February 26 public meeting
Project background
Each year, the Seattle Department of Transportation paves arterial streets in poor condition to make them safer and smoother and to extend their useful life. This year, we’ll repave:

- About 1 mile of 15th Ave S between S Spokane St and S Angeline St
- A section of S Spokane St between S Columbian Way and 18th Ave S

We’ll also make changes to the intersection of 15th Ave S and S Columbian Way.

On February 26, 2020, we hosted an event for the community to learn about the paving and intersection improvements along 15th Ave S.

Event summary
The 15th Ave S Improvements project hosted a 1.5-hour public meeting on February 26, 2020, at Mercer International Middle School. The key objectives of the event were to share information about the paving of 15th Ave S and the revised design for the 15th Ave S and S Columbian Way intersection, answer questions from community members, and share information about the schedule and scope of construction. The meeting included a presentation (Appendix 1.5), display boards (Appendix 1.1) and roll plots (Appendix 1.4) for the public to engage with, in addition to a factsheet (Appendix 1.7) for attendees to take home with them.

Event objectives also included:

- Raising awareness of the new intersection design
- Raising awareness of what the public can expect during construction
- Providing a chance to meet and engage with the project team
- Providing information on how to stay involved with the project (during final design and construction)
**Event promotion**
We promoted the public meeting through the following methods:

- Mailers to homes in the Beacon Hill area (*Appendix 1.2*). The mailer included options for requesting an interpreter for Spanish, Tagalog, Korean, Vietnamese, and Somali.
- Emails or phone calls to key stakeholders, as well as one-on-one briefings.
- Email invitations to project listserv.
- Door-to-door notification to businesses in the project area.
- Project webpage updates.
- SDOT Facebook post.
- SDOT blog post.

**Event accommodations**
We provided the following accommodations at the public meeting:

- Americans with Disabilities Act-compliant venue that was easily accessible by transit.
- American Sign Language, Chinese, Vietnamese, and Spanish interpretation.

We offered an evening event to accommodate different schedules of students, parents, and people who work during typical business hours.

**Feedback summary**
We provided comment cards for attendees to give feedback, in addition to a Q&A session at the end of the event presentation. We also invited attendees to leave comments on the roll plots. We received about 20 comment cards (*Appendix 1.3*), 30 questions at the conclusion of the presentation (*Appendix 1.6*), and 45 comments on the roll plots (*Appendix 1.4*). The 3 most common themes were safety and security, pedestrian crossings and sidewalks, and buses.

*Please see the appendices to view comments from event attendees.*
Appendix 1.1

Display boards
Project Background

We’ll repave:
- 15th Ave S
- S Spokane St between S Columbian Way and 18th Ave S

We will:
- Resurface the roadway
- Install new, visible lane markings
- Make spot repairs on sidewalks
- Make a pedestrian improvement at 15th Ave S and S Spokane St
- Add curb ramps to make sidewalks more accessible

In addition to paving, we’ll make improvements at the 15th Ave S and S Columbian Way intersection.

Existing Conditions

15th Ave S provides an important connection for people traveling between Beacon Hill and Rainier Valley. It needs to be repaved and restriped in the near future to extend its useful life.

The intersection of 15th Ave S and S Columbian Way is confusing for people walking, rolling, biking, and driving. It can be made safer, bringing us closer to Vision Zero: Seattle’s plan to end traffic deaths and serious injuries on city streets by 2030.
Paving

- We repave arterial streets in poor condition to make them safer and smoother, and to extend their useful life.
- We prioritize paving projects based on pavement condition, traffic volume, geographic equity, cost, and opportunities for grants or coordination with other projects.
- Paving streets creates opportunities to improve street safety and move people and goods more efficiently.

Construction

We know construction can be disruptive. We’re committed to being good neighbors and will work to minimize impacts.

Ways we do this include:
- Being available for questions (in-person, hotline, email)
- Providing advance notice about construction through email updates and other promotions
- Ensuring project signage is clear and effective to encourage safety and caution near active work zones
- Maintaining a website with up-to-date construction information

What to expect during construction:
- There will be noise, dust, vibration, and large equipment
- Roads, lanes, and sidewalks may be closed, reduced, or detoured where necessary
- Driveways may be temporarily blocked, or impacted for several days at a time. Businesses and residents will be notified of any driveway closures in advance.
- Business access will be maintained
Share your feedback

We want to hear from you

- What do you want to know about the timing or sequencing of construction?
- What will help ensure that you still have access to the project area during construction?
- What are your thoughts on the revised design for the 15th Ave S and S Columbian Way intersection?
- What do you want SDOT to know about how construction could impact you, your family, or your business?

15th Ave S and S Columbian Way Intersection Improvements

Over the last two years, we've engaged with neighbors and businesses to develop an intersection design that fits the needs of everyone.

Based on feedback we heard, we developed a new proposed concept for the 15th Ave S and S Columbian Way intersection.

What we heard:
- Keep pedestrians safe
- Retain the traffic signal at the intersection of 15th Ave S and S Oregon St
- Use space for traffic improvements, not landscaping
- Business parking along 15th Ave S should be maintained
- Maintain traffic operations
- Provide safety and accessibility benefits for people walking, biking, driving, and rolling
Construction Schedule

EARLY 2020  Finish design

EARLY TO MID-2020  Pre-construction coordination with the community

FALL 2020  Begin construction

2021  Complete construction

Stay Involved

PUBLIC MEETING

› Learn about the project
› Engage with project staff
› Share your feedback

Wednesday, February 26
Mercer Middle School
1600 S COLUMBIAN WAY, SEATTLE

Public meeting:
6:30–8:30 PM

Presentation: 7 PM

This year we'll begin repaving 15th Ave S between S Spokane St and S Angeline St. We'll also repave S Spokane St between S Columbian Way and 18th Ave S.

Improvements include:
› Repaving 15th Ave S as well as S Spokane St
› Drainage improvements
› Safety improvements at the 15th Ave S and S Columbian Way intersection
› Updating curb ramps and sidewalks in places
› Improving the slip lane from northbound 15th Ave S to S Spokane St

EVENT TIPS:
› Venue is ADA-accessible
› Visit tripplanner.kingcounty.gov to plan your trip
› To request an interpreter or accommodations for persons with disabilities, please contact (206) 684-4193 at least 5 working days prior to the event

Visit the project webpage and sign up for email updates:

For more information: 15thAveAAC@seattle.gov, (206) 775-8719

________________________________________________________________________
Please share your comments, questions, or concerns below:

I support slowing down traffic! I am a new bike commuter @ 15th was very frightening - with the traffic going very fast w/ no protection of obstacles in the bike lane. The improvements look good - but P.I.R.O.T.E. - you can have more & better pedestrian crossings all up @ 15th would be my only request.

Thank you!

Please share your comments, questions, or concerns below:

I'm curious how the signal will work @ Oregon + 15th. I'm familiar with how it works now - but with bikes trying to get from Southbound 15th to Southeast Columbia, I'd start getting concerned about cars making right on red. Wondering if there is any consideration for a pedestrian & bike only phase or restricting right on red.

Please share your comments, questions, or concerns below:

1 car per green - just like every way entrance but in school drop off area.
Please share your comments, questions, or concerns below:

Better signage at entrance for Fairview School Zone.

Signage at the VA hospital about how to get back on I-5.

Please share your comments, questions, or concerns below:

Thanks for listening to people's concerns & making these improvements. Good job.

Just concerned about how traffic will flow during construction. Not looking forward to that.

Please share your comments, questions, or concerns below:

Looks lots better. Nice work! Thanks.

Better for all travelers - foot, bike, car, bus.

Need signage on routes to I-5 from VA. Folks from VA facility are often from outlying communities and need extra help returning to I-5.
Please share your comments, questions, or concerns below:

1. MacPherson's to a Pr. - will need safe hose truck outreach areas.

2. S. Spokane St. / Columbian Wy / VA Hosp Dr. -
   A large backup forms every morning for ppl trying to get to the VA Hospital. A slight realignment of the entrance and intersection at the VA Hospital Dr. on Spokane Ave could alleviate this.

3. A lot of drivers try to pass on the right on Parked vehicles by using the 15th Ave & 3rd Ave through lanes. Suggest adding a lane curb to divide 15th from Ms Columbian Way left turn traffic.

Please share your comments, questions, or concerns below:

SDOT is dishonest about feedback from meetings. As with previous meetings, what gets shown as "what we heard" is not the original feedback, but what SDOT wants to do, and some key feedback is not listed.

Please share your comments, questions, or concerns below:

Thank you for adjusting the 15th Ave design. I am happy to see you tried to incorporate the needs and opinions of lots of different groups. As a resident who primarily walks and bikes thru these intersections here are some of my concerns:

- Increase crosswalk safety at 15th Ave and Spokane, specifically crossing the slip lane.

- Increase pedestrian safety at S. Spokane st street by adding a crosswalk over 15th Ave, have a sidewalk along S. Spokane.

- Generally work on decreasing speed of cars along 15th and S. Columbia (narrowing streets, etc)

Thank you again for working on this project for so long. New design seems to take the needs of more of the stakeholders and answers a lot of the original concerns.
Please share your comments, questions, or concerns below:

Be sure to leave space for emergency vehicles to get in (and for cars to pull over to let them get thru), especially since the area is close to the VA & the fire station. An example is the "new" roadway on Swift Ave that has bike posts all along it. Emergency vehicles can't get thru & cars can't pull out of the way to let them thru due to the bike posts.

Please share your comments, questions, or concerns below:

ADENIS - THANKS FOR KEEPING COOL AND COURTEOUS DESPITE SOME OF THE EMOTIONALLY LADEN QUESTIONS/COMMENTS. THANKS FOR DEMOCRACY AT WORK IN A COMMUNITY GATHERING LIKE THIS!

Please share your comments, questions, or concerns below:

You need to pay attention to how tree canopy obscures signs. School zone flashes are often behind trees. Intersections only have one street sign (on left) at each corner - they're usually behind trees.

(Practitioners should come equipped w/ 2 miles!)
Please share your comments, questions, or concerns below:

Stop making it all about bikes. I had a bad accident: it's not an option for me.

Incidentally, the light at 15th/Orange doesn't change until the driver a little bit at the crosswalk. The light at Spencer on 15th doesn't register.
My little prior to prompt 15th light if bigger cars aren't present. (unless I beck up several times.)

Please share your comments, questions, or concerns below:

We need more frequent buses if there's to be run only on
* Never again and hour store where traffic can't drive past (bumps)
* Have you considered smaller shuttle buses to light rail stops?

I need to find on map but couldn't. There's one ridiculous stop opposite.
Red Apple & another for Jeff Grif Crone. The "perimeters" no waiting
but stop traffic & cause back ups unnecessarily.

Please share your comments, questions, or concerns below:

Columbia Way towards 15th from Beacon Ave —
will we still be able to turn left onto Arapahoe? Is there any way to restore a small turn lane right here?

Crushed permanently.
Please share your comments, questions, or concerns below:

Table stand needs a place for trucks

Please share your comments, questions, or concerns below:

1. Add 30-foot "No Parking" zone on eastbound Oregon at 15th Avenues.
2. Improve pedestrian crossing of 15th Avenues at South Angeline. Add flashing lights.
3. Eliminate left turns from northbound 15th Ave to westbound Spokane St.

Please share your comments, questions, or concerns below:

- Please prohibit left turns from N 15th St to W Spokane St. Traffic backups are supposed to use Columbia Way.
- Concerns about getting rid of the Sheehan at top of hill at 15th/Columbia.
- Used crew in recent icy weather when Spokane is closed - turn stream
Please share your comments, questions, or concerns below:

1. **Cannabis Lane on 15th Ave South be added in?**
2. Pedestrian flashing crosswalk @ Snoqualmie
3. Repave Snoqualmie between 15th & Columbia
4. ART / Beautification on concrete islands

*PLEASE ADDRESS SNOQUALMIE*

---

Please share your comments, questions, or concerns below:

1. DOT Bike Booklet needs updating/Pronto still on there...
2. General Comment - Bike lanes that are not maintained to high standards become unusable - bikes will then have to enter car traffic when cars don't expect - because there appears to be a bike lane!
3. Keep on Working It (What You Do Matters)
   - We are all going to get there. Thank you.

---

Please share your comments, questions, or concerns below:

*As add to project email list.*

Lots of concerns re 15th Ave S / S. Spokane
When there's constant, loud, blaring signs warning that disruption for enough work will drive our choice away.

Rating: If you're feeling generous, give us more than I.

|                                            | The SDOT bike booklet needs to be updated, Pronto still on there. Bike lanes that are not maintained to a high standard become unusable. Bikes will then have to enter car traffic when cars don't expect because there appears to be a bike lane. Keep working it. What you do matters. We are all going to get there  
I echo the comment that if you slow down cars on one street, i.e. 15th, cars will bail onto side streets, i.e. 14th, and they often won't be going residential speeds.  
Love Flip Your Trip/got to get people out of their car. There's a world out there you can't enjoy from your mobile metal coffin. |

</tr>
<tr>
<td>Oregon and 15th Ave S</td>
<td>When there's construction ahead, place signs about disruption far enough ahead that drivers can choose another route. If you're feeling generous, give me more than one warning. I've seen countless instances over the past 20 years of only finding &quot;workers ahead&quot; once I'm already seeing them at work. It feels like a major &quot;screw you driver&quot; from the city - ALL THE TIME. I have never seen effective detour and closure signage here. I've recommended it endlessly. Stop making it all about bikes. I had a bad accident: it's not an option for me. Incidentally, the light at Oregon doesn't change until I've driven a little into the crosswalk. The light on Spokane and 15th doesn't register my little Prius to prompt N.S. light unless I rock up and track multiple times. I have the same problem on Columbian seeking to cross MLK. I've sat through tree rotations (N-S lights go through their cycle, then do it again, without ever prompting the light I want) We need more frequent buses if they're to be our only option. Never again put bus stops where traffic can't drive past. Tried to find on map but couldn't. There's one ridiculous stop opposite Red Apple and another for Jeff, the peninsulas do nothing but stop traffic. Have you considered smaller shuttle buses to light rail stops? You need to pay attention to how to how the tree canopy obscures signage. School zone signs are often behind trees. Intersections only have one sign instead of four, and they are usually behind trees</td>

Presentation overview

- Project purpose
- Project elements and benefits
- Construction
- 15th Ave S and S Columbian Way
- Q&A

Project purpose

Each year, we pave arterial streets in poor condition to make them safer and smoother and to extend their useful life.

In 2020, we’ll repave:

- About 1 mile of 15th Ave S between S Spokane St and S Angeline St
- A section of S Spokane St between S Columbian Way and 18th Ave S

We’ll also make changes to the intersection of 15th Ave S and S Columbian Way.
Project elements and benefits

Paving and improvements:
- New pavement
- Drainage improvements
- Upgraded pedestrian push buttons
- New ADA-compliant curb ramps
- Improved and updated sidewalks, where needed
- Leading pedestrian intervals at crossing
- Pedestrian improvement at 15th Ave S and S Spokane St

Construction

What to expect during construction:
- Noise, dust, vibration, and large equipment
- Traffic lanes and sidewalks reduced or detoured
- Driveways may be temporarily blocked but business access will be maintained
- Temporary intersection closures

Ways we minimize impacts:
- Project hotline and email
- Advance notice through email updates and other promotions
- Ensuring clear and effective detour and closure signage
- Up-to-date website
Construction schedule

15th Ave S and S Columbian Way

Over the last two years, we’ve engaged with neighbors and businesses to develop an intersection design that fits the needs of everyone.

Based on feedback we heard, we developed a new proposed concept for the 15th Ave S and S Columbian Way intersection.

What we heard:

- Keep pedestrians safe
- Retain the traffic signal at the intersection of 15th Ave S and S Oregon St
- Use space for traffic improvement, not landscaping
- Business parking along 15th Ave S should be maintained
- Maintain traffic operations
- Provide safety and accessibility benefits for people walking, biking, driving, and rolling
15th Ave S and S Columbian Way

Elements:
- Crossing and signal consolidation, plus revised peninsula design, make travel safer for people walking
- Allowing a left turn from S Oregon St to 15th Ave S offers better navigation for people driving
- New bus stop increases convenient access for students, residents, and customers of local businesses
- Protected bike lanes make riding safer for people biking, and connection to greenway makes travel easier
- New curb bulbs improve accessibility for people with mobility challenges

Q&A

Appendix 1.6

Q&A comments
· What you wanted to hear, not what you heard.
· Construction not during school seasons (~ we will look at contract specifics).
· Slow traffic concerns not communicated.
· Don’t want plaza. > on what we heard.
· Keep left turn.
· Speeding tickets. > Does slow down / works.
· Desire for 30mph. No Parking on Oregon.
· 15th Ave N & Spokane – need no left turn on Spokane.
· Improvements needed on 15th & Spokane.
· Were bus lanes considered on SE 15th, North & South of Oregon SE?

Will there be improvements to S. Spokane. Nice to add pool improvements. Y/G. Connections to Chief Spokane Trail.
· Total number of people giving feedback: 6.
· No park-and-ride.
· People keeping left hand turn line red. Need a more visible / clearer sign.
· Pedestrian safety improvements.
· 15th and Spokane intersection feels dangerous (signage, too slow). No sidewalk.
· What are you doing to mitigate traffic on side streets.
· Signage more clear from distance, avoid in advance.
· 15th and Spokane – violating left turns need fixes (U-turns at Court).
· SPS on NE 6th Parkway (hard to access SPS). Need a bike lane (west side of 15th Street).
· No way to cross Slip lane at 15th & Spokane.
· MacPherson concerns about delivery trucks making turn.
· His load zone went be impacted.

· Will you maintain same lane exits? – Yes. 12.4.
· Worry about signal timing, and conflicts with buses and kids.
· Need to observe parent pick up.
· Traffic backups from I-5 (turning at lights).
· How far away 15th is JENSON (Run-up).
· Current intersection (about)
· If this step is made, the bus stop / school needed.
· Will there be a personal contact to hold you accountable?
· Need to address how to get back into our neighborhood?

<th>Question/comment</th>
<th>Response in the room</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;This&quot; (what was presented by SDOT) &quot;is what you wanted to hear, not what you heard&quot;</td>
<td></td>
</tr>
<tr>
<td>Will construction impact school, when it starts in the fall?</td>
<td>There are ways to minimize those impacts. SDOT can make contract specifications about the phase of work.</td>
</tr>
<tr>
<td>These are things that were said in earlier rounds of community meetings and feedback that are not reflected in SDOT's presentation: volume of traffic; there should be no plaza; keep the left turn from Oregon. Instead of hearing, you're just telling us what you're doing in a gracious way.</td>
<td>1. For safety reasons, the city does not want traffic moving at high speeds through the area 2. There is no plaza in the new design. 3. The left turn was maintained.</td>
</tr>
<tr>
<td>Representing the school traffic safety committee: There have been hundreds of speeding tickets issued in the area near the school. We want cars to be slowed in the area, to help protect children.</td>
<td></td>
</tr>
<tr>
<td>At Oregon and 15th, where the new apartment building is, there is no 30-foot &quot;no parking&quot; buffer approaching the corner. Cars get backed up or stuck trying to approach or leave the curb, and pedestrians can't see around the parked cars. Can a 30-foot &quot;no parking&quot; sign be added there?</td>
<td></td>
</tr>
<tr>
<td>At 15th and Spokane, going north, there should be a &quot;no left turn&quot; sign for cars attempting to go west on Spokane.</td>
<td></td>
</tr>
<tr>
<td>Improvements needed @ 15th/Snoqualmie</td>
<td></td>
</tr>
<tr>
<td>Were bus lanes considered on SB 15th, north + south of Oregon St?</td>
<td></td>
</tr>
<tr>
<td>Some of the lanes seem to be up to 14 feet wide -- too wide, like lanes on the highway. Will the lane widths be maintained in this project?</td>
<td>The widest lanes as part of this project will likely be 12 feet.</td>
</tr>
<tr>
<td>Have concerns about safety when it comes to the signals, and the timing of signals. Buses have trouble moving through the area, and they should be able to get where they're going.</td>
<td>We are working on the signal timing so that kids are safe. We met with the Mercer principal, who suggested that SDOT do a site visit after school, to see how kids move through the area.</td>
</tr>
</tbody>
</table>
Parents bringing their kids to and from school are having a difficult time. You should observe after-school pick-up.

Consider I-5 traffic coming into the neighborhood. Buses can't get proceed and are blocking intersections. Take that into consideration with the timing of signals.

How much of 15th will have the 25 mph speed limit? We will get back to you on that.

The existing intersection is confusing. I liked the previous design, but I'm OK with this one. I want 15th Ave S to be slower. If the bus stop is moved, will a student be able to get across from west to east? There should be good sequencing of the pedestrian signals so that people aren't stuck on the peninsula for long.

Is there someone we can contact directly? Who is the personal contact to hold SDOT accountable? You can call our project hotline and email our project email. Adonis Duckworth is the SDOT lead to the public.

The design helps with getting out of the neighborhood, but you need to address how we're going to get back in to the neighborhood.

There will be no westbound left turn from Columbian.

Will there be improvements at S Snoqualmie St for pedestrians? Cars are coming that way to get back into the neighborhood. We hear feedback about that.

On Dakota, on the west side of 15th, there is a problem with parking related to the alley. There should be no parking there.

The crossing at Snoqualmie needs attention. It's a connection to the Chief Seattle Trail and a major pedestrian access point. There is also a hill there, that reduces visibility for pedestrians and drivers, as well as a slight turn in the road. There should be pedestrian safety improvements there. We appreciate the safety improvements to help slow things down at the 15th and Columbian intersection, but more work is needed at Snoqualmie.
<table>
<thead>
<tr>
<th>People leaving the VA are turning left illegally, from Columbian onto Oregon. There needs to be better signage to prevent that. Work with the people at the VA to ensure visitors know how to get back from the VA onto I-5 safely.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Concerns about the 15th and Spokane intersection: The slip lane from northbound 15th onto eastbound Spokane is dangerous. Drivers have limited vision of oncoming traffic and can't slow down in time. Maybe there should be better signage and a stop sign.</td>
</tr>
<tr>
<td>When you slow down traffic on 15th and on Columbian, consider how people will divert to side streets.</td>
</tr>
<tr>
<td>If you are changing the lane channelization, make sure the signage is clear and back far enough along the road so that people can anticipate what they need to do. People aren’t warned soon enough before they get to the school zone. Signage should be more clear, more abundant, and in advance [on 15th Ave S].</td>
</tr>
<tr>
<td>At 15th and Spokane, drivers are violating a no-left-turns sign that is there. They cut onto 14th and do a U-turn at Court. This should be prevented.</td>
</tr>
<tr>
<td>There is a Safe Route to School with rapid flashing beacon at 16th and Jefferson Park, but it’s hard to access as a pedestrian because there is a lack of sidewalks.</td>
</tr>
<tr>
<td>There is no crosswalk for pedestrians across the slip lane at 15th and Spokane.</td>
</tr>
<tr>
<td>Were bus lanes considered going south on 15th? Traffic gets slowed down because cars can't go around the buses.</td>
</tr>
<tr>
<td>The owner of MacPherson's is concerned about his loading zones and delivery trucks being able to access the business.</td>
</tr>
<tr>
<td>We are putting in a curb bulb there, so people won't fly up to the crossing. We can look into the visibility issue.</td>
</tr>
<tr>
<td>We are adding a sidewalk and handrail in that area.</td>
</tr>
<tr>
<td>The road there is still wide enough for a bus to pull over and a car to go around.</td>
</tr>
<tr>
<td>The MacPherson's load zone will not be impacted.</td>
</tr>
<tr>
<td>On Columbian, going northbound, there is tree overgrowth that obscures the flashing signs near the school. Can that be trimmed and maintained?</td>
</tr>
<tr>
<td>Representing Beacon Hill Safe Streets: Make the Spokane and 15th intersection as safe as you can.</td>
</tr>

Appendix 1.7

Fact sheet
15TH AVE S IMPROVEMENTS PROJECT

February 2020

PROJECT DESCRIPTION
Each year, we pave arterial streets in poor condition to make them safer and smoother and to extend their useful life. Keeping our transportation system in a state of good repair helps lower the cost of future maintenance. In 2020, we'll repave about 1 mile of 15th Ave S between S Spokane St and S Angeline St and a section of S Spokane St between S Columbian Way and 18th Ave S.

The project also makes changes to the intersection of 15th Ave S and S Columbian Way. It adds protections for people biking, improved signals for people walking or rolling, and a bus stop. This design has minimal impacts to on-street parking and retains a signal for those accessing 15th Ave S from S Oregon St. A new pedestrian-friendly peninsula will be created where Oregon St crosses Columbian Way.

WHAT'S HAPPENING NOW?

- We’re reaching out to neighbors to let them know that this project is moving forward and construction will begin this year. Please sign up for our emails to receive ongoing information about this project on our website.

- The intersection update and paving are scheduled to begin construction as early as fall 2020.

CONSTRUCTION SCHEDULE
Dates are subject to change.

EARLY 2020 Finish design
EARLY- TO MID-2020 Pre-construction coordination with community
FALL 2020 Begin construction
2021 Complete construction

PROJECT INFORMATION AND CONTACT

Seattle Department of Transportation
MOVE SEATTLE

47
PROJECT BENEFITS
- Roadway improvements
- Sidewalk repairs
- New, visible lane markings
- Increased safety at the intersection for students and other people walking, rolling and biking
- Simplified intersection for drivers
- Improved transit stops

FUNDING
Funding comes from the 2015 voter-approved, nine-year Levy to Move Seattle, which provides funding to improve safety for all travelers, maintain streets and bridges, and invest in reliable, affordable travel options for a growing city.

This project also is receiving funding from SDOT’s Safe Routes to School program, which makes it easier and safer for students to walk and bike in Seattle, as well as funding from our paving program.

INTERSECTION DESIGN

15th Ave S and S Columbian Way intersection. This design has minimal impacts to on-street parking and retains a signal for those accessing 15th Ave S from S Oregon St.
