

DELDRIDGE BASIN SEWER SYSTEM IMPROVEMENTS

Project Overview

- Seattle Public Utilities (SPU) operates two Combined Sewer Overflow (CSO) storage tanks in the Delridge neighborhood (CSO 2 and CSO 3).
- The existing storage tanks are inefficient and prone to clogging that can result in larger and more frequent overflows of untreated stormwater and sewage into Longfellow Creek.
- These improvements will reduce the frequency and volume of untreated overflows into Longfellow Creek, as well as reduce facility maintenance costs.

Pre-Construction Drop-in Sessions

Construction of improvements at CSO 2 and CSO 3 is scheduled to begin in early 2015. Join us at two informal drop-in sessions to:

- Find out what to expect during construction
- Learn more about the planned improvements
- Chat one-on-one with the project team

Saturday, January 31

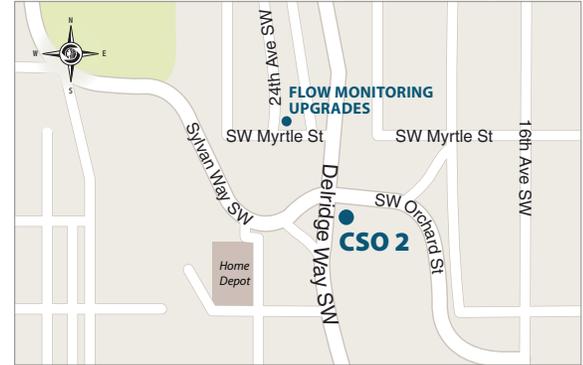

CSO 2: 10:30 a.m. – Noon

Intersection of Delridge Way SW and SW Orchard St.

CSO 3: 1 – 2:30 p.m.

Intersection of SW Barton Place and SW Henderson St.

Project Areas

DELRIDGE BASIN SEWER SYSTEM IMPROVEMENTS

Construction is beginning in early 2015

SPU will begin construction in early 2015 on two sewer improvement projects in your neighborhood. Come learn more about the work.

Pre-Construction Drop-in Sessions: Saturday, January 31, 2015

CSO 2 Drop-in Session

10:30 a.m. – Noon

Intersection of Delridge Way SW and SW Orchard St.

CSO 3 Drop-in Session

1 – 2:30 p.m.

Intersection of SW Barton Place and SW Henderson St.
