**Purpose of checklist:**

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

**Instructions for applicants:**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use “not applicable” or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

**Instructions for Lead Agencies:**

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

**Use of checklist for nonproject proposals:**

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

**A. background**

1. Name of proposed project, if applicable:
   
   2019 Seattle Land Use Code Omnibus Ordinance

2. Name of applicant:
   
   City of Seattle Department of Construction and Inspections (SDCI)
3. Address and phone number of applicant and contact person:

City of Seattle  
Department of Construction and Inspections  
700 Fifth Avenue, Suite 2000  
PO Box 34019  
Seattle, Washington  98124-4019  
Contact:  Bill Mills, 206-684-8738

4. Date checklist prepared:

September 25, 2019

5. Agency requesting checklist:

City of Seattle Department of Construction and Inspections

6. Proposed timing or schedule (including phasing, if applicable):

City Council consideration is expected to begin in the fourth quarter of 2019.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

SDCI is responsible for maintaining the Land Use code on an ongoing basis to ensure the proper maintenance of its provisions. Omnibus or maintenance ordinances will be prepared on an ongoing basis.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

The information provided in this checklist.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

The legislation would apply citywide where development permit applications are ongoing. The legislation primarily addresses administrative issues and makes only minor alterations to the meaning, application, and intent of current Land Use Code provisions in order to clarify their application.

10. List any government approvals or permits that will be needed for your proposal, if known.

Approval by Seattle City Council and Mayor as amendments to Seattle’s Land Use Code.
11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal involves many small amendments to the Land Use Code and to some related sections of the Seattle Municipal Code that are intended to clarify current provisions or to correct minor oversights and clerical or typographical errors. The proposed changes in this omnibus are summarized in the Director’s Report prepared by SDCI that accompanies the proposed amendments and is published together with this checklist for public review.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The proposed amendments apply to areas throughout the City of Seattle.

B. ENVIRONMENTAL ELEMENTS

1. Earth
   a. General description of the site
      (circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____________

      Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

   b. What is the steepest slope on the site (approximate percent slope)?

      Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

   c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

      Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
3. **Water**

a. **Surface Water:**

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. **Ground Water:**

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

2) Could waste materials enter ground or surface waters? If so, generally describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

4. Plants

a. Check the types of vegetation found on the site:

- X deciduous tree: alder, maple, aspen, other
- X evergreen tree: fir, cedar, pine, other
- X shrubs
- X grass
- X pasture
- X crop or grain
- X Orchards, vineyards or other permanent crops.
- X wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- X water plants: water lily, eelgrass, milfoil, other
X other types of vegetation

This is a non-project action. There is no specific site or project location. No construction is proposed. The range of sites that could be affected by the proposal could include those plants checked on the lines above.

b. What kind and amount of vegetation will be removed or altered?

This is a non-project action. There is no specific site or project location. No construction is proposed.

c. List threatened and endangered species known to be on or near the site.

This is a non-project action. There is no specific site or project location. No construction is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

This is a non-project action. There is no specific site or project location. No construction is proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

This is a non-project action. There is no specific site or project location. No construction is proposed.

5. Animals

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site. Examples include:

   birds: hawk, heron, eagle, songbirds, other:
   mammals: deer, bear, elk, beaver, other:
   fish: bass, salmon, trout, herring, shellfish, other ________

This is a non-project action. There is no specific site or project location. No construction is proposed.

b. List any threatened and endangered species known to be on or near the site.

This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Is the site part of a migration route? If so, explain.

This is a non-project action. There is no specific site or project location. No construction is proposed.
d. Proposed measures to preserve or enhance wildlife, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

e. List any invasive animal species known to be on or near the site.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

6. Energy and natural resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

7. Environmental health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

1) Describe any known or possible contamination at the site from present or past uses.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.
Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

4) Describe special emergency services that might be required.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

5) Proposed measures to reduce or control environmental health hazards, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

3) Proposed measures to reduce or control noise impacts, if any:

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
8. **Land and shoreline use**

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

   This is a non-project action. There is no specific site or project location. No construction is proposed. See Part D Item 5 for additional information. The proposal consists of minor cleanup and clarification proposals for the Land Use Code.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Describe any structures on the site.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

d. Will any structures be demolished? If so, what?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

e. What is the current zoning classification of the site?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed. The omnibus amendments include changes to the Land Use Code that apply throughout the City of Seattle in all zones.

f. What is the current comprehensive plan designation of the site?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

g. If applicable, what is the current shoreline master program designation of the site?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed. No changes to the Shoreline regulations are proposed.
h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed. No changes to the critical areas regulations are proposed.

i. Approximately how many people would reside or work in the completed project?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

j. Approximately how many people would the completed project displace?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

k. Proposed measures to avoid or reduce displacement impacts, if any:

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

m. Proposed measures to ensure the proposal is compatible with nearby agricultural and forest lands of long-term commercial significance, if any:

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Proposed measures to reduce or control housing impacts, if any:
Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

10. **Aesthetics**
   
a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
   
b. What views in the immediate vicinity would be altered or obstructed?
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
   
c. Proposed measures to reduce or control aesthetic impacts, if any:
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

11. **Light and glare**
   
a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
   
b. Could light or glare from the finished project be a safety hazard or interfere with views?
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
   
c. What existing off-site sources of light or glare may affect your proposal?
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
   
d. Proposed measures to reduce or control light and glare impacts, if any:
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

12. **Recreation**
   
a. What designated and informal recreational opportunities are in the immediate vicinity?
   
   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
b. Would the proposed project displace any existing recreational uses? If so, describe.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

13. **Historic and cultural preservation**

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers located on or near the site? If so, specifically describe.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

14. **Transportation**

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.
b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

h. Proposed measures to reduce or control transportation impacts, if any:

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

15. Public services

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.
Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Proposed measures to reduce or control direct impacts on public services, if any.

Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

16. **Utilities**

a. Circle utilities currently available at the site:
   electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other ___________

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

   Not applicable. This is a non-project action. There is no specific site or project location. No construction is proposed.

C. **Signature**

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

D. supplemental sheet for nonproject actions

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposed amendments would not affect discharges to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise. Greenhouse gas (GHG) emissions have also been considered, and no changes to GHG emissions are expected as a result of this non-project action. Individual projects that may use the land use and zoning provisions of the proposal will occur over time and cannot be evaluated in terms of discharge to water, emissions to air, production, storage, or release of toxic or hazardous substances, or noise, at this stage. Such projects will be subject to environmental review (if they meet or exceed thresholds for environmental review) as they move forward.

Proposed measures to avoid or reduce such increases are:

No proposed measures are proposed beyond existing regulations at this time because the proposal does not involve any construction or development activity. A SEPA GHG Emissions Worksheet is required for all individual projects that may use the provisions of this proposal. Any potential impacts from GHG emissions will be addressed during review of development proposals on a project-specific basis.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

Enactment of the proposed amendments is unlikely to affect plants, animals, fish, or marine life. The area is developed and urban in character. The proposal does not alter existing protections to plants, animals, fish or marine life.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

No measures are proposed beyond existing regulations at this time because the proposal does not involve any construction or development activity. The City and other regulatory agencies have existing regulations to protect these resources.

3. How would the proposal be likely to deplete energy or natural resources?
The proposed amendments would not affect energy or natural resources.

Proposed measures to protect or conserve energy and natural resources are:

No measures to protect or conserve energy are proposed beyond existing regulations at this time because the proposal does not involve any construction or development activity.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

The proposed ordinance would not affect environmentally sensitive areas or areas designated for government protection.

Proposed measures to protect such resources or to avoid or reduce impacts are:

No resource protection measures are proposed beyond existing regulations at this time because the proposal does not involve any construction or development activity.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

No incompatible uses would be allowed or encouraged by these amendments. No site-specific proposals are proposed at this time. A few changes require additional analysis and are discussed below.

The proposed change to subsection 23.28.030.A.5, would require applicants to demonstrate that proposed adjusted lots would be served by existing or extended infrastructure prior to a lot boundary adjustment (LBA) approval. The new language would provide a means to better address issues with utility improvement requirements for LBAs that usually come from Seattle Public Utilities. LBAs, as a “Type I” nondiscretionary review, cannot be conditioned like a short subdivision to require utility improvements, but the change would potentially provide authority to require the applicant to show where the utility connection would be located for purposes of evaluating a future building permit application. This proposal is likely to improve the process for utility improvements and would have a positive effect on land and shoreline use.

The proposed change to Section 23.41.012.B.11.g would add language to the Code specifically providing for design departures from rooftop coverage limits for rooftop features in Midrise and Highrise multifamily zones and in commercial and Downtown zones that are allowed an exception to height limits. The rationale is that the departure is not from a height limit, but rather from standards intended to regulate appearance of a structure roof, and this is a subject within appropriate purview of a design review board. Because of the Board review, any effect on land use is expected to be minimal.
The existing Section 23.42.112 allows structures nonconforming to development standards that are occupied or accessory to residential uses to be rebuilt or replaced. The proposed change would add language to clarify that nonconforming development that is not structural, such as existing street access rather than alley access or a parking pad in a required front yard, could be maintained if a residential structure is rebuilt. As an example, this change would clarify that an existing nonconforming garage with street access would not be required to be rebuilt with an orientation toward an alley. The effect on land use is expected to be minimal because existing conditions would continue.

The proposed change to Section 23.44.026 would specifically allow a conditional use review for a use not otherwise permitted in the zone to apply to both landmark structures, as it does now, and to the “sites” on which they are located, because there are cases where whole sites are landmarked and it may have been the intent of the code to allow for a use on the site, but the code only states “structure.” The effect on land use is expected to be minimal, as the conditional use process is subject to public comment and an appealable land use decision.

A proposed change to Section 23.48.007 would add the Major Phased Development process to Seattle Mixed (SM) zones, providing the same language already in the Code for industrial zones and for all commercial zones other than SM. There is no apparent policy reason to not allow Major Phased Development in SM zones and no effect on land use from this procedural change.

Two changes to Section 23.48.245, regulating upper-level development standards in South Lake Union Urban Center, are worth noting. The first change is to the height limit standard for podiums in subsection 23.48.245.B.4.a. The existing language says that the height limit extends from the street lot line to a parallel alley lot line or, if there is no alley parallel to the street lot line, to a distance of 120 feet from the street lot line or to the rear lot line if the lot is less than 120 feet deep. This standard assumes a straight street lot line but does not provide guidance on how to measure the height limit from a curved or irregular street lot line. The change would add language explaining that the measurement from a street lot line that is not straight is from the point where the distance between the street lot line and the rear lot line is the narrowest.

The other change is to tower limits per block or block front in 23.48.245.F. John Street is interrupted in South Lake Union between Terry and Boren because of the grade. The proposed changes clarify that “block front” on the east side of Terry does not stretch all the way from Denny to Thomas, but rather it was intended that John St (if extended) would separate two block fronts there, and thus the undedicated area is also regarded as separating the two block fronts.

The proposed changes are not expected to have significant impacts. The changes would affect only a small number of properties meeting the specific conditions identified in the proposed code changes.

The proposed change to subsection 23.49.008.B would add DOC2 zones to the eligible zones allowing 10 percent extra height for an interesting roof and to accommodate mechanical and common recreation area. Because the height increase is narrowly limited to certain features and exists in other Downtown zones, no substantial effect on land use is expected. Further, the number of sites in DOC2 zones that are undeveloped or likely to be redeveloped is limited.
A series of amendments to bicycle parking requirements under Section 23.54.015.K are proposed that are all modest clarifications to existing requirements, and are intended to make bicycle parking work more efficiently and conveniently for developments where it is required. No effect on land use is expected.

Changes to Section 23.54.040 would add a 24-foot overhead clearance requirement for access to solid waste and recyclable storage areas of containers larger than two cubic yards and where direct access to the storage space by a collection vehicle is proposed. Another change would require that access ramps to both storage space and collection locations shall not exceed a 6 percent grade. These changes are not expected to affect land use.

Proposed measures to avoid or reduce shoreline and land use impacts are:

No resource protection measures are proposed beyond existing regulations at this time because the proposal does not involve any construction or development activity. Future development projects will be subject to design review and to environmental review (if they meet or exceed thresholds for environmental review), which will help mitigate the impacts of height, bulk, and scale for new developments on existing buildings.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

The proposed ordinance would not affect transportation or public services.

Proposed measures to reduce or respond to such demand(s) are:

In general, providers of utilities and public services, including fire protection, police protection, health care, and schools regularly review the effects of increased development and propose enhanced services as necessary as part of their planning for future service needs. Future site-specific development projects will need to meet the City’s concurrency requirements for transportation, utilities, and public services infrastructure. As the proposal does not involve any construction or development activity, no specific measures are practicable at this stage.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

No conflicts are anticipated.
