

Greenwood Ave N Paving and Pedestrian Safety Project

Starting as soon as April 8th, we will begin repaving Greenwood Ave N between N 136th St to N 145th St. This is the final phase of this safety improvement project that we've been working on since last fall. We'll start with replacing full depth asphalt near the curb and gutter, then mill the top layer of the roadway, and finish with the overlay of asphalt on top. Final channelization will occur 21 days after the overlay as the asphalt needs to cure before application of the markings. This work is expected to last 4-6 weeks and is weather dependent.

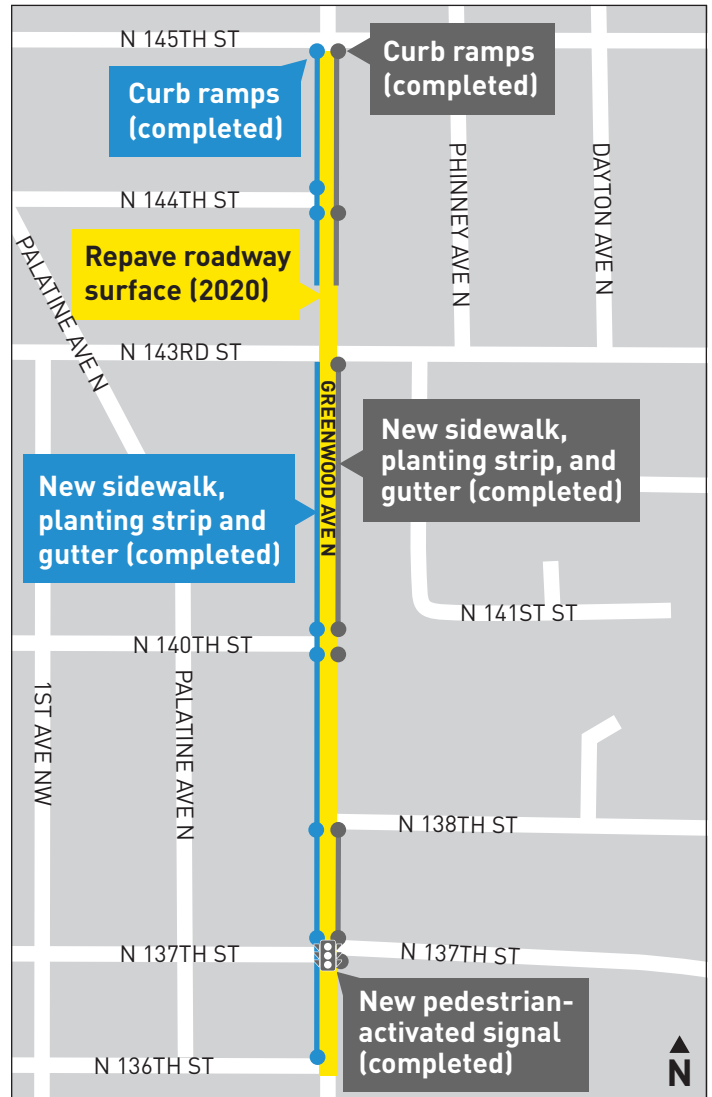

Here's what you can expect during construction:

- Construction noise, dust, and vibration
- On-street parking restrictions near work zones
- Periodic traffic detours to nearby arterials
- Vehicle lane shifts around work zones
- Detours around the work zone for people walking and biking. (All sidewalks will be open except when asphalt is placed on the cross streets at 143rd, 137th, & 136th)
- Partial street closures, often near intersections
- One lane of traffic in each direction will be maintained as often as feasible
- Restricted access to residential driveways; advance notice will be provided
- Flaggers to help direct traffic
- Equipment, trucks, and crews in the area

We've been working since last fall on these improvements:

- Stormwater drainage system work between 136th - 145th
- Rock retaining wall near 137th
- Sidewalks installed on the west side of Greenwood between 136th - 145th
- Planting strip landscaping

Thank you for your patience as we work to complete these safety improvements in your neighborhood.

This project is funded by the 9-year Levy to Move Seattle, approved by voters in 2015. Learn more about the levy at www.seattle.gov/LevytoMoveSeattle.
