

Repairs for University Bridge Tower Begin Week of November 2

Project Overview

Crews working for the Seattle Department of Transportation (SDOT) will repair the leaking roof on the southeast tower on the University Bridge. Crews will also repair a water line that runs on the underside of the bridge from the tower to the south end of the bridge.

Construction Schedule

Work is expected to begin as soon as November 2, and last approximately 2-3 weeks, weather permitting.

WHAT TO EXPECT DURING CONSTRUCTION

- Construction will occur on the southeast portion of the University Bridge, between the southeast tower and Fuhrman Ave E
- Daytime construction activities: between 7 AM and 3 PM
- One northbound vehicle lane will be closed during non-peak hours (9 AM to 2:30 PM)
- Northbound bike lane will be closed; Northbound bicyclists will share east walkway
- Pedestrian access on the east walkway will be maintained
- Potentially noisy work may occur, including saw cutting and backup alarms required for safety
