Example: neighborhood greenway improvements to help people cross busy streets.

Example: microsurfacing pavement repair work.

WHAT IS A NEIGHBORHOOD GREENWAY?

Neighborhood greenways are safer, calmer residential streets for you, your family, and neighbors that make people walking and biking the priority. We will add signs and pavement markings to help people find their way and make it easier to cross busy streets with curb ramps, crosswalks, and flashing lights (see map for locations of crossing improvements). We'll also make pathway improvements where the route connects between streets and build a new connection to the Mountains to Sound Trail.

We want to keep you informed!

HOW WAS THIS ROUTE SELECTED?

Our planning team worked with community members since 2014 to determine the best north – south route in Rainier Valley. Hundreds of people gave feedback through public meetings, site visits with community members, an online survey, and direct communication. Based on that input, we selected residential streets that have lower car volumes and speeds, aren't too steep, and connect people to destinations like schools, libraries, local businesses, community centers, and parks.

TREE PRUNING

Before the neighborhood greenway improvements are built, our Urban Forestry team will need to prune any vegetation and trees that extend into the street. The purpose of the tree pruning is to make sure street signs are visible, the sidewalk area is clear for people walking, and to allow large equipment through without impacting the trees. We are following up with individual homes that have trees that need pruning – please be on the lookout for a separate mailer with more information.

MICROSURFACING

Crews will complete "microsurfacing" on about half of the streets along the neighborhood greenway route. Microsurfacing is a cost-effective method to maintain roads by coating them with a top layer of asphalt mix that extends the life of the pavement. The streets that are being microsurfaced are shown on the map in orange. If your street is being microsurfaced, you will receive a separate mailer with more details on what to expect.

RAINIER VALLEY NORTH-SOUTH NEIGHBORHOOD GREENWAY
