

PLANTS of the JAPANESE GARDEN

Acknowledgments

This 2010 Update to the Japanese Garden Plant List Booklet is the result of the efforts and contributions of the following:

Kathleen Smith, long-time volunteer with Unit 86 of the Arboretum Foundation worked with Seattle Parks and Recreation to research the plant collection for the original list and created the Plant List Booklet in 1995 and updated it from 1995 to 2008.

The Plant Committee of Unit 86 of the Arboretum Foundation (Hiroko Aikawa, Maggie Carr, Sue Clark, Gale Hall, Beverly Hughes, Kathy Lantz, chair, and Aleksandra Monk) revised and updated Kathleen Smith's work to create this 2010 Plant List.

Kathleen Blanchard, Seattle Parks and Recreation Head Gardener for the Japanese Garden provided critical information about the changes to the plant collection for this List.

Nat Suyenaga, member of Unit 86 of the Arboretum Foundation designed and drew the 2010 booklet cover.

THE JAPANESE GARDEN

Seattle, Washington

Welcome to the Japanese Garden in the Washington Park Arboretum. Thank you for supporting the Garden through your visit and purchase of this booklet.

The 2010 Plant List Booklet was created to increase your enjoyment and knowledge of the Garden. It lists the plants in the Japanese Garden as of April 1, 2010. The plant collection changes during the year and this booklet will be updated annually to reflect these changes. We hope to make this information available soon on the Japanese Garden Website.

You will find the garden divided into 28 areas which are assigned with letters of the alphabet. The areas are shown on the map on the inside of the back page. The booklet contains two lists. The first list, Japanese Garden Plant List 2010, lists the plants in an area within the garden and can be used as you walk through the garden areas to help identify a plant within a specific area. The second list, the Alphabetical List, can be used when you want to find which area a specific plant is located in the garden.

Seattle Parks and Recreation manages the Garden and the plant collection in partnership with the Japanese Garden Advisory Council and support of Unit 86 Docents of the Arboretum Foundation.
