- Plaza structural steel is complete.
- Plaza metal deck installed.
- Plaza concrete poured.
- Header piping for additional geo-wells complete.
- Install begins for concrete masonry walls for mechanical rooms beneath plaza.
- Rebar placed on plaza for planters and drainage.

STATION INTERIOR

- Elevator shaft-wall framing starts.
- Welding complete for structural steel running east to west on the first floor just north of waiting room.

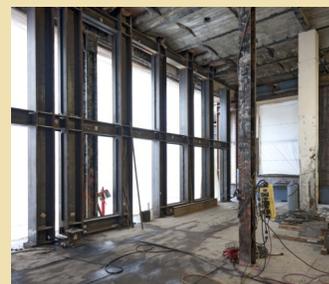

DEC./JAN. 2010

A long arm pours concrete for the plaza.

In December the plaza was covered and a concrete deck was poured.

Thick steel to resist quake damage.

UPCOMING WORK

- Complete structural steel welds.
- Waterproof concrete plaza deck.
- Begin elevator install.
- Start interior wall framing.
- Finish concrete masonry walls.

2nd floor elevator shaft & plaza planters.
