WHAT WE HAVE HEARD

Safety, access and mobility improvements are needed on streets and at intersections throughout the study area.

Members of the community have already highlighted some locations where improvements are needed. We also want to hear from you!

Please add notes, locations and/or additional improvements to the map.

Safety, access and mobility improvements are needed on streets and at intersections throughout the study area.

Members of the community have already highlighted some locations where improvements are needed. We also want to hear from you!

Please add notes, locations and/or additional improvements to the map.

- "Mobility for aged citizens, young children walking to school or riding their bikes, is a huge issue."
- "Sidewalks are in bad shape in our neighborhood!"
- "Speed is an issue leading up to Beacon Hill."
- "Please reach out to teenagers and get their opinions."
- "We need more public transit in Beacon Hill, especially those of us that live one mile or more from the light rail station."

Traffic speed concerns - safety concerns for people walking & biking
- Improve N-S bike routes and facilities
- E-W bike routes needed (specific alignments TBD)
- Improve pedestrian lighting

Intersections feel dangerous to people walking, crossing and/or biking
- Poor sidewalk conditions (paving, overgrown vegetation, curb ramps, etc.)
- Station Area Focus - See separate map
- Comments from community members
