

SPU North Henderson CSO Reduction  
**Assign Relative Value Weight**

Team \_\_\_\_\_

**Instructions - Weight the relative performance of criteria by distributing 100 points among the criteria, and then distributing the criterion points among the sub-criteria**

	Criteria Weight	Sub-Criteria Weights (portion of the criterion weight)
A. Increase open space in the neighborhood		
B. Provides environmental benefit or limits impact to the environment		
b1). Provide comprehensive solution to all environmental needs (i.e. stormwater treatment and CSO)		
b2). Create other environmental benefit (beyond water quality) or limit environmental impact		
b3). Preserve tree quantity and quality		
C. Limit short-term construction impacts		
c1). Disproportionate short-term impacts to property owners (noise, odor, visual, access to property)		
c2). Short-term neighborhood traffic impacts including LW Boulevard		
c3). Short-term park impacts		
D. Preserve homes and private property		
E. Preserve Park use and character of design		
e1). Preserve use of Martha Washington Park and character of park design		
e2). Preserve use of Seward Park and character of park design		
e3). Preserve use of Lake Washington Blvd. and character of park design		
F. Limit impact from operation and maintenance (noise, odor, traffic, duration and frequency of maintenance and operation, scale of equipment)		

**Criteria Weights Must add to:** 100
