

10/6/2020

Dear Mr. Jonlin,

As a member of the 43rd Congressional District and a concerned citizen who kind of world we are leaving for our children and grandchildren, I urge you to promote the progressive possible changes in the city building codes to help head off the climate disaster we are facing. I am enclosing the letter written by Holly Townes of the 43rd Congressional District Environmental Caucus of proposed building code changes. Please do whatever you possibly can because you are in the admirable position of having some power to reduce our greenhouse gas emissions. As the largest city in the state we also have the responsibility to lead and provide a role model for smaller municipalities.

Thank you very much for your time and attention to this critical issue.

Eileen M. Kirkpatrick, MS, CIH
