Date: _____

2/9/2012

Additional information is provided in Attachment 3.

Key People: The YMCA utilizes full and part time staff, as well as community partners to implement our school based programs. Each site is led by one or two full time Directors of Education and Leadership. Staff in these roles have experience in: school based programming and collaboration with school teams, youth development principles and practices, working with diverse populations with an understanding of the achievement gap, monitoring student assessments (MSP, MAP, grades, etc.), developing and implementing programs to meet needs of focus populations, coordinating family engagement activities, volunteer management and data collection. Lead staff have received training at their school sites through the YMCA and community organizations in: literacy and math improvement strategies, attendance improvement strategies, best practices in Out of School Time (OST) programming, program quality improvement practices and diversity, inclusion and equity.

To lead Expanded Learning Opportunities, the YMCA employs part time staff, recruits certificated teachers and partners with community based organizations. Staff and organizations are selected based on a proven track record with developing and implementing high quality, culturally relevant programs that are aligned with the academic and social/emotional goals for program's focus students.

Erica Mullen, Associate Executive Director, YMCA of Greater Seattle, is the YMCA's Lead staff for school based programming in the City of Seattle. Responsibilities include management for early learning, licensed school age care and Community Learning Center (CLC) Programs at 15 Seattle Schools. She has 18 years of experience in youth development, with 11 years managing school based programming in Seattle. For the past 6 years Erica has led a dynamic staff team implementing school based programs in partnership with Seattle Public Schools and the Families and Education Levy. Under her leadership the Y has embraced the use of academic outcomes and indicators to drive program improvement and has transformed its methodology in working with students and families to increase student academic success.

Previous Experience: At The YMCA's Community Learning Centers (CLCs) at Concord International and West Seattle Elementary Schools, students are identified to participate in CLC programs based on the following criteria: level 1 or 2 on MAP test, chronic absenteeism, home or familial issues, home language, and teachers' recommendations based on social, emotional or behavior issues and need for assistance with homework support.

At Madison, Washington, Hamilton, Aki Kurose Middle Schools and Madrona K-8, YMCA staff play an active role on Student Support, or Intervention Teams, along with administrative staff, school counselors and support staff. These teams identify focus students based on low MSP scores, attendance and behavior concerns. YMCA staff are a critical piece in the development of activities that move the needle on school wide issues as well as interventions for individual students.

At Chief Sealth International and West Seattle High School, focus 9th grade students are identified based on the district's risk report which assesses students' attendance, grades, suspensions, number of classes failed and standardized test scores. For

students with more than two risk factors, a member of the 9th grade support team (including Y staff) is assigned to provide individualized support and attention to these students with the goal of further connecting them to school, increasing attendance and providing additional resources.

The Extended Learning Opportunities provided by Y staff are most successful with students who are high Level 1 to low Level 3 on MSP, or have a moderate number of risk factors. Because of the intensity and duration of the Elementary School CLC, lower level 1 students are successfully served as well.

The YMCA has been a partner with Seattle Schools and the City of Seattle through the Families and Education Levy for the past 10 years. Through our CLC Model a YMCA Director of Education and Leadership is based in the school to provide educational and enrichment activities during and after the school day. The infusion of youth development activities, that align with academic coursework, increases students' connection to and level of engagement with school. Participation in high quality enrichment programs after school helps increase school day attendance and provides opportunities for extended learning and homework support.

In addition to providing extended learning opportunities, Y staff play a role on their school teams engaging students and developing and implementing attendance improvement plans for individual students and the school as a whole. Successful attendance strategies involve incentives and motivational activities, supporting students and families in removing barriers to getting to school on time and ready to learn and creating a school wide culture that encourages high expectations for student attendance. Y staff also build a culture of family engagement through the coordination and implementation of numerous family events at the schools. Staff also spend time with parents, teaching them how to understand test scores and support their students' academic needs at home. **Below are selected results of YMCA programs within the last two years:**

Middle School CLC Results

2009-2010	Target	Actual	2010-2011	Target	Actual
MSP	285	329	MSP	285	366
CLC Participation	260	411	CLC Participation	260	637

CLC Attendance Results

Elementary CLC program attendance – 65% of students participate 75% of days offered (5 days per week), for the 2009-2010 and 2010-2011 school years. The CLCs at both Concord International and West Seattle Elementary schools have met or exceeded this target each month.

Number of students with fewer than 5 absences per semester

2010-2011	Target	Actual
Concord International	N/A	63
West Seattle Elementary	N/A	45
Total	101	108

At Aki Kurose Y staff partner with Diplomas Now and school wide efforts that won the National Fall Attendance Challenge 2011 with a 3.7% increase in attendance.

Challenges & Barriers: To address challenges and barriers, Y staff work in collaboration with our schools to develop a clear strategy for engaging our focus students. Y staff bring a youth development perspective to the school's work which provides flexibility and the ability to adapt models and innovative strategies to drive academic success.

Challenges & Barriers for Students	YMCA Activities to Address Challenges
Students are not academically prepared for their grade level.	<ul style="list-style-type: none"> • Offer Out of School Time academic enrichment program to deepen students' connection to school and offer additional support and concentrated time for students to focus on academics. • Recruit and coordinate volunteers and tutors for one-on-one tutoring and classroom.
Students have trouble getting to school on time, or getting to school at all.	<ul style="list-style-type: none"> • Instill value of attending school on consistent basis with students and parents. Work with students, teachers and staff to build a culture of strong attendance within the school through focused activities and positive messaging.
Low Level of Student Engagement	<ul style="list-style-type: none"> • Provide high programs with engaging staff that help youth develop interests and hobbies. • Develop relationships with students so they know people care about them and want them to succeed. • Allow youth to provide leadership and play a role in

	selecting programs offered (youth choice).
Poverty / Hunger/Financial Barriers	<ul style="list-style-type: none"> • Provide healthy snacks to engage and energize students to concentrate on homework. • We are currently piloting a “4th meal” program at Concord offering students a more substantial snack during participation. We hope to expand this to our other programs in the future. • Break down financial barriers by making all CLC programs and supplies available at no cost to students.
Lack of Family Support & Engagement	<ul style="list-style-type: none"> • Hold family nights to build community among families and school staff and to disseminate information. • Engage families in culminating activities, such as project presentations and performances. • Serve as a liaison between parents/SPS staff/students.

Tracking to Success: YMCA staff utilize the following data to target students and identify their needs, assess program offerings, identify interventions, make necessary course corrections and collaborate with schools to meet outcomes and indicators.

Data/data source	Use by YMCA staff/teams
MSP scores	Target students for programs and services and get yearly assessment of student progress toward standard, identify areas of focus for academic support/intervention programs.
MAP scores	Target students for programs and services, assess areas of emphasis throughout the school year, assess summer learning programs by comparing Spring and Fall scores and identify concentrated strategies for academic support/intervention programs.
CLC Attendance	Assess attendance for focus students, increase the number of students attending programs “regularly” (Elementary school – 75% of days offered, Middle School – at least 36 days)
School Day Attendance	Target students with attendance concerns, monitor/support students who are beginning to have attendance issues, monitor short term and long term student and school level attendance goals
Youth Program Quality Assessment (YPQA)	Continuous Program Quality Improvement process. Assess point of service program quality, identify areas for improvement, implement changes and re-assess.
Youth Program Surveys – completed by family members for Elem. and by students for Middle and High School	Staff use information about student satisfaction, perceived impact and program climate to make program level decisions and adjustments. Used for aggregate information on student/program needs, successes and challenges.

Utilization of data is integral to our program planning and continuous improvement process. On the site level, Y staff work with school teams to identify focus students and appropriate interventions. Y and school staff meet regularly to assess student progress, using academic, attendance and other data available and make adjustments to their plans as appropriate. For example, at one school the academic interventionist and Y staff noticed high failure rates in Social Studies and Science classes. Upon further review they determined that one of the causes was poor writing skills. The Y staff worked with the team to develop an after school writing lab, recruited volunteers and tutors and launched the program, which provides one-on-one assistance. On an organizational level, we have embraced the use of data to steer our program delivery model and method. Based on concerns from staff at our sites about school day attendance issues, we launched a new emphasis on attendance for 2011-2012. YMCA and school staff participated in an attendance training session, created site level plans and are implementing new strategies, including the Mayor's city wide attendance campaign, to increase the number of students meeting the school district's attendance target. YMCA staff are working with school staff to monitor the impact of the strategies and will continue to make course corrections throughout the school year.

YMCA staff have utilized daily and weekly data in several areas. Y staff working in collaboration with schools have access to the Source, school teams and individual teachers to assess student progress and address areas of concern. Staff working with students on homework assistance or academic support programs utilize information on the Source to identify outstanding work, grades and test scores. Based on this information, individual plans are developed for each student on what they should be focused on during their Extended Learning Time. In programs such as WIN (Work In Now), students receive daily progress reports that assess the need to stay for the homework completion intervention. Staff have access to school day attendance and monitor focus students to utilize incentives and interventions as appropriate. Y staff monitor OST participation levels and work with students to remove any barriers keeping them from participating in programs.

Women and Minority Inclusion: The YMCA is an Equal Opportunity Employer committed to workplace diversity, which includes an emphasis on utilizing recruiting practices geared toward engaging individuals of all backgrounds, including women and minority staff, contractors and subcontractors to work in our programs. The YMCA of Greater Seattle has launched an Association-wide effort to increase the cultural competency of its staff, volunteers, and contractors. The successful implementation of this initiative is critical to the Association's long-term ability to fulfill its mission and meet its program goals.

YMCA Elementary, Middle and High School Sample Data Reports

CLC Data tracking form – Track participation data (demographics, program attendance) and student assessments (Homework completion, MAP, MSP)

MAP Students Detail – Track student MAP results with growth information

Monthly Stats Report – Track monthly activity including: participation, school day attendance strategies, Volunteer hours, family activities and community partners.

Youth Program Quality Assessment (YPQA) report – Program quality scores, compares scores from 2010 and 2011. Each site does a yearly YPQA assessment.

Program Improvement Plans – Used for site improvement planning. Utilizes YPQA data and Youth Program Surveys to identify 1-3 goals to improve overall program quality and effectiveness.

YMCA CLC
Monthly Stats
October 2011

Students

Number of students served Unduplicated: 234

Number of Levy Target students served: 43

Total duplicated Visits (from FEL report): 1794

This month, 3 times a week or more = 12 visits for the month. Number of students who participated at this dosage level: 56

Number of MSSP Target students who participated at dosage level: 14

Leadership Activities – number of new students in leadership programs this month _____

Did participation meet your goals for all students and for target students?

No, we did not for the first month of programming; we right now have about 43 of 75 students from our levy list in programs right now which is about 56%.

What course corrections do you need to make next month?

We as a support staff is now managing case loads for the remaining students to get them all plugged into after-school programs by years end. Also through this process we will be doing grade, attitude, check ins and also setting small milestones for their accomplishments. We as CLC have about 30 students on our caseload between me and Kristin.

Strategies to increase attendance –

Please list the strategies that you are currently using to increase student school day attendance.

We work in collaboration with Diplomas Now, City year on a school wide effort to increase school day attendance. We have incentive we do as a part of a regular 4-6 week reward system called Crane Cash, which is tied into the schools' Big 5. Students will be able to spend their crane cash at a store specifically for this currency. The Store is located in the Y room and open two days a week (Tuesdays and Thursdays). We also do give prizes out to the Homerooms with the top weekly attendance average for the week. We also are helping with the attendance room in the attendance office to make sure that when kids are late, we call home, asks the student to write a reflection and also we see how we can help aid the student to make sure they are not late. This process is still in motion and in September we have 97% attendance rate and in October it was about 96%. So we are doing better and keeping a steady average.

Volunteers

Number of Volunteers active this month: 12

Number of New Volunteers this month: 10

Total number of Volunteer hours this month: 65

Any new strategies for recruiting/retaining or recognizing volunteers:

Families:

Number of Family Events the CLC supported this month – families must be present to be counted here

Attendance at Family Events: _____Youth _____Adults

List Family Events for the month & category (academics for youth, social, cultural, adult ed.) please list dates:

October 20, 2011 Math Night: We were able to serve about 50 families, and also cover child care for youth ages 0-10 years old.

Community Partners:

Please list any new community partners during the school day and OST,

ArtsCorp

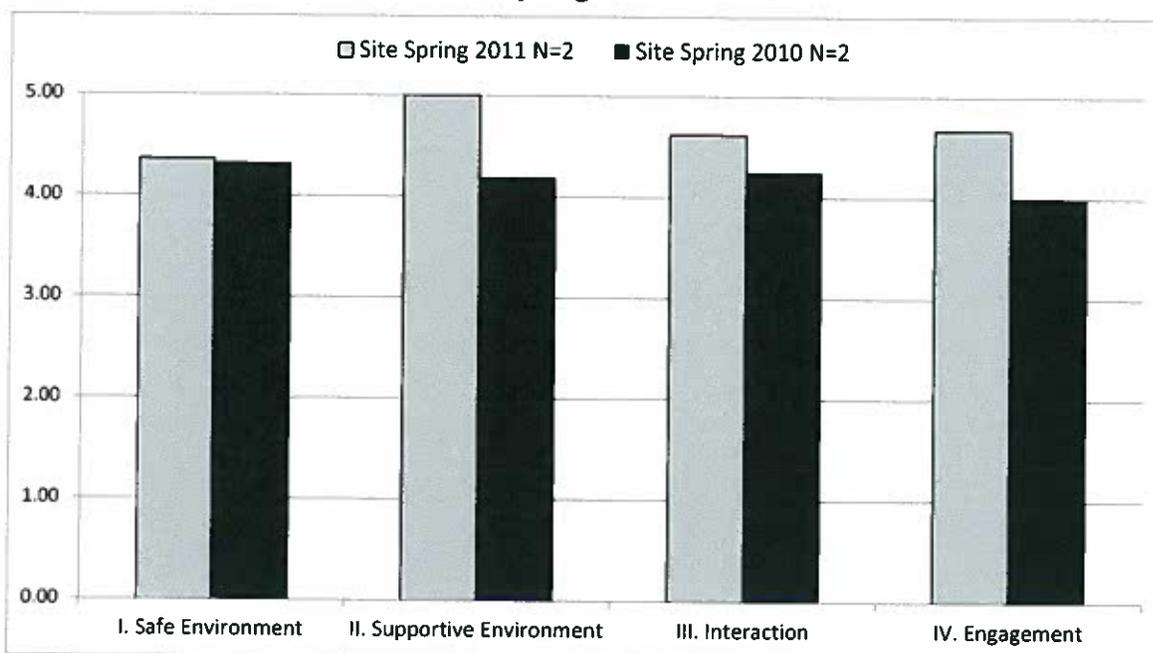

Union Gospel Mission Youth Reach Out Center

Rainier Valley Eats

Narratives – Kids, Families or Communities – Please share a story or two.

I am excited about the fact that we have individual students on our caseloads to check in with. One victory to me is a student who last year used to always be late and never get his grades together enough to pass his classes. This year has been complete change, with a collective check in effort from our support staff we were able to keep this young man on track and to curb his absences from school and when we pulled up his grades they read A, A, A, B, B, D!!! Wow!! So I came up with an incentive if he can get that D to B grade, I would buy him lunch. I say all this to be excited about the minor victory's in the grand scheme of collectively working with students to ensure success.

CLC Spring 2011 vs 2010

Item/Scale/Domain	Spring 2011 N=2	Spring 2010 N=35
I. Safe Environment	4.36	4.32
A. Psychological and emotional safety is promoted.	5.00	5.00
B. The physical environment is safe and free of health hazards	5.00	5.00
C. Appropriate emergency procedures and supplies are present	4.09	3.80
D. Program space and furniture accommodate the activities offered	3.40	5.00
E. Healthy food and drinks are provided.	4.33	4.67
II. Supportive Environment	5.00	4.19
F. Staff provide a welcoming atmosphere.	5.00	4.67
G. Session flow is planned, presented, and paced for youth	5.00	5.00
H. Activities support active engagement.	5.00	3.00
I. Staff support youth in building new skills.	5.00	3.50
J. Staff support youth with encouragement	5.00	4.00
K. Staff use youth-centered approaches to reframe conflict	5.00	5.00
III. Interaction	4.62	4.25
L. Youth have opportunities to develop a sense of belonging	4.50	4.00
M. Youth have opportunities to participate in small groups	4.33	3.67
N. Youth have opportunities to act as group facilitators and mentors	4.67	4.33
O. Youth have opportunities to partner with adults	5.00	5.00
IV. Engagement	4.67	4.00
P. Youth have opportunities to set goals and make plans.	4.50	3.00
Q. Youth have opportunities to make choices based on their interests	5.00	5.00
R. Youth have opportunities to reflect.	4.50	4.00

Observation/reflection date(s): _____

x Staff meeting check-in(s): Spring and Fall 2011

Other: _____

Steps toward reaching goal:

1. Spring 11’ meet with providers to discuss YPQA indicators of student engagement and brainstorm ways that providers are currently integrating these into program structure and areas to improve upon.
2. Fall of 11’ provide a training for staff on Youth Voice and Choice
3. Meet with staff before the start of program to look at structure of program/curriculum and identify an opportunity in each program where students are able to set a goal, make choices and reflect. This should take place in individual activity and in program

YMCA of Greater Seattle
Program Improvement Plan – Spring 2011
PQA & Youth Program Survey Results

overall.

When and how will you discuss and/or evaluate progress toward meeting this goal? How will you know you are making progress toward meeting the goal?

I will meet with program providers in the spring after they complete program session then again in the fall before program session starts, I will also find a time during the session to meet with providers to check in.

Desired support:

Leader to provide Voice and Choice training in the fall.
