

WHAT'S NEXT: FALL 2015 PROJECT UPDATE

- Seattle Public Utilities (SPU) is completing the preliminary design (planning) phase of the project.
- SPU plans to complete preliminary design (planning) in spring 2016, and staff will be recommending that a specific planning concept be moved into the design phase.
- The staff level proposed project will:
 1. Replace the culvert under Rainier Ave. South.
 2. Remove fish passage barriers.
 3. Improve surrounding habitat.
- As opportunities allow, SPU will address storm-related flooding and sediment deposition at the mouth of the creek in Lake Washington.
- Stay tuned for updates on project milestones and opportunities for input.

WHAT IS THE LOWER TAYLOR CREEK RESTORATION PROJECT?

The project will:

- Improve the stream channel and surrounding habitat.
- Improve fish passage between Lake Washington and Deadhorse Canyon.
- Replace the culvert under Rainier Avenue South.
- Address storm-related flooding and sediment deposition at the mouth of the creek to the extent possible.
- Provide public access at the site once construction is complete.

Seattle Public Utilities (SPU) purchased property at the lower reaches of Taylor Creek, located near the south end of Lake Washington in southeast Seattle.

WHERE IS THE PROPOSED PROJECT?

This provided an opportunity for SPU to increase the quality and quantity of Taylor Creek and Lake Washington shoreline habitat, particularly for threatened juvenile Chinook salmon.

WHO DOES THIS PROJECT IMPACT?

Through an intensive public process, Lower Taylor Creek residents and stakeholders shared their thoughts on the proposed concepts during the preliminary design (planning) phase. SPU presented three planning concepts, each with a different creek alignment, and asked community members to provide input on the concepts. The concept shown above received the most support of the three concepts presented. This concept minimizes work in Lakeridge Park and keeps most of the creek within public right-of-way and on City-owned parcels.

PROJECT SCHEDULE (TENTATIVE)

STAY IN TOUCH

We are available to provide whatever information you need to stay informed about this project and its impacts on you and your neighborhood.
