

## 2nd Ave protected bike lane upgrades coming soon

### Upgrades include:

- **Planter boxes**—Changing out many of the white plastic posts for planters in the bike lane buffer to beautify the corridor and help clarify where the bike lane and the travel lane/parking lanes are
- **New traffic signals**—Spanning the traffic signals across the travel lanes to make the signals more obvious to people walking, biking and driving
- **Protected bike lane extension**—Extending the protected bike lane one block south to Washington St and adding sharrows and a climbing lane on Washington St to 5th Avenue
- **Raised passenger loading zones and driveway**—Adding raised passenger load zones at the Marriott Hotel on 2nd and Cherry and The Metropolitan Grill on 2nd and Marion; and raised driveways at Benaroya Hall on 2nd and Union and the parking garage on 2nd Ave north of Union. Raising the area alerts people walking, biking and driving to a change to help make sure all travelers are looking out for each other

### TIMELINE

Construction is planned to begin late March and continue through mid-April.

The work is expected to be mostly complete by May Bike Everywhere Month.

### DURING CONSTRUCTION

- Parking adjacent to the construction and on the block north of construction will be restricted to allow for a smooth transition for people biking south into the general purpose travel lane as a detour
- People biking north will be detoured onto 3rd Ave at Yesler Way for about two weeks
- No impacts to general purpose travel lanes are expected

Future raised driveway at Benaroya Hall

Future planters and protected bike lane extension to Washington St
