|--------------|--|---|---|--|---|----------------|-------|----------------|-------------------------------|--------------------------------|
| | Crossing | There is a stop light at Roxbury/Olson and 4th Ave SW that allows you only to get halfway across Roxbury. The light allows pedestrians to only get to an island in the middle of the street. Pedestrians are then required to doget prafic to cross the north side of Roxbury because there no light or flashing beacon. This would place a flashing beacon to allowing pedestrains to more safely cross this busy arterial. This project is needed because Roxbury/Olsen is a very busy arterial with cars going in occess of 40 MPH. The next closes intersections. Olsen/Myers Way and Bth Roxbury are both one mile from this intersection. Therefore, these interactions are to dar away to be an | | Flishing Beacon on Roxbury/Olson and 4th Ave SW. The south east side of the Deridge district is underfunded when it comes to street and infrastructure. These is currently a project that addresses | The South Defridge/Highland Park Neighborhood would benefit from this project. According to 2010 consus data, about hal of the population in this consus tract (113) is minority: the metain income was two-chirds of | | | | | |
| 7-007 | at Olson Pl & 4th Ave SW | alternative. Roxbury is a transit corridor, has numerous apartment buildings and has a senior apartment building in the area. | Roxbury/Olson Place and 4th Ave SW | Roxbury but it does not go east of 8th Ave SW. | the Seattle; and 25% of the population speaks a language other than English at home. | Highland Park | SDOT | | | |
| 7-031 | Crossing Improvement along SW Henderson St | A clearly marked cross walk and parking restrictions near the curb would be a start to helping to increase visibility for cars as well as pedestrians. Extending the curbs, however, would make a huge difference. This would allow cars on Henderson to far more easily see pedestrians who are trying to cross on their way to and from school. | Henderson & 13th Ave SW 98106 | Improve crossings along SW Henderson St at 12th, 13th, or 17th Ave SW | Pedestrians and drivers alike. The neighborhood benefits by an increase in safety and walkability. | Highland Park | SDOT | | | |
| 7-032 | Traffic-calming on 15th Ave SW between Trenton & Henderson | | 15th ave sw. Between Henderson and Trenton | Speeding cars on 15th ave sw, from Henderson to Trenton. Actually, it is from Roxbury to Trenton, but I can only really speak for my street. | Everyone who lives on or around 15th ave sw. And everyone who has had their side mirrors ingpled off by specific gars. And any child who wants to cross the street, or pet, or anyone who doesn't what to live in favor of being harmed or hurt by reckless, speeding drivers. | Highland Park | SDOT | | | |
| 7-033 | Traffic-calming on 15th Ave SW between Roxbury & Barton | Speed bumps would help a lot. | 15th Ave SW between Roxbury and Barton | Cars speeding down road, sometimes racing side by side. | All neighbors along both sides of the street, people attempting to turn onto the street, pedestrians walking through the neighborhood. | Highland Park | SDOT | | | |
| .7-034 | Improve crossing @ 17th Ave SW and SW Henderson | Installation of user activated rapid flashing beacons at the North and South side of 17th Ave Sw and SW Henderson would help keep pedestrians safer. | The intersection is located at17th Ave SW and SW Henderson St. | The Highland Park Greenway crossing at 17th Ave SW and SW Henderson is dangerous. Cars are moving fast and need a better indicator that cyclists are crossing users, students of 3 area schools and South Deiridge residents need a safer crossing. | This crossing is part of a City Greenway used by cyclists connecting White Center with the West Seattle Bridge/ downtown Seattle. The intersection is centrally located with Students of various ages heading though to Highland Park Elementary, Denny Middle School, and Chief Sealth HS. The site is also locate with the Westwood Urban Village and will see much greater density in the near future. | South Delridge | SDOT | | | |
| 7-066 | Slowdown intersection of Holden & Highland Park Way | Our solution is traffic circle at 11th Ave SW and SW Kenyon, and speed humps on SW Portland Between 11th Ave SW and Highland Park Way. There is a need for a long term solution for traffic mitigation at SW Holden & Highland Park Way intersection, but until then, purting in traffic circle and speed humps in along these blocks will help increase safety by decreasing overall speed in the neighborhood and will hopefully at as a deterrent for these drivers. This is cost effective and time efficient solution with the resources available. | 11th Ave SW and SW Kenyon; SW Portland St Between 11th Ave SW and Highland Park Way | When SW Holden becomes backed up between 16th Ave SW and Highland Parkway, between 7am - 10am & between 4pm - 7pm, divers cut and speed through 11th Ave SW onto SW Portland St to bypass stop sign at SW Holden & Highland Parkway. Over the couple of years, neighbors have engeded SDOT about the intersection of Highland Parkway and SW Holden, posting "alow down" signs, and undernization at 16th Ave SW and SW Holden, posting "alow down" signs, and whare and the issue with various neighborhood department and SDOT staff. | Neighbors who live in the area, children who walk to Highland Park Elementary School, commuters that walk to the bus stops on 9th Ave SW or 16th Ave SW | Highland Park | SDOT | | | |
| 7-067 | Crossing Improvement at Holden & Highland Park Way | At minimum at least 1 Elashing Beacon crosswalk located on 9th Ave SW between SW Kenyon and SW Holden as the 2 bus stops near SW Holden and SW Kenyon appear to be the busiest. This will also help to slow down car traffic, which continues to be a significant issue in the area. | 9th Ave SW between the blocks of SW Holden St and SW Kenyon | There are no crosswalks on Highland Parkway/9th Ave SW between SW Holden and SW Cloverdal Street - A blocks in total - yet we have 3 bus stops on each side of the street between SW Holden and SW Thistel street and because 9th Ave SW is an atterial street and be actuated to the 131 bus route in 1 of 2 bus routes that serve Highland Park in addition to a number of apartment complexes in the area as well as 2000 residuents in Highland Park in therefore, transit riders, adults, seniors, & school and during high commute hours and in general the area is less walk-able to the few stores and amentics on 9th Ave SW. | 7000 residents in Highland Park especially transit riders, adults, seniors, & school age youth going to work, school, or shopping. | Highland Park | SDOT | | | |
| .7-070 | Traffic Calming at Holden & Highland Park Way | The Holden/Highland Park Way intersection needs some kind of traffic calming. A light, speed bumps, or a roundabout, anything to slow people down and make them more ware. | The intersection of Holden and Highland Park Way, at the top of the hill. 47*32'03.7"N+122*20'49.6" W | Highland Park Way is awful. First, people routinely speed at VERY high rates up the hill and through the neighborhood. Just last year someone was killed there. Second, people turning onto HP Way from Holden are in serious danger. There have been many accidents at that intersection! | All the people who live nearby, use that intersection to get to other parts of the city, people who walk near three (there are a couple of bus stops affected by the traffic in that area). | Highland Park | SDOT | | | |
| 7-071 | Flashing beacon, low cost curbing on Highland Park Way | Flashing beacon, low cost curbing on Highland Park Way I'd like to see some kind of walkway that connects the Webster St sidewalks to 1814 hor & SW and gives a way for pedestrians to navigate | Highland Park Way | many accidents happen on this road and having side walks would make is safer, the street Is dark. There's no walking path or speed bumps on 18th Ave SW between SW Myrtle St | drivers and resdients | Highland Park | SDOT | | | |
| | Add walkway | the street. Would also love to have speed bumps installed - we get a lot | 18th Ave SW between SW | and SW Webster St. There's also a blind | 1 | 1 | 1 | 1 | 1 | 1 |

| -698 | Traffic-calming and ADA improvements to SW Henderson & 12th Ave SW | Speed bumps, crosswalks, and wheelchair accessibility. | SW Henderson St and 12th Ave SW in Highland Park | I live at SW Henderson St and 12th Ave SW in Highland Park, and cars speed on Henderson. I would like to see speed bumps as well as wheelchair access on sidewalks, as I see people in motorized wheelchairs being forced to use the street in the fast paced traffic. | Everyone in the neighborhood- people driving would be able to see pedestrians, pedestrians would be able to cross the street safety, kids would be safer before and after school, and people with wheelchairs and walkers could utilize the sidewalks. | Highland Park | SDOT | | | |
| 8-114 | Improvements on 16th Ave SW near South Seattle College | Mark/paint curb to indicate no parking areas near stop signs and corners on 16th Ave SW at driveways in front of South Seattle College. Something is needed to keep vehicles away from the corners to provide unimpeded visibility for those leaving the college. | 16th Avenue SW & driveways to South Seattle College G00 16th Avenue SW | Increase safety for pedestrians, cyclists and motorists. Vehicles frequently park within 3 feet of the stop signs & block the view of oncoming traffic and pedestrians crossing. Many students make unprotected left turns out of the college so it is critical to able to see encoming traffic. This limited visibility makes it dangerous to exa ble to college or cross the street. If drivers have a visual "no parking" to such as a real painted curb, maybe that will encourage them to park further away. It's a constant problem here especially at the South driveway where there is a bus stop and many pedestrians. | Pedestrians, cyclists and motorists near the college. | Riverview | SDOT | OK, SDOT does not paint the curb next to driveways and no parking areas unless it's a "No Stops", "Loading", or bus zone. Property owner may paint their curb where it is not legal to parks "form a driveway. Existing "No Parking" signs can be reviewed and determine if revisions and/or additions are needed. | | |
| 130 | Pedestrian Lighting Improvements on Delridge Way SW & SW Myrtle St | Pedestrian lighting | 15th Ave SW & SW Roxbury St (Seattle side) | Better lighting near 128 bus top needed for safety | Immigrant and refugee seniors from SWYFS rely on this stop and do not feel safe waiting for the bus when it is dark outside. | Highland Park | SDOT | | | |
| 8-130 | Crossing Improvements at SW Barton St & 8th Ave SW | review of the state of the stat | 9000 8th Ave SW Seattle, WA 98106 | It is sairly Neighbors and children can't safely cross Barton St, which is the closest intersection to the main entrance of the park on 8th Ave. Instead, neighbors are forced to walk farther down to SW Henderson St in order to cross 8th where a stop sign exits. Cars drive too fast on 8th for pedestrians to safely ket across. | Anyone trying to access the main entrance to the park by foot or bike and need a safe way to cross 8th. | Highland Park | SDOT | | | |
| -141 | Traffic Calming and Crossing Improvements on SW Henderson Street between 16th Ave SW and 9th ave SW | Speed bumps and cross walk improvement | SW Henderson Street between 16th Ave SW and 9th ave SW | Multiple car accidents, close calls with pedestrians (and a lot of kids on the way to school), speeding cars and trucks | Pedestrians (a lot of kids walk to school and cross busy street), vehicles, bicyclists | Highland Park | SDOT | | | |
| -153 | Pedestrian Lighting Improvements on Delridge Way SW & SW Orchard St. | Pedestrian lighting at 128 Bus Stop | Delridge Way SW & SW Orchard St. | There is not adequate lighting at this bus stop. | Immigrant and refugee seniors from SWYFS rely on this stop and do not feel safe waiting for the bus when it is dark outside. | Delridge | SDOT | | | |
| -157 | Crossing Improvements on 16th and Myrtle | Cross Walk with Flashing Lights | 16th and Myrtle | It's impossible to cross the street. Also take out the speed bumps South and North of Myrtle. | School kids along with adults walking to the trails | Riverview | SDOT | | | |
| -161 | Pedestrian Lighting Improvements at South Seattle College bus stop | Pedestrian lighting at 125 Bus Stop | South Seattle College (At On- Campus 125 Stop) | There is not adequate lighting at this bus stop. A popular trail for hikers and walkers is virtually unusable during the rainy season | Immigrant and refugee seniors from SWYFS rely on this stop and do not feel safe waiting for the bus when it is dark outside. | Riverview | SDOT | | | |
| 7-077 | Riverview Park trail improvements Benches at | Improve this desire path/trail that runs along the eastern rim of the Riverview Playfield scocer and baseball fields into a trail making it accessible during more seasons and for runners walkers and hikers of all ages and ability levels. | Riverview Playfield | due to standing water and mud. This informal trail creates a popular loop in Highland Park, and provides access to Riverview Playfield amenities and the West Duwamish Greenbelt hiking trails. | Community members of all ages who like to walk or run along the trail. | Highland Park/Riverview | SPR | | | |
| -1007 | Riverview Playfield Traffic-calming @ 35th Ave SW & SW | More benches | Riverview playfield | no many places to sit Traffic moves very fast over the blind hill at 35th and Myrtle. Turning right or left is | Everyone | Riverview | SPR | | | |
| 7-080 | Myrtle St Sidewalk repair @ Morgan St, near 35th Ave SW | Traffic circle or 4 way stop or other means of slowing traffic. Repair sidewalk on N & S sides of Morgan St., between 34th & 35th Ave SW | 35th and Myrtle Morgan St., between 34th & 35th Ave SW | difficult. Morgan St, between 34th & 35th Ave SW | Benefits anyone, especially students, in the area. Food bank clients, library patrons, nearby residents | High Point High Point | SDOT SDOT | | | |

| | | | | | | | | | SCORE: Need at | SCORE: Community |
| Project # | Project Title | Project idea: | Location: | Need SW Brandon St. is the only direct route for pedestrians walking between High Point and Deiridge Way SW to connect to busses, homes, community centers, transit, schools, libraries, and shops. It is | Benefit | Neighborhood | Dep't | Dep't Comments | Location | Benefit |
| | Walkway Improvements on SW Brandon St. between 30th Ave SW and | Low Cost Sidewalk on SW Brandon St. between 30th Ave SW and 26th | SW Brandon St. between 30th Ave SW and 26th Ave | dangerous to walk on SW Brandon St. between 30th Ave SW and 26th Ave SW. Cars travel at high rate of speed and pedestrians have no choice but to walk on the road. There is no barrier or marking indicating where pedestrians should walk so car drivers can keep a safe distance | I propose a sidewalk constructed with lower- cost materials such as stamped and stained asphalt. Another option is a curb armp. This would significantly increase safety for | | | | | |
| 8-117 | 26th Ave SW | Ave SW. | sw | from vulnerable pedestrians. | pedestrians walking this route. | High Point | SDOT | | | |
| 18-155 | Walkway Improvements on the South side of Sylvan Way, between Holly St and Delridge. Pedestrian Lighting | Currently,the sidewalk stops abruptly in two places on the south side of Sylvan Way between Holly St and Deiridge. I propose continuing the small stretch of sidewalk that extends both ways from Sylvan Heights Dr so that the sidewalk is continuous, and there are no dead ends that cause pedestrians to cross at unsafe places. | South side of Sylvan Way, between Holly St and Delridge. | Currently the sidewalk is a dead end that encourages dangerous pedestrian behavior, especially in regards to the bus stop in the area. | All pedestrians in the area, especially those who live near the High Point and Sylvan Heights developments. | High Point | SDOT | OK, \$90k can only build a section of sidewalk | | |
| 18-158 | Improvements on Delridge Way SW & SW Myrtle St | Pedestrian lighting at 120 Bus Stop | Delridge Way SW & SW Myrtle St | Better lighting near 120 bus top needed for safety | Immigrant and refugee seniors from SWYFS rely on this stop and do not feel safe waiting for the bus when it is dark outside. | Delridge | SDOT | | | |
| 18-159 | Improvements on SW Morgan Street at 35th Ave SW | Add left-hand turn lanes on Morgan Street on 35th Ave SW. This would decrease wait time at that intersection, and therefore decrease cut- through traffic who are looking to avoid that intersection by using local | The intersection of SW Morgan Street at 35th Ave Wy, both eastbound and westbound. There's already room for two lanes in each direction at this intersection, so adding the dedicated turn law would just be a matter of restriping the lanes and diding new signafs. | The intersection of SW Morgan Street at 35th Ave SW backs up for blocks at rush- hour, usually due to cars waiting to make left-hand turns. This causes drivers of cars, trucks and buses to avoid the intersection by using our non-arterial streets like SW Holly Street to get from Derlidge up to 35th Ave SW. There is a nearby elementary school, two community centers and a prayer center that all create significant foot traffic, particularly children, on SW Holly Street to 31's especially dangerous to have so much extra traffic rushing by on this street. | The project benefits the safety of local schoolchildren, parents, pedestrians, worshipers at the prayer center and the neighborhood in general. It also benefits local car, truck and bus drivers who will have an easier time staying on the main arterial instead of cutting through. | High Point | SDOT | | | |
| 8-160 | Improvements on 21st Ave S and Croft Place | A vegetated swale or basin in a kind of bulb out that serves 3 purposes: 1) to get drain the giant puddle that exists from October to June, 2) slow speeding traffic on the greenway and at the tot to tentrance, and 3) provide much need green on a street with no sidewalks and too much impervious graved on the right-of-way. | Just north of the tot lot on 21st Ave 5 and Croft Place. You can't miss the giant puddle. | People have to walk in the middle of the road to avoid the giant puddle (about 5' across and a good 25' long, bigger if it is raining that is there most of the year. It is a nuisance and dangerous. Pluva, without any sidewalks, or street looks dumpy b/c the right of ways are taken over by impervious gravel. | The neighbors, kids, commuters, that walk and bike the street. Visitors to the park that cross the road, to slow traffic. | Puget Ridge | SDOT | | | |
| 18-163 | Crossing Improvements on 35th Ave SW | pedestrians crossing medians | on 35th ave west | people in west seattle need to cross to catch busses | people who live in Highpoint and west seattle | High Point | | OK, Vision Zero is installing a full signal at 35th Ave SW & SW Graham St in 2018. | | |
| 8-165 | Walkway Improvements on 32nd Ave SW | Sidewalks on 32nd Ave SW | 5637 32nd Ave SW | Many kids and the elderly who live on this street have no sidewalks and dangerously walk the streets to get home | Everyone on this block | High Point | SDOT | OK, \$90k can only build a section of sidewalk | | |
| 18-166 | Walkway Improvements on 34th Ave SW between Brandon St. | Sidewalk construction along 34th Ave SW between Brandon and Juneau. | 34th Ave SW between | The project is detected to improve pedestrian safety and connect neighborhoods along 34th Ave SW south of Juneau with Lamp Long's Southern entrance. It also provides an alternative walking option of High Point residents not wanting to walk along the busy vehicle arterial of 35th Ave SW. | | High Point | SDOT | OK, \$90k can only build a section of sidewalk | | |
| 18-168 | on Delridge Way SW between Brandon and Findlay | We would like to improve safety in crossing Defridgeb between Brandon and Findlay. A painted bulb has been added to the corner of Defridge and Findlay, but it is ont being highly utilized. A mid block crossing would be very helpful, or barring that, adding a physical curb bulb would help to increase visibility of padestriams. Reducing available parking around the intersection would also be helpful. | Deiridge Way SW between Brandon and Findlay | There is a Permanent Supportive Housing Project located on the East side of the street where many people live who have significant disabilities, including physical, developmental, and cognitive. Deridge is a busy street and one person, a tenant of that building, has already been killed by an oncoming car. Neighbors and passers - through frequently have to slow or stop due to people crossing midblock. People crossing are often intoxicated or otherwise impaired. | The project would benefit the whole neighborhood and those driving down Deiridge, but particularly those poople with significant disabilities who are living in the neighborhood. | Delridge | SDOT | | | |
| | Walkway Improvements on 26th SW & Brandon Ave | | | | | | | | | |
| 8-170 | SW Litter management @ Longfellow Creek | Build additional sidewalk | 26th SW & Brandon Ave SW | Too dirty & no sidewalk Longfellow Creek open space is full of trash | Elders & children | High Point | SDOT | | | |
| 17-069 | Openspace | "Installation of waste bins and signage" | Longfellow Creek Openspace | | park users, pedestrians, residents | Delridge | SPR | | | |
| 18-1051 | Longfellow Creek Trail Improvements | The trail is through beautiful woods, but it can get down -right nasty and moody after it rains. This the public is unable to access the trail until it is dry | Runs along Delridge way SW. Longfellow creek trail. | To keep the walking trails mud free for people and pets, esp.after it rains | The public, people who walk the trails | Delridge | SPR | | | |
