<b>Title/Sign Heading:</b>	Sail Sand Point (Magnuson Park Building 31) Feasibility Study
<b>Project Goal:</b>	The goal of this project is to explore options for rehabilitation, renovation, or replacement of Magnuson Park Building 31 (the Sail Sand Point covered moorage and boathouse). The existing structure was built by the Navy between 1938 and 1991 and served as a lookout and storage for rescue boats. For the past 20 years, it has served countless sailors, paddlers and boaters through Sail Sand Point's community boating programs. Seattle Parks and Recreation and Sail Sand Point are committed to retaining and expanding the value that this facility provides and this study will explore options to do so that are sensitive to environmental concerns, sensitive to it's historic legacy, and safe and accessible for users.
<b>Budget:</b>	The Seattle Parks District Major Project Challenge Fund provides \$80,000 in funding for this project. Miller Hull Partnership is providing \$41,000 in pro bono services for this project.
<b>Neighborhood Plan</b>	
<b>Project Schedule</b>	Study Final Draft anticipated in December 2019.
<b>Anticipated Impact</b>	
<b>For Information Contact:</b>	Oliver Bazinet Capital Project Planner City of Seattle, <a href="#">Seattle Parks and Recreation</a> 206-386-1959
