### Service Citywide:

Recycling service for single family households occurs every other week on the same day as garbage collection service. Beginning January 2005, for all materials except plastics, there is a recycling requirement which bans recyclables from being disposed of in garbage containers. Beginning January 2006, the recycling requirement is being enforced by not collecting garbage cans or dumpsters which contain more than 10% recyclables. Apartment managers are subject to a fine for repeated violation of the ban on recyclables in garbage dumpsters. Exemptions are granted when there is lack of space for recycle containers.

Apartment Buildings with 5 or more units (households) are considered part of the Multi Family Recycling Program for purposes of tracking services. Apartment buildings can choose cart or dumpster style service.

The Business Recycling Program is available to businesses with a Seattle commercial garbage account and is limited to two recycling carts, collected every other week. The Business Recycling Program is free to qualifying businesses.

### Materials Citywide:

Newspaper, mixed paper, glass, aluminum, tin, plastic bottles, ferrous metals, plastic bags (grocery bags), plastic containers (dairy/yogurt containers), milk cartons and juice boxes. In addition, up to 2 gallons of used motor oil may be set out in separate 1 gallon containers each collection day. Electronics and appliances will be picked up curbside and recycled safely upon request for a fee. (\$20 per pickup of up to 3 electronic items, \$30 per appliance, \$38 per appliance containing CFC's)

### **Avg. Cost/Ton for Q1 2020: \$293.70**

*(Payment to contractors falls when market prices for recyclable materials increase.)*

<sup>1</sup> Figures shown reflect the average amount SPU pays the recycling processing and collection contractors, which is a total contract price plus (or minus) a variable amount determined by market prices. In other words, the figures reflect the cost to the city of collection and sorting (including payment for disposal of contaminants). Revenue received for sale of the materials belongs to the processing contractor and as such these cost figures should not be construed as the total cost of recycling; figures also do not include costs such as liquidated damages, SPU program administration or public education.

<sup>2</sup> As of April 2000 recycling program costs include curbside (single family) apartment (multi-family) and small business programs. Prior to April 2000, the costs shown are only for the curbside program.

<sup>3</sup> Business tonnage after June 2019 excludes the open market contractors' tonnage, which leads to the decrease of the business tonnage.

<sup>4</sup> The contaminant rate is from 2015 survey study.

1. Single Family refers to customers that receive can garbage service. Tonnage data includes contaminants.  
 2. Recycle Composition Studies are done every 5 years. This report captures the most recent study done in 2015. Composition Studies can be found on the web at: <http://www.seattle.gov/util/Documents/Reports/SolidWasteReports/CompositionStudies/index.htm>  
 3. Beginning October 2016, New billing system data and new definition of Single Family premise changed to prems with 4 or fewer dwelling units. Multi Family defined as premises with 5 or more dwelling units.
