Presentation

SDOT and DPD went over the Waterfront Seattle and Elliott Bay Seawall project scopes, design process, and schedules. Planning Commission and Design Commission staff explained the review process of the projects by a panel made up of Design and Planning Commission members and an Arts Commission liaison. SDOT Seawall project managers and Seawall design team members presented the current thinking about development of Seawall alternatives in anticipation of the first official review on April 14.

The commissioners provided the following recommendations on the review process:

- Provide more than 90 minutes for each meeting.
- Have the project team present for the full discussion after the presentation.
- Aim to have the design team make the presentations, and not solely City staff, as often as possible.
- Have the team make a presentation during the summer. There is too big of a gap between reviews during the summer of 2011.
