APPENDIX D: MAPS.....	D-1

Foreword

This report contains selected tables from Summary File 3 for Washington State. Summary File 3 contains sample characteristics from the Census long form that was filled out by approximately 1 in 6 persons nationally. The Washington State file became available on September 17, 2002.

This report includes tables related to the school enrollment and educational attainment of the general population and are detailed below. See Appendix A for subject and geographic definitions. The geographic coverage is for King, Kitsap, Pierce, and Snohomish counties. There are separate sections for counties, incorporated places and Census Designated Places (CDP), and census tracts.

Appendices document the change in Census Tract geography between 1990 and 2000, and compare 1990 and 2000 population based on 1990 Census Tract geography. The printed report includes Census Tract and Census Designated Place maps. On the PSRC website, electronic versions of these maps are available separately from the downloadable PDF version of this report.

Tables in this report

- P36. SEX BY SCHOOL ENROLLMENT BY LEVEL OF SCHOOL BY TYPE OF SCHOOL
Universe: Population 3 years and over
- P37. SEX BY EDUCATIONAL ATTAINMENT
Universe: Population 25 years and over
- PCT23. SEX BY SCHOOL ENROLLMENT BY AGE
Universe: Population 3 years and over
- PCT24. SEX BY COLLEGE OR GRADUATE SCHOOL ENROLLMENT BY AGE
Universe: Population 15 years and over
- PCT25. SEX BY AGE BY EDUCATIONAL ATTAINMENT
Universe: Population 18 years and over

Limitations of the Data

The data contained in this report are based on the Census 2000 sample. The data are estimates of the actual figures that would have been obtained from a complete count. Estimates derived from a sample are expected to be different from the 100-percent figures because they are subject to sampling and nonsampling errors. Sampling error in data arises from the selection of people and housing units included in the sample. Nonsampling error affects both sample and 100-percent data and is introduced as a result of errors that may occur during the data collection and processing phases of the census.

For more information, please refer to Chapter 8., Accuracy of the Data in *TECHNICAL DOCUMENTATION: Census 2000 Summary File 3* available at the Census website <http://www.census.gov/prod/cen2000/index.html>.

Data Availability

Orders for additional printed reports may be directed to the Regional Council Information Center at (206) 464-7532. Electronic data files may also be downloaded from the Regional Council's website at <http://www.psrc.org/>.

Appendix A: Definitions

Subject Definitions

Age

The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information

Educational Attainment

Data on educational attainment were derived from answers to long-form questionnaire Item 9, which was asked of a sample of the population. Data on attainment are tabulated for the population 25 years old and over. However, when educational attainment is cross-tabulated by other variables, the universe may change. (For example, when educational attainment is crossed by disability status, the data are tabulated for the civilian noninstitutionalized population 18 to 34 years old.) People are classified according to the highest degree or level of school completed.

The order in which degrees were listed on the questionnaire suggested that doctorate degrees were “higher” than professional school degrees, which were “higher” than master’s degrees. The question included instructions for people currently enrolled in school to report the level of the previous grade attended or the highest degree received. Respondents who did not report educational attainment or enrollment level were assigned the attainment of a person of the same age, race, Hispanic or Latino origin, occupation and sex, where possible, who resided in the same or a nearby area. Respondents who filled more than one box were edited to the highest level or degree reported.

The question included a response category that allowed respondents to report completing the 12th grade without receiving a high school diploma. It allowed people who received either a high school diploma or the equivalent, for example, passed the Test of General Educational Development (G.E.D.) and did not attend college, to be reported as “high school graduate(s).” The category “Associate degree” included people whose highest degree is an associate degree, which generally requires 2 years of college level work and is either in an occupational program that prepares them for a specific occupation, or an academic program primarily in the arts and sciences. The course work may or may not be transferable to a bachelor’s degree. Master’s degrees include the traditional MA and MS degrees and field-specific degrees, such as MSW, MEd, MBA, MLS, and MEng. Some examples of professional degrees include medicine, dentistry, chiropractic, optometry, osteopathic medicine, pharmacy, podiatry, veterinary medicine, law, and theology. Vocational and technical training, such as barber school training; business, trade, technical, and vocational schools; or other training for a specific trade, are specifically excluded.

High school graduate or higher. This category includes people whose highest degree was a high school diploma or its equivalent, people who attended college but did not receive a degree,

and people who received a college, university, or professional degree. People who reported completing the 12th grade but not receiving a diploma are not high school graduates.

Not enrolled, not high school graduate. This category includes people of compulsory school attendance age or above who were not enrolled in school and were not high school graduates. These people may be referred to as “high school dropouts”. However, there is no criterion regarding when they “dropped out” of school, so they may have never attended high school.

Grade In Which Enrolled

The data on grade or level in which enrolled were derived from long-form questionnaire Item 8b, which was asked of a sample of the population. People who were enrolled in school were classified as enrolled in “Nursery school, preschool,” “Kindergarten,” “Grade 1 to 4” or “Grade 5 to 8”, “Grade 9 to 12”, “College undergraduate years (freshman to senior)” or “Graduate and professional school (for example: medical, dental, or law school).”

School Enrollment And Type Of School

Data on school enrollment were derived from answers to long-form questionnaire Items 8a and 8b, which were asked of a sample of the population. People were classified as enrolled in school if they reported attending a “regular” public or private school or college at any time between February 1, 2000, and the time of enumeration. The question included instructions to “include only nursery school or preschool, kindergarten, elementary school, and schooling which leads to a high school diploma or a college degree” as regular school or college. Respondents who did not answer the enrollment question were assigned the enrollment status and type of school of a person with the same age, sex, and race/Hispanic or Latino origin whose residence was in the same or a nearby area.

Public and private school. Public and private school includes people who attended school in the reference period and indicated they were enrolled by marking one of the questionnaire categories for either “public school, public college” or “private school, private college”. Schools supported and controlled primarily by a federal, state, or local government are defined as public (including tribal schools). Those supported and controlled primarily by religious organizations or other private groups are private.

Geographic Definitions

Census Designated Place (CDP)

Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide census data for concentrations of population, housing, and commercial structures that are identifiable by name but are not within an incorporated place. CDP boundaries usually are defined in cooperation with state, local, and tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP

boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary.

For Census 2000, for the first time, CDPs did not need to meet a minimum population threshold to qualify for tabulation of census data. For the 1990 census and earlier censuses, the U.S. Census Bureau required CDPs to qualify on the basis of various minimum population size criteria.

FIPS Codes

Federal Information Processing Standard (FIPS), provides a 2-character FIPS State code and a 5-character FIPS numeric code to uniquely identify each entity contained in a list of names of incorporated places, other communities and settlements, primary county divisions (such as townships, New England towns, and census county divisions), American Indian and Alaska Native areas, airports, military bases, national parks, post offices, and other locational entities (except natural or physical features). A 2-character class code distinguishes the different types of geographic entities. The purpose of the codes is to promote the interchange of formatted, machine-sensible data.

Split Cities

Some cities have extended their boundaries so they cross county boundaries. In the table of Incorporated Places (Table 2), there is a separate listing for each part of such a city located in a single county. Table 4 contains the total population for these split cities. The affected cities are Auburn, Bothell, Enumclaw, Milton, and Pacific.

Metropolitan Areas

The United States Office of Management and Budget (OMB) defines metropolitan areas (MAs) according to published standards that are applied to Census Bureau data. The general concept of an MA is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. The collective term "metropolitan area" (MA) became effective in 1990. MAs include metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs).

Metropolitan Statistical Area (MSA) — The 1990 standards provide that each newly qualifying MSA must include at least:

- one city with 50,000 or more inhabitants, or
- a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000.

Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties

and other selected requirements of metropolitan character (such as population density and percent urban). There

Consolidated Metropolitan Statistical Area (CMSA) — An area that meets the requirements for recognition as an MSA and also has a population of one million or more may be recognized as a CMSA if:

- separate component areas (see PMSA below) can be identified within the entire area by meeting statistical criteria specified in the standards, and
- local opinion indicates there is support for the component areas.

Primary Metropolitan Statistical Area (PMSA) —The component area(s) of a CMSA. PMSAs, like the CMSAs that contain them, are composed of entire counties. If no PMSAs are recognized, the entire area is designated as an MSA.

The Puget Sound region is covered by the following metropolitan areas:

SEATTLE-TACOMA-BREMERTON,WA CMSA

<i>FIPS code</i>	<i>Area Title</i>	<i>Definition</i>	<i>Central City</i>

Appendix C: Change in Population

APPENDIX C: Change in Census Tract Population, 1990-2000

This table provides population for 1990 and 2000 based on 1990 census tract geography.

In most cases where a 1990 tract was split in 2000, the 2000 population for those split tracts were aggregated. In cases where two 1990 tracts were merged in 2000, or where 1990 boundaries were moved in 2000, the 2000 population was obtained by aggregating 2000 block population by the appropriate 1990 geography. Those tracts are in **bold** and the aggregated population is in *italics*.

* This column shows the number of 2000 tracts formed from the 1990 tract. '0' indicates the tract was merged into a neighboring tract in 2000. See Appendix B for census tract correspondence.
