DEARBORN STREET UPGRADES
Improving safety and traffic flow on S Dearborn St

FACT SHEET
July 2018

PROJECT DESCRIPTION
We completed the first phase of this project last year which included changing the lane configuration to add more space for people biking. Starting this summer, we will improve traffic flow and repave sections of S Dearborn St to make it safer and more comfortable to travel on.

PROJECT COMPONENTS
- Repave and restripe S Dearborn St from 9th Ave S to Rainier Ave S
- Restripe and make minor pavement repairs from 6th Ave S to 9th Ave S
- Add a traffic diverter at Rainier Ave S and S Dearborn St to decrease delays for people driving and taking transit and reduce the number of drivers cutting through the Jackson Place neighborhood (see details on back)
- Extend the existing protected bike lane to connect under I-5, upgrade traffic signals to include bike signals, and add physical barriers between people biking and moving traffic

OUTREACH
Community outreach began in summer 2015 and included info sessions and meetings with project neighbors. We will keep project neighbors in the loop during this second phase of construction with email updates, phone calls, and door-to-door flyering.

CONSTRUCTION IMPACTS & SCHEDULE
We expect construction to begin in August and continue through fall 2018.

What to expect
- Neighbors may experience noise from construction crews and equipment, vibration, and dust
- Crews will typically work at night and outside of peak hours to keep traffic flowing on this busy street
- We expect to keep 2 lanes of traffic open at all times
- We will maintain access to businesses and residences at all times

Example of street repaving. Street repaving keeps our streets safe and smooth and lowers the cost of future maintenance.

Approved by voters in 2015, the 9-year, $930 million Levy to Move Seattle provides funding to improve safety for all travelers, maintain our streets and bridges, and invest in reliable, affordable travel options for a growing city.
Dearborn St and Rainier Ave S

We’re adding a traffic diverter to prevent people from driving westbound from S Dearborn St onto Rainier Ave S. This will decrease delays for people driving and taking transit on Rainier Ave S and help reduce the number of drivers cutting through the Jackson Place neighborhood.

Designated signal phase for people biking to continue east onto S Dearborn St
