

NE 125th St and 28th Ave NE Pedestrian Safety Project

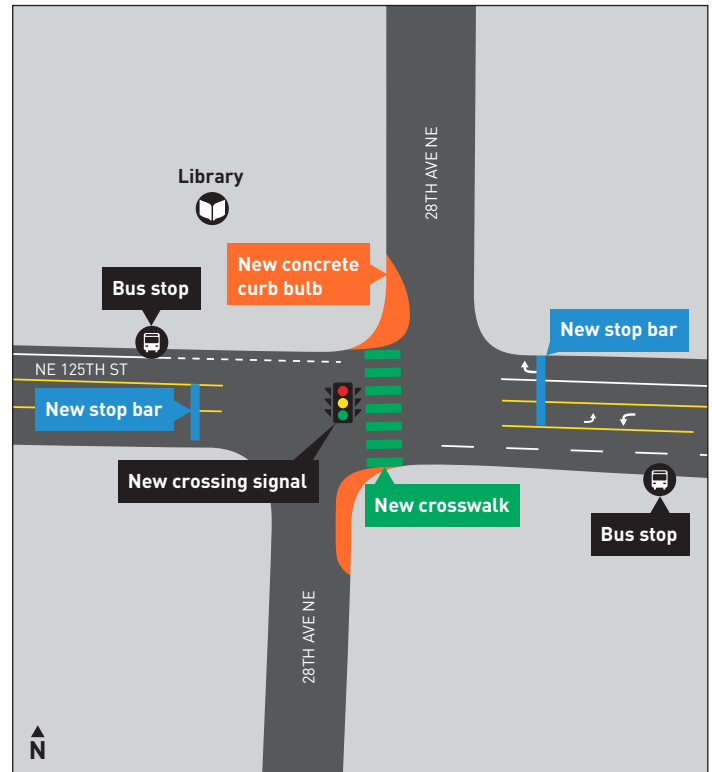

As soon as September 23, construction will begin for the safety improvements at NE 125th St and 28th Ave NE in Lake City. We will be installing new pedestrian-activated signals, painted crosswalks, new curb bulbs and accessible pedestrian ramps. Construction is expected to last 2-3 weeks.

Construction impacts will include:

- Typical work hours between 7 AM and 5 PM, Monday through Friday
- One lane of travel in each direction will be maintained on NE 125th St
- One lane of travel will be maintained on 28th Ave NE with a flagger
- Detours for intersection and street closures may be needed
- Temporary parking restrictions
- Temporary pedestrian and bike detours around the work zone and staging area
- Temporary driveway restrictions. We'll notify you individually if you'll be impacted
- Access to businesses and homes will be maintained at all times
- Typical construction noise, dust, and vibrations

Project Benefits:

- Improve the safety of the intersection for pedestrians
- Better accessibility for people using mobility devices, riding bikes, or pushing strollers
- Increased visibility of bus riders

Note the addition of a new curb bulbs on the northwest & southeast corner of 28th and 125th. This adds to the safety of the intersection by shortening the crossing distance and increasing the visibility of people waiting to cross the intersection.
