

Improving your reliability

Seattle-area natural gas main relocation project

January 26, 2018

Dear PSE Customer,

In conjunction with the Seattle Department of Transportation, Puget Sound Energy will be working to relocate the natural gas main in your neighborhood. We are committed to completing our work safely and efficiently, and our crews will do their best to reduce impacts to nearby neighbors. Please see below for project details.

Work details

Who: Natural gas crews from PSE and InfraSource
What: Relocating the underground natural gas main
When: Work is expected to begin in late January and last approximately six weeks
Work hours: Monday through Friday,
8 a.m. – 4 p.m.
Where: Portion of South Lander Street between 1st Avenue South and 4th Avenue South (please see map on reverse)

Sewer safety

If our project involves being underground near your sewer or septic lines, we will conduct a follow-up inspection of your lines by inserting a camera through them. Although our installers take care to avoid sewer and septic lines, on rare occasions, a gas pipeline is inadvertently installed through those lines, which are often not mappable or detectable using above-ground sensors. This inspection verifies your sewer is clear of a gas line. Visit pse.com/sewersafety for information about PSE's work with Hydromax USA to prevent cross bore danger.

What you can expect

- Signs and traffic control flaggers will guide vehicles through the work zone
- There will likely be noise from trucks and heavy machinery
- **Some customers may experience a short interruption of natural gas service during this time.** We will notify impacted customers prior to beginning work requiring an interruption in service
 - If you are home when the work is complete, a technician will reconnect your natural gas service and complete safety checks on your gas appliances immediately
 - If you are not home when the work is complete, please give us a call at **1-888-225-5773** and a technician will be out as soon as possible to reconnect your natural gas service
- This work should not impact electric service in the area

We're proud to serve in your community and aim to complete the work with as little disruption as possible. If you have questions or concerns, please contact me at the phone number or email listed below and reference project # **109100462**. Thank you for your patience during this project.

Sincerely,

Griffin Clark
