Seattle’s Food Action Plan lays out strategies to get more healthy food to more Seattle residents, expand opportunities to grow food in the City, strengthen our regional food economy, and reduce food-related waste.

- The Food Action Plan (FAP) calls for incorporating food system planning into the City’s ongoing planning and programmatic activities like comprehensive planning and neighborhood planning.

- The FAP calls for expanding initiatives like Farm to Table and Fresh Bucks that get healthy food into the hands of low-income residents while supporting local farmers and strengthening what is already working, like the P-Patch community gardening program and cooking education at Community Centers.

- The FAP recognizes that Seattle’s food system does not stop at the City’s borders, and that partnerships with businesses, community organizations, and other governments in the region are essential to creating a resilient, equitable, and prosperous food system.

- The Food Action Plan is a five-year plan that was adopted by the Mayor and City Council in 2013. The plan contains 40 actions that are recommended to be implemented by 2018. Coordination and monitoring of plan implementation is led by the City’s Office of Sustainability and Environment.

### Seattle Food Action Plan Goals

**Healthy Food for All**
All Seattle residents have enough to eat and access to affordable, local, healthy, sustainable, culturally appropriate food.

**Grow Local**
It should be easy to grow food in Seattle and in our region, for personal use and for business purposes.

**Strengthen the Local Economy**
Businesses that produce, process, distribute, and sell local and healthy food should grow and thrive in Seattle.

**Prevent Waste**
Food-related waste should be prevented, reused, or recycled.

2014 Program Highlights

Healthy Food for All: Fresh Bucks
Fresh Bucks makes healthy food more affordable to low-income families by doubling federal food assistance benefits (SNAP, or food stamps) at Seattle farmers markets. In 2014, over 4,000 low-income shoppers ate more fruits and vegetables as a result of this program. Fresh Bucks is a collaboration between the Seattle Office of Sustainability and Environment, the Washington State Farmers Market Association, and Seattle’s farmers markets.

Grow Local: Seattle Farms
In 2014, four City departments came together to create Seattle’s first opportunity for commercial urban farmers to lease farmland from the City of Seattle. Through a competitive application process, three urban farming entrepreneurs were selected to test out three different models of urban farming, in the process providing community benefits in the form of job training, access to healthy food, and activation of public space.

Strengthen Local Food Economy: Farms and Food Roundtable
In 2013, the City of Seattle, King County, and Pike Place Market convened over 35 food and farming experts to develop strategies to protect farmland and expand marketing and distribution opportunities for local farmers. In 2014, the Farms and Food Roundtable released the recommendations from this stakeholder group. OSE is working with King County, Pike Place Market, and other stakeholders advance these recommendations.

2014 by the numbers

- 42 Farm to table childcare and senior meal sites purchasing food directly from local farmers
- 6 Good Food Bag sites (low-cost CSA at childcare and senior meal sites)
- 5,905 King County seniors receiving Farmers Market Nutrition Program vouchers
- 28,000 Pounds of produce donated by P-Patch community gardeners
- 3.39M Invested into the anti-hunger system to support food banks, home food delivery, and emergency food system support
- 21 Farmers markets and farm stands accepting Fresh Bucks
- 4,077 Low income shoppers using Fresh Bucks, including 1144 that had never before used SNAP at a farmers market
- $244,000 Dollars Fresh Bucks brought into the local food economy
- 89% Fresh Bucks shoppers who reported eating more fruits and vegetables
- 6,848 P-Patch Community gardeners
- 17 Low-income gardeners gaining income and opportunity through P-Patch Market gardening program
- 3 New farm plots on City-owned land opened to urban farming entrepreneurs
- 7 Public orchards stewarded through Parks Orchard Steward Program
- 18,000 Pounds of food grown in gardens, orchards, and farms on Parks property
- 75 Fruit trees distributed for neighborhood planting through Trees for Neighborhoods
