

EMERGENCY WESTERN AVENUE WATER MAIN REPLACEMENT PROJECT

Construction update for March 18 to 24

PROJECT DESCRIPTION:

Seattle Public Utilities (SPU) has replaced a 20-inch water main along Western Avenue between Yesler Way and Spring Street that was at risk of failure.

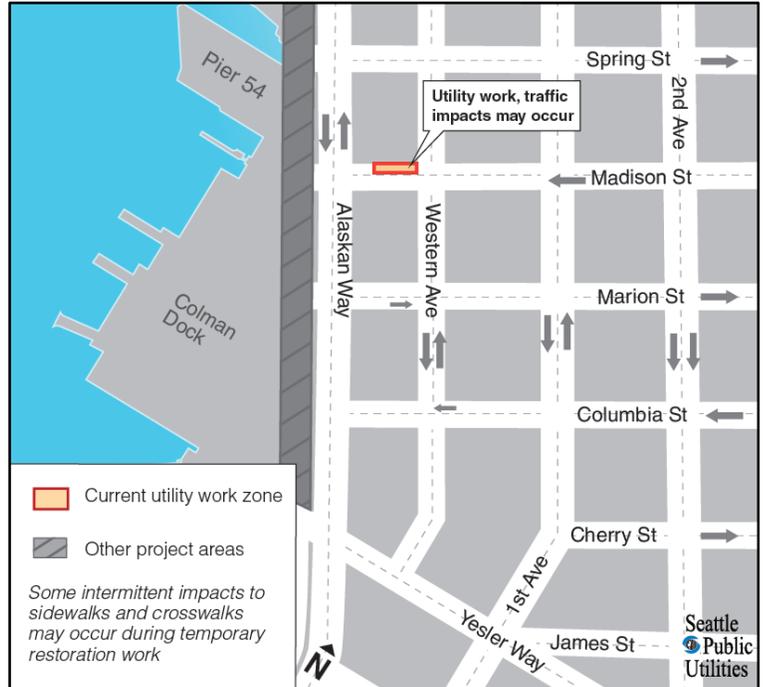

The new water main has been installed and crews are completing utility work and temporary sidewalk and roadway restoration. Final restoration will occur at a later date. You will receive notice before final roadway restoration begins.

TEMPORARY RESTORATION ACTIVITIES

- Work will occur Monday through Saturday during daytime hours, 7 a.m. – 3 p.m.
- Work will include grading sidewalks for safety and striping crosswalks. Permanent sidewalks will be installed with final roadway restoration at a later date.
- Utility work will occur at the intersection of Madison Street and Western Avenue. There may be temporary traffic restrictions during daytime hours.
- Daytime noise is expected in the work zone.

ACCESS AND PARKING

- Parking on Western Avenue between Spring Street and Yesler Way will be restored next week.
- Possible daytime traffic restrictions may occur at Madison Street and Western Avenue for utility work.
- Pedestrian access will be maintained with some intermittent impacts to sidewalks and crosswalks for restoration and striping.

Map denotes construction activities March 18 to 24.

Restored crosswalks on Western Avenue.
