

APPLICATION 2019-180

Q2 Please provide your zip code

98103

Q3 Project Title: Please provide a title for your project that describes it well.

traffic calming

Q4 Project Location: Please describe the location of your proposed project with as much detail as possible so that someone can find it easily. Include the nearest cross street if possible.

Interlake Ave N, between 40th and 39th

Q5 Problem Statement: Please explain why you are proposing this project. Please give as much detail as possible by describing your experience at the specific location.

Cars speed in this block, especially when trying to avoid a red light at 40th and Stone Way. This increased with the garage entrance for Prescott apts being located on 39th off Stone, and the increasing population density in the area. This has endangered pets, children, cyclists, and seniors in the neighborhood. There have been incidents of hit and run with parked cars when cars zoom through, turn around in driveways, or when it snows.

Neighborhood Street Fund Application for 2019 – 2021 Program Cycle

Q6 Solution Statement: What improvements would you like to see at this location? Please note that SDOT staff often need to modify proposed improvements to meet city regulations or adapt to site conditions. See Frequently Asked Questions for more info.

Two or three traffic "humps" (not the shorter, more jarring speed bumps) would significantly reduce the problem. Interlake has become an alternative route for bicyclists and humps will slow down traffic without affecting parking or bicyclists.

Q7 Additional Information *Optional (attachment 1):
Please use this space to add additional photos, graphics, designs, or information. Note that while additional information is not mandatory, it does help us and the community better understand the purpose of your proposal and the general concept of your suggested improvements.
