
AVOID BEING LOCKED OUT OF UNIFIER

Unifier allows 7 login attempts to provide the correct password/username.

Best Practice: Set up a password recovery Challenge Questions

1. Set up your **Challenge Questions** for password recovery (see Managing Passwords below)
2. After 6 unsuccessful attempts, select the “Forgot Password” link and follow the prompts to select a new password

**Note* The System Administrator can unlock/reset your password but this can take anywhere from 20 minutes to 24 hours.*

MANAGING PASSWORDS & BASIC USER INFORMATION

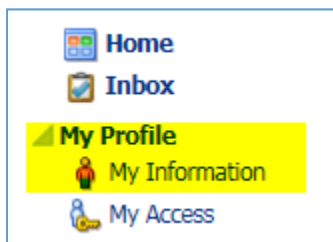

The **Oracle Identity Manger** is a link located on the landing page prior to logging into Unifier.

Click on the Oracle Identity Manger link to change your password, contact info, and password recovery questions:

If prompted for a username and password, enter the same credentials you use for Unifier.

Once you are logged in, using the left navigation pane, click on **My Profile > My Information**

From there, you can edit **Basic User Information**, **Change Password**, and modify **Challenge Questions** (for password recovery). Modify the fields you wish to change and then choose “Apply”.

Important* Please **give the system at least 5 minutes to process your changes before logging in again. Some fields like First Name, Last Name must be approved by the System Administrator.*

For Unifier assistance or questions – contact the CMD System Administrator
