

## UFMP Online Input Summary

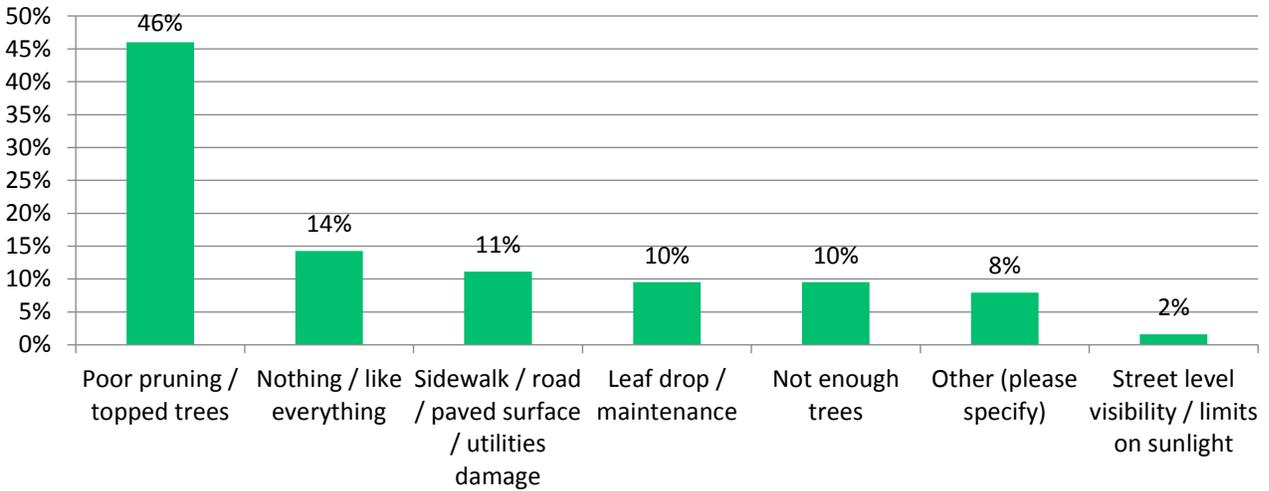

64 respondents

When you look around your Seattle neighborhood (either where you live, study, work, or play) are trees in the area overall improving your quality of life?					
1: no improvement	2	3	4	5: great improvement	Total
0 (0%)	1 (1.6%)	3 (4.8%)	9 (14.5%)	49 (79.03%)	62 responses Average 4.7

Other: relief from concrete & dense buildings, oxygen

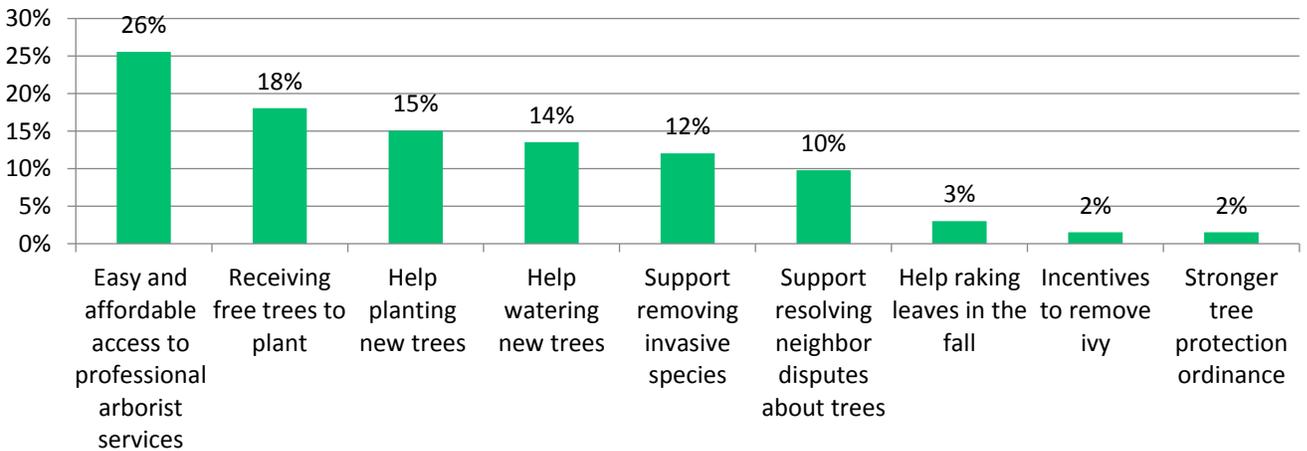

## What do you dislike about trees in your yard or neighborhood?

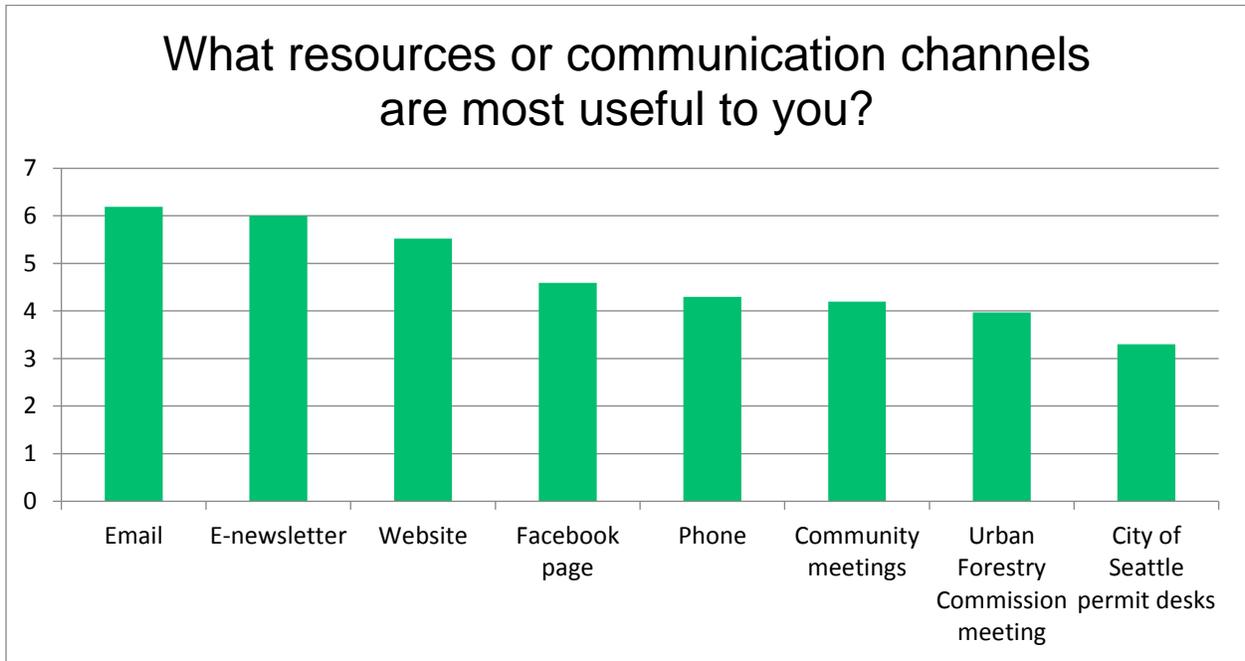

Other: natural areas converted to recreational use, unwatered trees, tree pits instead of open areas to absorb stormwater, invasive species, dropped fruit / nuts

What can the City do to address any tree-related problems or improve the trees in your neighborhood or yard?

## Which of the following would encourage you to preserve existing trees and plant more trees around your home?

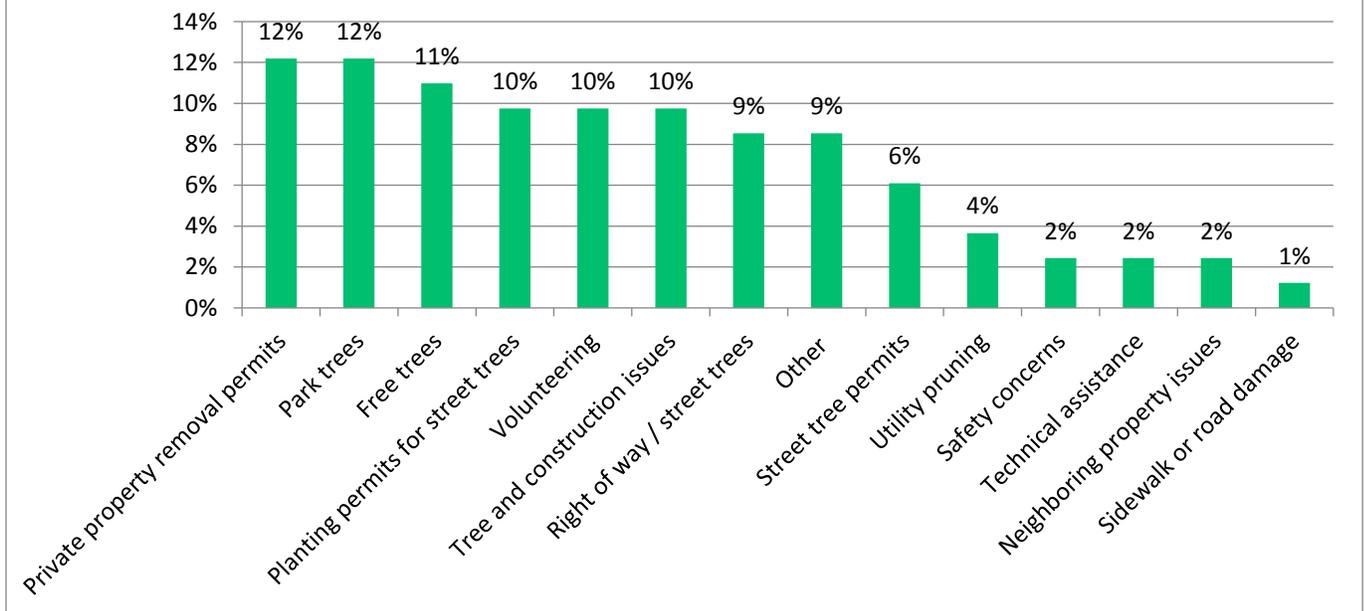

Other: Planting and watering videos, free shrubs / ground cover / grass seeds, protection of trees from vehicles, financial assistance, incentivize retention of trees during development, enable neighborhood clusters of planting, tax breaks, education on value of trees, increase building setbacks, share responsibility for maintenance, water bags, replace nuisance trees with appropriate species, outreach on regulations, free leaf composting

What communications channels to we NOT have available that you wish we did?

- Presentations at community groups and district councils (2)
- Nextdoor (2)
- Ads on metro bus (2)
- Simplified websites - too spread out on many different pages (2)
- Written information available libraries
- YouTube videos of benefits of trees and instructional planting videos
- Text messages
- Meetings easier for working people to attend
- Contact with central coordination of UF-IDT and Core Team
- Designated drop-in information center
- Posting on-site of tree removal prior to work
- Instagram
- Enough Roaming Foresters to actively reach out and engage tree owners and residents adjacent to trees
- ENGAGE tree 'owners' as partners
- Get serious about enforcing the rules against topping trees for a view
- General forum / meeting with SDOT, Urban Forestry Commission, Parks and Trees for Seattle staff together so that folks can ask questions and know contacts within these different city departments/teams

## What was the most recent tree-related issue you contacted any City department about?

Other: GSP, removal of mature conifers, homelessness, Urban Forestry Commission, proposed private property ordinance, private property forest restoration

What has your most recent experience been getting help on tree-related issues from the City?					
1: Terrible	2	3	4	5: Fantastic	Total
6 (16%)	4 (11%)	10 (27%)	7 (19%)	10 (27%)	37 responses Average 3.3

What can the City do to address any tree-related problems or improve the trees in your neighborhood or yard?

<b>Category</b>	<b>Suggestion</b>	<b>Count</b>
<b>Private property ordinance</b>	Improve ordinance to better protect trees from removal	14
	Require replacement when developer planted trees die	1
	Simplify permitting	1
<b>Plant trees</b>	Plant trees	5
	Plant conifers & natives	4
	Expand Trees for Neighborhoods	2
	Plant street trees	2
	Plant more in multi-family zones	1
<b>Outreach / engagement</b>	Educate public about trees	4
	Simplify website	1
	Hold public meetings	1
	Transparency in City urban forestry work	1
	Outreach around existing regulations	1
<b>Power line clearance</b>	Improve power line clearance pruning practices	7
<b>Tree pruning</b>	Address safety hazards of poorly pruned large trees	3
	Improve pruning	1
	Prune for driver / road visibility	1
	Prune for street light blocking	1
	Provide thinning services	1
<b>Street trees</b>	Remove and replace underperforming street trees	2
	Increase use of tree pit coverings / flexi-pave	1
	City ownership of all street trees	1
	Allow volunteer maintenance of traffic circles and planting strips	1
	Retain existing street trees in new development	1
<b>Tree protection</b>	Preserve groves	2
	Protect existing large trees	1
	Post advance notice of tree removal	1
	Maintain existing trees	1
	Help fruit trees at Meridian playground	1
<b>Tree / sidewalk / underground utility conflicts</b>	Protect root zones / proper root pruning	2
	Mark buckled sidewalks to prevent trips	1
	Sidewalk inspections for root buckling	1
	Prioritize trees in sidewalk conflicts – build around trees	1
<b>Tree watering</b>	Water street trees for 5 years	2
	Allow irrigation lines under sidewalks to water trees	1
	Free water for young trees	1
<b>Climate change</b>	Increase resilience to climate change	2
	Plant as a solution to climate change	1
<b>Miscellaneous</b>	Increase canopy goals	1
	Hire more arborists	1
	Require replacements for trees damaged in car accidents	1

<b>Invasive species</b>	Address ivy infested trees on private property to prevent failure	1
	Support volunteers removing invasives	1
<b>Funding</b>	Increase funding for urban forestry	2
<b>Leaf drop</b>	Clear leaves from streets	1
	Clear stormdrains	1

The City has identified the following draft values for our management of Seattle’s urban forest:

1. Ecosystem and human health: maximizing the mental health and human well-being, air quality, water quality, storm water runoff reduction, carbon sequestration, recreation, wildlife habitat, beauty, and other benefits of trees
2. Commitment to equity: including diverse perspectives and equitable distribution of urban forestry resources and programs
3. Community stewardship: engaging the Seattle community, including residents and businesses, in appreciating and caring for the urban forest
4. Tree health, human safety, and property protection: keeping the urban forest healthy using best management practices with a focus on public and crew safety
5. Good governance: working in conjunction with other City and community goals such as transportation, utility provision, and housing

How would you add to or change these draft values?

<b>Category</b>	<b>Suggestion</b>	<b>Count</b>
<b>Development / tree preservation</b>	Protect urban forest from development	8
	Grow urban forest and high density housing together	2
	Preserve existing mature trees	2
	Enforcement / awareness of current tree removal regulations	1
<b>Education</b>	Stronger education / engagement component	3
<b>Climate</b>	Integrate climate moderating effects of trees, impact on energy use, heat island reduction	2
	Plant for longevity to sequester CO2	1
	Add blue carbon (aquatic vegetation) and marine ecosystem protection	1
<b>Governance</b>	More emphasis on good governance actions	2
	Add environmental ethics to the Mayor’s budget proposal	1
	Add fun of climbing trees as kids	1
	Better cooperation between City departments with strong lead with ultimate responsibility	1
<b>Equity</b>	Promote a thriving diversity of people and plants in the urban forest	1
	Equity	1
	Provide City / volunteer help with tree maintenance	1
	Make equity a geographical focus	

<b>Street trees</b>	Remove and replace under-performing trees	1
	Address sidewalk issues	1
	Make sure trees do not cause shadows at night for pedestrian safety	1
<b>Miscellaneous</b>	Don't include tree health, human safety, property protection, or good governance – these are covered by the other values	1
	Wildlife / bird habitat	1
	Add to community: shared responsibility and ownership	1
	Separate tree health and human safety	1
	All current City work is bad	1

What more can the City do to support trees (including on private property or volunteers caring for trees)?

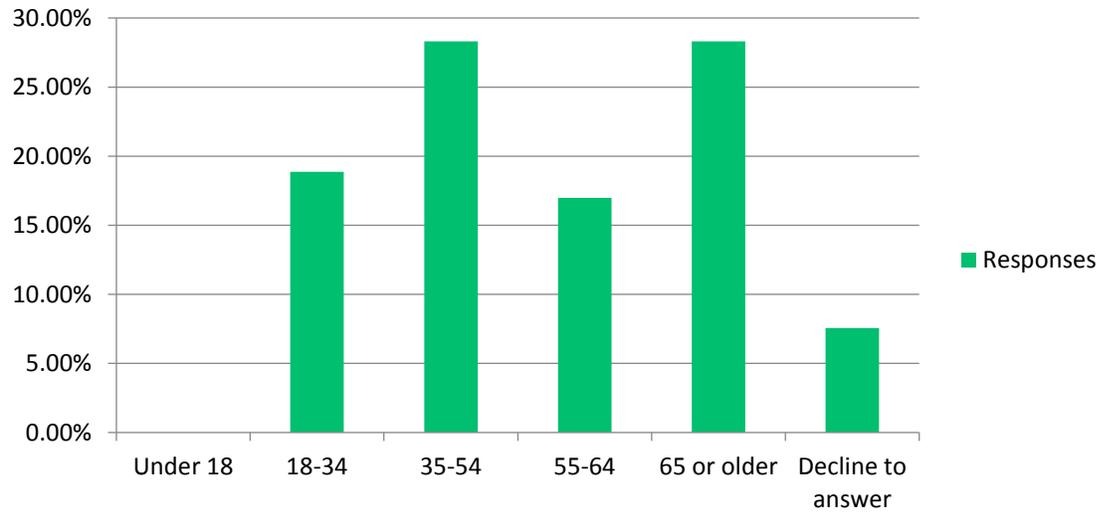

- Improve private property tree protection code (7)
- Educate / promote benefits (7)
- Crowd sourced registration of exceptional trees and groves
- Increase notice of tree removal to 6 weeks instead of 2
- Invest more in watering young trees
- Funding and capacity to monitor health of urban forest
- Funding for major tree pruning or removal on private land
- Provide pathways for youth and volunteers to get tree jobs
- Free native tree seedlings
- Require replacement of trees removed by developers
- Increase funding for tree protection and restoration of forested areas outside of Parks
- Incentive for developers that include planned space for big trees
- Building codes that include trees as part of code; minimum tree requirements
- Educate about tree care and invasive species
- Increase landlord acceptance of trees on their property
- Be more watchful for illegal tree removal on private property
- Don't give any breaks to developers who remove trees
- Require developers to preserve native trees
- Enforce existing regulations, make sure trees are replaced
- Focus regulations on species / health of tree removed and like replacement
- Take an ecology census
- Publicize Trees for Neighborhoods
- Adult ranger programs
- Better sources of information on existing tree codes; less confusing responses from the City to tree preservation questions
- Lower property taxes based on value of trees
- Volunteers to plant on public (parks and SDOT) properties
- More free trees to residents
- Develop conservation corps to remove ivy and invasives; make program available to private property owners

- More financial support for nonprofits that care for public trees
- Encourage developers to plant trees
- Provide more access to tree selection / RTRP advice
- Lower water bills for home owners who care for trees

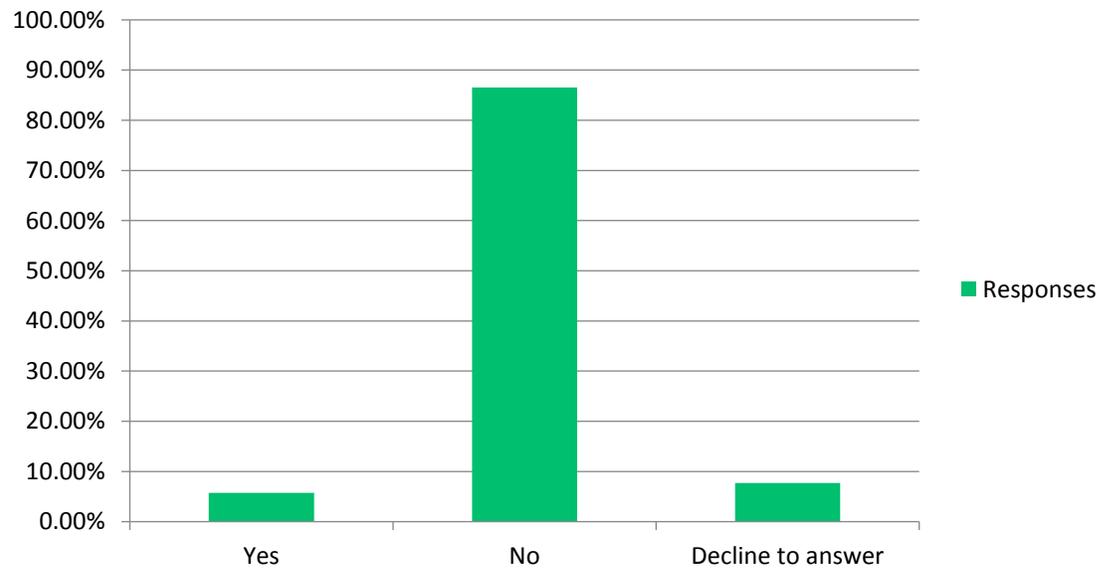

#### Final comments

- Increase canopy goal to 40%
- Charge impact fees to cover cost of adding trees for mitigation and access to nature
- Advocate for planting native trees adapted to changing climate
- Educate homeowners that trees aren't a nuisance
- Put more money behind urban forestry work and increasing equitable benefits from the urban forest
- Celebrate trees in the arboretum
- More street trees
- More mature conifers and native trees
- Look into carbon removal credits to help fund the tree programs
- Requiring replanting is not as good as preventing removal
- Focus on climate change
- Urban forestry is nuanced. One size fits all approaches to tree removal and replacement policies are not practical
- Increase Heritage Tree program and participate more in King County's Million Trees Campaign
- Keep public informed of trees threatened by disease or climate change and how to help
- Trees for Seattle newsletter is great
- Value trees more
- Save trees
- Make it easier to water street trees
- Widen planting strips for street trees; cut sidewalks
- Devote more resources to trees
- Keep street trees away from sidewalks
- Engage all City departments in UFMP update with equal weight
- Prioritize planting evergreens and native trees
- More cooperation between departments
- Convert street space to tree planting space
- Make urban forestry and housing decisions go hand in hand
- Lots of thanks for good work already being done
