor plans and interior finish

materials were used, the exterior elevations and details of these schools varied greatly.¹⁰ *See figure 4.*

In 1902, the district constructed seven new large wood-frame schools, all based on Stephen's plan, as well as a new large brick masonry high school. They included:¹¹

Between 1907 and 1908, the district began reconsidering wood-framed school buildings, with the board authorizing the construction of three brick masonry “fireproof” buildings using the model plan developed for the wood-frame schools. These include:¹³

Fairview School	1908	844 NE 78 th St.	James Stephen	Now Fairview Church
Whitworth School	1908	5215 46 th Ave. S	James Stephen	Demolished 1987

These James Stephen-designed buildings were nearly identical, incorporating Tudor-style details executed in terra cotta, flat roofs, and projecting entries.

In 1908, school architect Stephen prepared a report on modern school design, construction, and equipment. This report directly led to the creation and adoption of the second “model school plan” that incorporated fireproof materials including concrete, masonry, and terra cotta. These “new” school plans also incorporated modern lavatory equipment. These later schools were often executed in late Gothic or Jacobean style, then popular, and were also designed to be expandable as necessary. Schools that followed the “new” model are:¹⁴ *See figure 7.*

By 1910, enrollment was at 24,758 students and more elementary school buildings were needed. Annexations of suburban areas between 1905 and 1910 brought nearly two dozen additional schools into the district service area, many of which needed replacement.¹⁶

Early 20th Century Seattle Schools and Edgar Blair

Edgar Blair, who had worked with Stephens since 1906, became the district's architect in 1909 after Stephen resigned. Blair, a graduate of Columbia University who had previously worked at the New York architectural firm of McKim, Mead & White, originally retained Stephen's model plan, but eventually shifted away from Stephen's preferred Jacobean style to more Classical- and Renaissance-based schemes.¹⁷

Between 1910 and 1913, eight nine-room reinforced concrete school buildings with brick veneers were constructed from Blair's designs, including the following:¹⁸ **See figure 9.**

Besides these larger nine-room school buildings, Blair was responsible for smaller, four- to six-classroom “intermediate grade of school buildings” designed for less populated neighborhood locations. These include:²⁰ *See figure 10.*

In 1919, four “Liberty Buildings,” wood-framed temporary annexes built cheaply to conserve materials during World War I, were built adjacent to Jefferson, Bagley, Bryant, and Fulton schools.²³

Blair resigned as school architect in March of 1918, due to differences with the fiscally conservative Nathan Eckstein, who was then serving as the chair of the district’s building committee.²⁴

1920s and 1930s Seattle Schools and Floyd A. Naramore

After World War I, and as Seattle entered the 1920s, the increased costs of providing educational programs to a growing population strained the school district. Public school enrollment grew from 51,381 in 1920, to slightly over 66,000 ten years later, requiring new construction in newly developed areas like Montlake and Laurelhurst, additions to older schools, and construction of intermediate schools and high schools. Despite a post-war recession in the early 1920s, the district entered into a phase of a well-funded building program due to school construction bond issues passed in 1919, 1923, 1925, and 1927.²⁵

Floyd A. Naramore replaced Blair as school architect in 1919, overseeing the completion of several projects already underway. An M.I.T. graduate who had already designed several schools in Portland, Oregon, Naramore would significantly influence the district’s school design until his departure for private practice in 1932. Most of Naramore’s schools were designed in a twentieth century version of the Georgian style.²⁶

With Cooper still serving as superintendent, the district continued its vocational and technical programs, building a large reinforced concrete annex (1921, Floyd A. Naramore, altered, later Edison Technical School, now part of Seattle Community College’s Central Campus) across the street to the north from Broadway High School in 1921. The same year, the district also completed a new administration and facilities building (1921, Floyd A. Naramore, demolished).²⁷

Cooper left the district in 1922, replaced by Thomas Cole, a former principal of Broadway High School. Cole served until 1931, and was succeeded by Worth McClure.²⁸

The district completed thirteen new elementary school buildings during this period, and altered several others with additions. By 1935, all elementary schools also included kindergarten, and lunchroom service was being added to all schools.²⁹

New elementary schools completed during this period included: *See figure 13.*

In the early 1920s, the district considered building intermediate or “junior high school” buildings serving students in grades seven through nine, to put itself in line with national educational philosophy and relieve pressure on existing elementary and high schools. The school board officially adopted the term “junior high school” in 1932. Naramore designed four intermediate or junior high schools for the district, including:³⁰ *See figure 14.*

The Great Depression of the 1930s was a time of rising unemployment with general school enrollment declining to 57,551 in 1933. Enrollment in adult education classes dramatically increased, however. The Seattle Schools faced declining revenues, excess personnel and older urban facilities. Sixteen schools were closed, and their students redistributed to nearby buildings. By the end of the 1930s, there were concerns about the lack of maintenance and the conditions of older schools, prompting the district to request a tax levy for another new building program.³³

World War II Period

During World War II, Seattle became a center of aircraft and shipbuilding for the war effort and experienced a massive influx of defense workers and their families. School enrollment once again grew, especially in areas where there were no current school facilities. Existing school facilities were expanded for the children of these workers, especially in federally funded housing project areas.³⁴

At the same time, the internment of 1,456 Japanese-American families meant that the district lost a large number of students.³⁵

The district also sought to increase efficiency at this time by changing its method for designing new buildings, choosing to hire private architectural firms rather than employing a school district architect for new building programs. Once again, all buildings constructed after 1941 were considered temporary structures to conserve building materials for the war effort.³⁶

New schools completed during World II included: *See figure 16.*

Additions and improvements to more than ten other schools were also undertaken as part of a program that demolished and replaced the city's oldest wood-frame school buildings.

Post-World War II Seattle Schools, 1946 to 1965

After World War II, enrollment swelled to a peak of approximately 100,000 students in the early 1960s. Between 1946 and 1958, six separate bond issues were approved for new school construction. Samuel Fleming, employed by the district since 1908, succeeded Worth McClure as superintendent in 1945. After Fleming retired in 1956, Ernest Campbell became superintendent.³⁷

In 1945, the Seattle School District Board commissioned a study of population trends and future building needs. One proposal called for the modernization of all existing schools and the addition of classrooms, along with multi-use rooms for lunch and assembly purposes, covered and hard-surfaced play areas and play-courts, and expanded gymnasiums. Improvements in lighting, heating, plumbing systems, and acoustical treatments were sought as well. This survey occurred at a time when student enrollment in Seattle was stable, at around 50,000. By this time the school district was overseen by a five-member board of directors, and employed approximately 2,500 certified teachers, with an

average annual salary of about \$2,880.³⁸

The district completed a large stadium with reinforced concrete stands (1947, George W. Stoddard) in 1947, adjacent to the National Guard Armory at Harrison Street and Fourth Avenue N, at the former Civic Field. In 1951, a war memorial shrine bearing the names of 762 Seattle schools graduates killed in World War II was dedicated at Memorial Stadium.

In 1949, a 6.8 Richter-scale earthquake damaged several elementary schools, resulting in their subsequent replacement by temporary portables. As enrollment continued to swell throughout the 1950s, these temporary structures served as a quick, flexible response to overcrowding. In 1958 an estimated twenty percent of the total Seattle student body was taught in portable classrooms. Despite their popularity, however, the occupants of the portables suffered from inadequate heating, lack of plumbing, and distance from other school facilities.³⁹

Elementary schools included separate gymnasiums and auditorium-lunchrooms. Older high schools gained additions of gymnasiums and specialized classroom space. Despite all the construction, there were still extensive needs for portable classrooms to accommodate excess enrollment.⁴⁰

During this period the quality of construction gradually improved. The earliest school buildings, put up as rapidly as possible, included the three schools constructed in 1949. Designs prepared by George W. Stoddard for these schools were essentially linked portables with a fixed administrative wing. Each of the district's thirty-five new school buildings was individually designed in the Modern style, with nearly all of the elementary schools constructed as one-story, or on sloping sites. To conform to change in building code, each classroom had direct access to grade.

The twenty-two new elementary schools built by the district between 1948 and 1965 include: *See figures 17 & 18.*

One of the first priorities during this period was the building of new junior high schools. Between 1950 and 1959, ten new junior high schools were completed: *See figure 19.*

During this period the district also constructed three new high schools, including:

Between 1943 and 1954, voters in the rapidly growing unincorporated areas north of Seattle, feeling the burden of new special school levies, and believing that there were advantages to Seattle transportation services and police and fire protection, approved at least twelve annexations to the city of Seattle. This pushed the city limits northward from a line near N 85th street, to a uniform north border at N 145th Street. These annexations brought an additional ten schools into the district from the struggling Shoreline School District.⁴¹

Mid-1960s and 1970s Seattle Schools

After the mid-1960s and throughout the 1970s, the district suffered from declining enrollment and revenue. Repeated leadership changes in the district resulted from the short tenures of three superintendents between 1965 and 1981. Forbes Bottomly was appointed district superintendent in 1965, after Frank Campbell retired. Bottomly resigned in 1973, and was replaced by J. Loren Troxel, who had previously served as assistant superintendent. In 1976 he was replaced by David Moberly, formerly a school superintendent from Evanston, Illinois. Donald Steel, who had previously served as superintendent in Toledo, Ohio, succeeded Moberly in 1981. During this period overall enrollment in the district also declined, from over 93,000 in 1965 to approximately 43,500 in 1984.⁴²

The district attempted to address racial desegregation in 1963 with a volunteer transfer program, and multiracial readers that were tried on an experimental basis in 1965.⁴³

In 1966, a new type of school was designed based on pedagogical theories of team teaching, open space and synergy. Seven new elementary schools and one middle school were designed and built with an “open concept,” and other schools were remodeled with the removal of walls and the addition of learning resource centers. New programs for Head Start, Title 1 remedial, Special Education and Transitional Bilingual were added.

“Open Concept” schools built by the district include: *See figure 20.*

By 1977, the Seattle School Board instigated a sweeping desegregation plan that included bussing approximately 12,000 students, with over half of Seattle's schools involved. As a result, public school enrollment dropped by half from the 1960s, and private school enrollment throughout the city grew. The school board was forced to enact a school closure plan. By 1984, the district had closed two high schools, seven junior high schools and twenty elementary schools were closed. Mandatory busing eased in the late 1980s, in response to litigation by community groups in north end neighborhoods and court rulings.⁴⁴

1980s to Present Day Seattle Schools

Deputy district superintendent Robert L. Nelson was appointed superintendent in 1984 to serve a two-year term after Steele resigned. William M. Kendrick was appointed superintendent in 1986, after a national search. Kendrick served nine years and was succeeded by retired army general John Stanford. Stanford proved to be a capable and dynamic leader, but a terminal illness led to his replacement in 1998 by the district's chief operations manager, Joseph Olchefske.⁴⁵

In 1984, many schools needed upgrading or replacement, and a bond issue passed for thirteen new Elementary Schools, upgrading Ballard High and a new facility for Franklin High. Community debates about preservation followed this bond issue. The School Board also decided that excess properties were an asset to the Seattle School District and therefore should not be sold, but rather leased to community groups. Only three of the decommissioned schools were demolished so that the underlying property could be leased, and the rest of the buildings either sit empty or are being revamped for other purposes by long-term leaseholders.⁴⁶

In the 1990s, the school district's major capital construction program continued with passage of three Building Excellence Levies (BEX) approved by voters in 1995, 2004, and 2007, which called for new construction, renovations, additions, and infrastructure and technology improvements. Seattle Public Schools is currently initiating the BEX IV program, which is funded by the capital levy approved by voters in February 2013.

For the 2011-2012 school year, there were over 47,000 enrolled students. Although this is less than half the number of fifty years ago, the number of students is gradually increasing. The district presently operates ninety-one schools, of which fifty-four are elementary schools, twelve are high schools, ten are K-8 schools, nine are middle schools, and six are alternative schools. The district has more than 8,000 staff including 3,100 teachers, 835 paraprofessional, 660 certified instructional staff, and 150 principals. Seattle Public Schools had a general fund budget of 558.3 million dollars in the 2009-10 operational year.⁴⁷
