 INTERBAY TRAIL CONNECTIONS New protected bike lanes and intersection updates coming in early September

INTERBAY TRAIL CONNECTIONS

PROJECT DESCRIPTION

We're about to begin construction on a transportation safety and mobility project in the Interbay and Magnolia communities to better connect major trails. We've been updating the community about this project since last summer.

This project includes updating the street design of 20th Ave W, Gilman Ave W, W Government Way, and W Emerson Pl to include protected bike lanes and more intuitive and comfortable intersections.

Specifically, it will add 2-way protected bike lanes on the north/east side of these streets (W Emerson Pl will have bike facilities added to the south side). Construction will include replacing several damaged concrete panels in the street, and installing paint-andpost bike lanes with appropriate signs. There are on-street parking impacts on the north side of W Government Way.

We're also adding a new bike signal at a redesigned intersection of 20th Ave W and W Dravus St, and updating intersection design at Gilman Ave W and W Emerson Pl, and at Thorndyke Ave W and 20th Ave W. A new marked crosswalk will be added across W Government Way at 30th Ave W.

WHAT YOU NEED TO KNOW

Construction is scheduled to begin as soon as September 7, with the replacement of concrete panels along Gilman Ave W and 20th Ave W. We will notify you of specific construction impacts as more information is available. Typical construction impacts include:

- Noise, dust, and vibrations near work zone
- Traffic impacts
