**PHASE I ENVIRONMENTAL SITE ASSESSMENT
PORT OF SEATTLE “WEST YARD” AT TERMINAL 91
FOR
THE PORT OF SEATTLE**

NOVEMBER 2, 2011

1.0 EXECUTIVE SUMMARY

Pinnacle GeoSciences, Inc. completed a Phase I ESA (Environmental Site Assessment) of a property known as the T91 West Yard, located directly to the west of the waterway bordering Pier 91, south of the Magnolia Bridge at Terminal 91, and including the Port of Seattle’s Smith Cove Park at Terminal 91, a small viewpoint occupying the waterfront area south of the West Yard. The property is a 4.5 acre area that is given King County parcel numbers 7666201146 and 7666201516 and an address of 2001 West Garfield Street in Seattle; however, these are the parcel numbers and address for a large portion of the Terminal 91 property, and not specific to the West Yard.

Our services included a Phase I ESA in accordance with ASTM E 1527-05 “*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.*” Pinnacle GeoSciences subcontracted the search of federal and state site inventory lists to Environmental Data Resources, Inc. (EDR).

Our research of historical and contemporary sources of uses of the property, along with site visits and interviews, did not identify any *Recognized Environmental Conditions* on the subject property. *Recognized Environmental Conditions* were identified on the City of Seattle property located to the west of the subject site, across 23rd Avenue West. Two *de minimis* conditions were identified on the subject property, both related to fill at the property. This summary is presented solely for introductory purposes, and is intended for use in conjunction with the full text of this report.

2.0 INTRODUCTION

2.1 PURPOSE

The Phase I ESA (Environmental Site Assessment) was conducted in general accordance with ASTM standards and the EPA's standard: 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries." This report uses the ASTM E-1527-05 standard for Phase I Environmental Site Assessments as a format for reporting, which is consistent with the requirements and recommendations of the EPA 40 CFR Part 312 rule.

The purpose of this Phase I ESA is to meet the requirements of the EPA's "All Appropriate Inquiry" rule by evaluating "*Recognized Environmental Conditions*" in accordance with established standards. The term "*Recognized Environmental Conditions*" is defined by ASTM as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products in structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or to the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. It is intended to allow a user to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) 42.U.S.C. §9601 and in Washington State's MTCA (the Model Toxics Control Act).

The determination of "*Recognized Environmental Conditions*" is meant to be used as a reasonable inquiry for a commercial property transaction, whether or not there is actual or potential CERCLA liability.

2.2 SCOPE OF SERVICES

ASTM has published a standard described in ASTM E 1527-05 "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.*" Our Phase I scope of service and report format are intended to generally conform to this standard. The study considers commonly known and reasonably ascertainable information. Our specific scope of services was as follows.

Records Review

1. Review current 7.5 Minute and historical USGS topographic maps to identify the physical setting and development history of the property. Review readily available maps or other public information sources pertaining to geologic,

hydrogeologic, hydrologic, and topographic conditions at and in the vicinity of the site.

2. Review readily available geotechnical reports, environmental reports, or other relevant documents pertaining to environmental conditions at the subject site and adjacent properties.
3. Review federal, state, tribal, and local environmental databases for listings of known or suspected environmental conditions indicative of releases or threatened releases of hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. A glossary of the abbreviations used here is provided at the end of this report. The specific databases and minimum search distances reviewed are as follows:

EPA Databases (Search Distance)

NPL (1 mile)

Proposed NPL (1 mile)

Delisted NPL (0.5 mile)

CERCLIS (0.5 mile)

CERC/NFRAP (0.25)

RCRA CORRACTS (1 mile)

RCRA TSD (0.5 mile)

RCRA generators (Property and adjoining)

Institutional Control/ Engineering control (property)

ERNS (property)

State and Tribal Databases

State and Tribal Equivalent NPL (1.0 mile)

State and Tribal Equivalent CERCLIS (0.5 mile)

State and Tribal landfill and/or solid waste disposal site (0.5 mile)

State and Tribal UST (property and adjoining)

State and Tribal VCP (0.5 mile)

State and Tribal Institutional Control/Engineering Control
(property)

State and Tribal LUST (0.5 mile)

State and Tribal Brownfields (0.5 mile)

Other lists which may be checked if readily available and useful include:

AST (property)

Local Records for Activity and Use Limitations

Records of Contaminated Public Wells

4. Review regulatory agency files regarding listed sites on the subject and/or adjoining properties, and files for properties in close proximity to the subject site that have been determined to be in an inferred upgradient location in terms of expected ground water movement relative to the site, or sites in close proximity that are known emitters of airborne hazardous particulates.
5. Review reasonably available historical aerial photographs, city business directories, historical maps, county tax assessment records, fire department records, insurance maps, building plans, or other available public documents or publications to evaluate development history and property use of the subject site and adjacent sites for the possible use, generation, storage, release, or disposal of hazardous materials that may affect the subject site. The historical study will be reviewed from the present back to when the property first contained structures or was used for residential, agricultural, commercial, industrial or governmental purposes.
6. Conduct a visual reconnaissance of the site and adjacent properties.
7. Identify the source(s) of potable water for the site, and type of heating and cooling systems for site structure(s).
8. Interview the following individuals with regard to past and present uses of the site and its vicinity with respect to the possible use, generation, storage, release or disposal of hazardous materials or petroleum products: The current owner at the time the study was completed; past owners of the site as feasible; key current occupants; adjoining property owners as feasible, and representatives of selected public agencies which may include one or more of the following: the local Fire Department, the local health agency, the local agency having jurisdiction over hazardous waste disposal, or the local agencies responsible for issuing building or ground water use permits.
9. Identify data gaps in the investigation that result in the inability to identify releases or threatened releases of contaminants on, at, in, or to the subject property.

10. Prepare a written report summarizing the results of our Phase I ESA including, if appropriate, recommendations for additional Phase II study. Our report will be signed by a Licensed Geologist practicing in Washington State.

2.3 SIGNIFICANT ASSUMPTIONS

The client was responsible for providing some prior reports and studies pertinent to the property, lease information, and arranging access to the property for site reconnaissance.

All information was gathered from readily available public documents and information sources. Within these parameters, this study has strived to identify as closely as possible any *Recognized Environmental Conditions* on the subject properties and adjacent areas, but does not guarantee complete elimination of uncertainty.

2.4 LIMITATIONS AND EXCEPTIONS

This study did not examine those elements of potential environmental concern that are not covered under CERCLA's "All Appropriate Inquiry," including radon, asbestos, lead in drinking water or lead-based paint, biological agents, or mold. It did not include an environmental compliance audit, or an evaluation for the presence of asbestos or other regulated building materials or PCB equipment. Specific contamination evaluation procedures, such as soil or ground water sampling and chemical analysis were not included in this scope of services.

Within the limitations of scope, schedule, and budget, our services have been executed in accordance with generally accepted environmental science practices for environmental site assessments at the time this report was prepared. No warranty or other conditions, expressed or implied, should be understood.

2.5 SPECIAL TERMS AND CONDITIONS

None

2.6 USER RELIANCE

Pinnacle GeoSciences prepared this Phase I ESA for use by the Port of Seattle. This report may be made available to regulatory agencies and to other parties authorized by the Port. The report is not intended for use by others and the information contained herein is not applicable to other sites.

3.0 SITE AND VICINITY DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The property is located on the southwest side of Terminal 91, adjacent to the west of the waterway bordering Pier 91 and south of the Magnolia Bridge in Seattle.

The legal description of the property is: Portion of lots 1-7 and 12-18 including vacated 23rd avenue West, Block 117, Seattle Tide Lands in King County, Washington.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

A vicinity map showing the property location is shown in Figure 1. Historical aerial photographs are shown in Figure 2. Figure 3 shows historical photographs of the site. The site and surrounding area is shown in Figure 4. Current site photographs are shown in Figure 5.

The property is located at the north end of Elliott Bay in Seattle, and is a part of the Port of Seattle's Terminal 91, a facility used primarily for industrial business, a cruise ship terminal, and other shipping concerns.

3.3 CURRENT USE OF THE PROPERTY

The property is currently leased to American Seafoods and used for storage of materials and equipment related to the company's operations on Pier 90. The southern edge is a landscaped public park developed and maintained by the Port of Seattle. The park includes a public pathway and viewing area.

3.4 SITE STRUCTURES, UTILITIES, AND OTHER IMPROVEMENTS

The property is a fenced area with no permanent structures. A municipal stormwater system serves the property. Degrading paved areas initially constructed by the Navy still exist on parts of site. The area is surrounded on the east and south by a riprap bulkhead.

3.5 CURRENT USE OF ADJOINING PROPERTIES

The property is bordered on the east by waterway and Pier 91, on the north by the Magnolia Bridge and asphalted parking area; on the west by a City of Seattle park, and on the south by Elliott Bay.

3.6 TOPOGRAPHY, GEOLOGY AND HYDROGEOLOGY.

The subject property is located in Smith Cove, at the north end of Elliott Bay. In its original state in the 19th century it was a low-lying area of tide flats, estuarine marshes, and wetlands. The property was originally an intertidal mudflat.

The Seattle area lies in the Puget Sound lowlands, a glacially sculpted landscape that resulted from thick lobes of ice that advanced southward from British Columbia several times between the Pleistocene and Holocene Epochs between 2.4 million and 10,000 years ago. The most recent advance, the Vashon Stade of the Fraser Glaciation,

ended about 14,000 years ago with the ice disappearing in this area about 10,000 to 11,000 years ago. As a result of the repeated glaciation, the Seattle area is dominated by north-trending ridges and drift uplands with surface depressions. Large glacial troughs are now occupied by Puget Sound and freshwater lakes, such as Lake Washington and Lake Sammamish.

The West Yard property is flat, and sits at an elevation of approximately 12 feet, adjacent to the Smith Cove waterway. The property was historically part of open water and intertidal mudflats that were filled in 1942 to support a Naval supply depot which is now the Port's Terminal 91. To the west the terrain rises steeply up Magnolia Bluff to an elevation of 180 feet; the area from the bluff eastward is a designated landslide area and liquefaction zone.

The subject property originally was located on a spit across the mouth of the Cove. With the construction of Piers 90 and 91 in 1913 and 1915, much dredging took place to accommodate large ships, with some of the dredge spoils used to fill nearby areas of Smith Cove for shipping and industrial use. Navy documents show that the subject property was filled to generally its current configuration from dredge spoils adjacent to Pier 91 soon after acquisition from the Port in the early 1940s.

Native estuarine deposits in Smith Cove consist primarily of silts with varying amounts of sand and organics. Groundwater is generally at a depth of about five to ten feet below ground surface feet with a net gradient to the east and south with some minor tidal influence on ground water levels.

4.0 USER PROVIDED INFORMATION

4.1 LEGAL RECORDS

None provided.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

We reviewed information from the City of Seattle Department of Planning and Development regarding permits for the property to determine any permit or building limitations, and reviewed records from the Department of Ecology. No liens or AULS (Activity and Use Limitations) were found specific to the subject property.

4.3 SPECIALIZED KNOWLEDGE

None

4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

None

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

It was not possible to ascertain specific value reduction, if any, related to Recognized Environmental Conditions on the subject property.

4.6 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

None

4.7 REASON FOR PERFORMING PHASE I ESA

The Port of Seattle requested the ESA to support on-going negotiations with the Washington State Department of Ecology and potential transfer of the property.

5.0 RECORDS REVIEW

5.1 INTRODUCTION

Standard record sources were reviewed using unmodified standard search distance radii for EPA and Ecology records using the most recent database publication. The data was provided by Environmental Data Resources, compiled from state, federal, local and tribal records.

5.2 STANDARD ENVIRONMENTAL RECORDS SOURCES

We reviewed Environmental Data Resources (EDR) database search of regulatory lists and records provided by the U.S. EPA and Ecology (Washington State Department of Ecology). These documents were reviewed to evaluate whether public records indicate the presence or potential presence of contamination by hazardous substances on the subject property or adjoining properties. The lists reviewed and their respective search distances are presented in Section 2.2 of this report. A glossary of each list reviewed is attached at the end of this report. The full EDR search report is attached in Appendix A.

American Seafoods, the current tenant of the subject property, was listed on the RCRA-CESQG, Allsites, Manifest and Spills databases. American Seafoods currently uses the subject property for storage of materials; it also occupies property elsewhere at Terminal 91, so it is unclear exactly where all of the activities for these databases originated. The West Yard property is included in Ecology's file for the entire Terminal 91 property. The RCRA designation shows no record of violations; the SPILLS records show eight incidents of chemical, diesel, motor oil, hydraulic oil, and petroleum spills at Terminal 91 between 2007 and 2009. Ecology records were reviewed for these spills however, several of the records were unavailable. Two spill records were reviewed and were found to be at locations not in the immediate proximity of the West Yard property. Ecology did not produce any records that specifically related to the West Yard property at Terminal 91. Conversations with Port environmental staff indicate

that reported releases on the subject property were small, localized and promptly remediated. There is more information on these releases in Section 7.1 of this report.

Several records are listed on the databases that are within the standard search distances for a Phase I Environmental Site Assessment. With the exception of a UST, LUST, and Spills listing at the Elliott Bay Marina located ¼ mile to the west on Elliott Bay and cross-gradient from the subject West Yard, all of the listings are at various locations between ¼ mile and ½ mile to the east and northeast on and east of Terminal 91 and Interbay. The Smith Cove Waterway separates these locations from the subject property.

Terminal 91 is currently under an Agreed Order to resolve contamination issues arising from an historic tank farm. The order covers all of the contiguously owned Port-owned property. The Port has also participated in an EPA Brownfields Act program for study of the site. In addition, terminal-wide studies have been completed, by Pinnacle GeoSciences and others, to detect any historical locations and extent of potential contamination. The potential of impacts of the listed sites to the West Yard is discussed further in Section 9.0.

5.3 PHYSICAL SETTING SOURCES

USGS historical and current topographic maps and published resources regarding the geology and ground water of King County were used to determine the physical setting of the property.

5.4 PROPERTY HISTORY

The property history was gained from historical aerial photos, engineering and other documents from US Navy archives, Port of Seattle drawings and historical publications, historical maps, Sanborn Insurance Maps, Polk's directories, and City of Seattle and King County online documents.

The subject property lies in an area that has been used for maritime commerce since the 1890s. At the turn of the last century, much of Smith Cove was intertidal mudflat, but the area had shipping, railroads, and industry. Historical maps and photos show that there was log staging, railroad access to a coal bunker wharf and the Pioneer Glass Works west of the subject property in the late 1800s and early 1900s.

In 1911, the Port of Seattle acquired various properties at Smith Cove, and by 1913 had constructed Pier 90. The construction of Pier 91 followed in 1915. The West Garfield Street Bridge, at the northern boundary of the subject property, was initially constructed in 1912 with its original terminus on the current West Yard just east of the current alignment of 23rd Avenue West. In 1930 the viaduct, now known as the Magnolia Bridge, was replaced by a concrete structure and extended to the Magnolia neighborhood. In the 1920s and 30s a number of dwellings, a store, and garages lined

the original alignment of 23rd Avenue West which traversed the central part of the subject property. This is shown in the historic photographs in Figure 3.

In the 1920s and 30s there was substantial industrial development in the Smith Cove area including petroleum tank farms, a refinery and extensive shipping operations. All of these activities occurred to the east of the subject property and were generally separated from the subject property by the remaining inlet that allowed tidal flow into the remaining tidelands of the parts of Smith Cove that had not yet been filled. This is shown in the 1936 aerial photograph in Figure 3.

The US Navy took possession of the Port's Terminal 91 properties for wartime efforts in 1942, and began filling the undeveloped areas of Smith Cove. The West Yard property was not part of the Port's holdings at the time of the transfer of property to the Navy. The US Navy used the former Port property and additional acquired land to establish a supply depot with numerous facilities, and occupied it until the property was acquired by the Port in 1976. As part of the Depot development, the subject property and adjacent areas were filled using nearby dredge spoils. The source of this fill was part of a deepening and widening project in the area west of Pier 41 (currently Pier 91). This is shown in Figure 3. To accommodate this project the pile supported roadway (former alignment of 23rd Avenue West) and the structures in the area were removed. Additional fill of unknown origin was placed afterward to bring the property to its approximate current configuration. This newly created area was used as a recreational yard with ball fields and related sports facilities. There was also a saluting battery with ammunition magazine, and a helicopter landing.

The Saluting Battery was identified in the EPA Brownfields Assessment report of 2007. The structure itself (photograph 12 on Figure 4) was not accessible at that time. One soil exploration was advanced next to the structure. Boring 23 was advanced to 15 feet and encountered 7 feet of silty sand over silt. Water was present at a depth of 13 feet below grade. A soil sample from a depth of 14 feet was tested for petroleum hydrocarbons and was found contain lube oil range hydrocarbons at a concentration of 385 mg/Kg which is below the regulatory threshold of 2,000 mg/Kg. No further testing was done in this area.

After acquiring the subject property in 1976, the Port reconfigured the West Yard property for industrial use. 23rd Avenue West was constructed at its current location prior to 1980. This roadway defines the western margin of the property. The small park at the southern end of the property was also constructed prior to 1980 as is shown in the aerial photographs in Figure 2. The Port leased the West Yard to various businesses, first for storage of autos off loaded from ships, and later to American Seafoods for storage of equipment and nets.

5.5 ADJOINING PROPERTY HISTORIES

South: Elliott Bay

North: Prior to filling of Smith Cove by the Navy, the West Garfield Street Bridge (now Magnolia Bridge), originally built over the tide flats in about 1912 and rebuilt generally to its current configuration in 1930, and a wooden trestle were adjacent to the north. In the 1930s the area also had a few small dwellings. During the 1940s, after the Navy filled the tidelands, it used the property directly north and northwest as a scrap yard with warehouses for handling surplus items and heavy metal, with railroad sidings to transfer them. The northwest property also had a sewage treatment plant, Imhoff tank and sludge beds. All but one warehouse was removed in the 1990s; the remaining warehouse for the scrap yard is located to the northwest and is unused.

Studies conducted in 2007 by Pinnacle GeoSciences evaluated historical conditions over the uplands portions of Terminal 91 not yet subject to an Agreed Order. This assessment did not find areas of concern that would potentially affect the West Yard in that part of the T-91 uplands to the north, including areas beneath and north of the Magnolia Bridge.

West: At the turn of the last century, the property to the west was mainly tide flat. Polk's Seattle Directories show that a glass factory existed at the site under the names of the Puget Sound Glass Works, Northwest Glassworks, Star Glass Company, and Pioneer Glassworks between 1899 and 1906. Baist's Real Estate Maps show the Pioneer Glassworks on maps of 1908 and 1912. A Sanborn Insurance Map of 1905 shows the layout of the factory, with gas producers, chamber, engine/boiler room, mould shop, plug mill, stack, and lehr (kiln). This facility did not extend onto the subject site. Its impact to the property to the west, if any, is unknown.

The glass factory evidently ceased operations sometime between 1908 and 1912. During the 1920s and 30s the shore areas were occupied by small houses and shacks. No significant changes occurred in property use until the property, along with the Terminal 91 area, was taken by the US Government and developed as a Naval Supply Depot during World War II. The property to the west of the subject site was developed into officers' quarters, a dispensary, a school, and other support services for the base.

The Navy buildings and surface utilities were removed in the 1990s. According to the "Finding of Suitability to Transfer" produced by the Navy in 2002, and from evaluation of Navy drawings and other documents, there was no record of commercial or industrial uses of this property during the Navy's tenure.

East: The subject property adjoins the waterway next to Pier 91. The waterway and pier have been used for large ship docking since construction of the piers by 1915. Both Piers 91 and 90 are adjacent to an industrial area that began in the late teens and

early 1920s with initial partial filling of the cove, and where the Port of Seattle first began its commerce with the Orient.

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY, LIMITING CONDITIONS, AND OBSERVATIONS

Representatives of Pinnacle GeoSciences visited the subject property on October 6, 2011. The Port provided access to the property. Photos of the property are shown in Figure 4.

The property is used by American Seafoods to store equipment and materials. The Port also uses part of the site to store soil and used treated decking. Most of the storage is around the perimeter of the site with the central area remaining open for maneuvering trucks. Items stored at the site by American Seafoods include fishing nets, industrial tanks and conveyors and other miscellaneous fish processing equipment. There were several large shipping containers which were used for dry storage of other supplies and surplus equipment. Only one drum was observed at the site and it contained a heavy metal chain. We did not observe evidence of spill and leaks at the site and there was no evidence of the site being used for maintenance of vehicles or similar equipment. The northern part of the site is used for storage by Port Maintenance. The storage includes used treated decking (photograph 5 in Figure 4) and several piles of fill soil. One large soil pile is approximately 1,000 to 2,000 cubic yards in size. We understand that it is soil generated during the development of the Galer Street overpass in the early 1990s and is being stored for possible use on other projects. We found no record of testing of this soil. There are other small piles of soil in other parts of the northern part of the subject property. There was no visual evidence of contamination in these stockpiled soils.

6.2 GENERAL SITE SETTING

The property is adjacent to Elliott Bay, separated from the foot of Magnolia Bluff by the Smith Cove Park. The area to the west is generally residential and recreational; the area to the north and east is occupied by the Port's Terminal 91 shipping and industrial facility.

6.3 EXTERIOR OBSERVATIONS

Hazardous Substances in Connection with Identified Uses

None.

Hazardous Substance Containers and Unidentified Substance Containers

None.

PCBs

None.

Storage Tanks

None.

Odors

None.

Drums

One drum was observed, containing chains.

Pits, Ponds or Lagoons

None. Some minor rainwater ponding was observed throughout the site.

Pools of Liquid

None.

Stained Soil or Pavement

None.

Stressed Vegetation

None.

Solid Waste, Refuse and Debris

Minimal debris was observed in some area of the site.

Waste Water Discharge

None.

Transformers and Utilities

None.

Fill

The property is built on dredge fill from Elliott Bay. Fill soil for future construction use is stored on the site.

Potable Water

None.

Wells

None.

Septic Systems

None.

Interior Observations

None

7.0 INTERVIEWS

7.1 OWNER / SITE MANAGER

We discussed the subject site with Greg Englin, Manager of Dock Operations at T-91 and Mike DeSota, Environmental Program Manager. Mr. DeSota is responsible for environmental compliance issues at the site. Mr. Englin described the use of the West Yard by American Seafoods as a laydown yard where equipment is stored. The yard is also used for some storage of building materials by Port Maintenance. The Port maintains secure access to the site. Mr. DeSota described the history of periodic localized spills and releases at the site. He noted that these releases tended to be localized and were promptly remediated. No releases from the site are known to have reached Elliot Bay. In a recent inspection Mr. DeSota requested that several drums of waste (which were property labeled and stored) be removed from the site. American Seafoods complied with this request promptly.

7.2 PUBLIC AGENCY

Online records provided by the City of Seattle Fire Department regarding hazardous waste incidents were checked. There were no incidents specific to the West Yard listed.

8.0 DATA GAPS

Ecology was unable to produce some of the spill documents they reportedly had on file for the subject site. Based on interviews with Port personnel we believe that the spills in question have been identified and described by Port representatives and they would not affect the findings and conclusions in this report.

9.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 10 of this report. This assessment has revealed evidence of *Recognized Environmental Conditions*.

9.1 RECOGNIZED ENVIRONMENTAL CONDITIONS ON THE SUBJECT PROPERTY

We found no Recognized Environmental Conditions on the subject property.

9.2 RECOGNIZED ENVIRONMENTAL CONDITIONS ON ADJACENT PROPERTY:

Recognized Environmental Conditions were identified on the property to the west owned by the City of Seattle. These include an historic, former glass factory that used coal gasification as a fuel source, an existing unused UST and drums of unlabeled exploration waste (soil and water) stored on the site.

9.3 DE MINIMIS CONDITIONS ON THE SUBJECT PROPERTY

De Minimis conditions are not a Recognized Environmental Condition. *De Minimis* conditions generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. These items are described here because there is insufficient existing information to fully evaluate them but in our opinion it is likely that they would not represent a Recognized Environmental Condition when fully evaluated.

The character of the fill used to construct the site is unknown. The site was filled in the early 1940s with dredge spoils from the west side of Pier 41. The extent of this fill as reported by the US Navy is shown in Figure 3. Recent (2006) testing of sediment from the west side of Pier 91 (formerly Pier 41) documented low concentrations of PCBs and HPAHs. This recent data cannot be extrapolated to represent conditions in the 1940s but in the decades prior to the dredging next to Pier 41 those sediments could have accumulated contaminants from the nearby oil refinery, shipping activities (fueling, maintenance and bilge water discharge), burn residue from known large fires in the Smith Cove area, and residues from other activities in the area. The predominant contaminant in these types of sources would likely be PAHs.

Pinnacle GeoSciences tested fill soil in areas of T-91 filled by the Navy possibly from a similar source (dredge spoils from areas surrounding Piers 90 and 91) in 1997. These areas were filled by the Navy concurrently with the original filling of the West Yard area. The areas selected represented dredge fill soils from areas where there was no other suspected source of contamination. Chemical testing of PAHs in this fill soil did not find contaminants at levels of concern.

We have no specific information to suggest that the fill would exceed the *de minimis* criteria contained in the ASTM definition of Recognized Environmental Condition. Furthermore testing of fill soils in other areas of T-91 that likely share a similar source did not find contaminants at concentrations of concern. One test exploration, #50, was located about 450 feet north-northeast of the West Yard

property. That exploration encountered about 19 feet of sandy soil interpreted to be dredge fill over a grey silt soil which we interpreted to be native tide flat sediment. Two soil samples were taken from the dredge fill at depths of 12.0 and 19.0 feet in that exploration, neither sample contained PAHs at detectable concentrations. We understand that King County intends to test soil from explorations being advanced on the Port's West Yard. That testing may further address this issue.

Fill soils for future construction use are stored on the subject site. The majority of this fill soil was reportedly from a nearby construction project. The character of this fill is unknown. A prior report by BOLA Architects + Planners (2004) notes that the soils were generated from the construction of the NE 15th Street/Galer Street overpass some years ago and was considered clean and planned for onsite fill. However, according to the current environmental staff at the Port, there is no record of this soil having been tested. We consider this fill soil to be a *de minimis* condition.

10.0 DEVIATIONS

This report contains no deletions or deviations from the EPA or ASTM standard practice for this study.

11.0 ADDITIONAL SERVICES

No additional services were provided with respect to the subject property.

12.0 REFERENCES

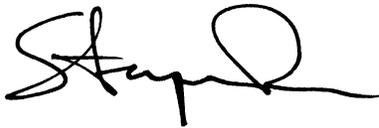

A list of references used is attached to this report.

13.0 CLOSING

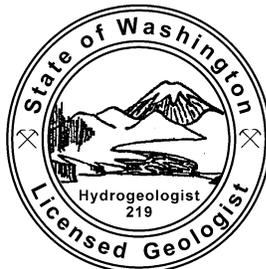

Pinnacle GeoSciences appreciates the opportunity to provide environmental consulting services to the Port of Seattle. Please call if you have any questions concerning this report.

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.20 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set for in 40 CFR Part 312.

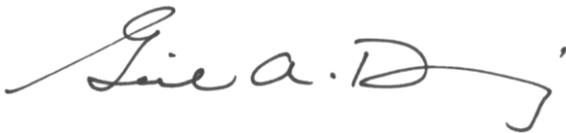

Sincerely,
Pinnacle GeoSciences, Inc

Stephen C. Perrigo, L.G
Principal.

Stephen C. Perrigo, LG, LHG

Principal Geologist

Pinnacle GeoSciences, Inc.

Mr. Perrigo has thirty-two years of experience related to environmental assessment and remediation. He has assumed principal management and/or technical responsibility for more than 250 projects for industries, oil companies, utilities, solid and hazardous waste firms, law firms, developers, commercial businesses and governmental agencies. Mr. Perrigo has been the owner and principal for Pinnacle GeoSciences since its inception in 1995. He is proficient in Washington State environmental regulations, drawing from his project and technical experience, from active involvement with the Washington State Department of Ecology, and participation in forums for development of regulatory policy and technical standards.

These have included Phase I and Phase II assessment and remediation of properties for property transfer, evaluation and remediation of leaking underground storage tanks, spills and contaminant releases to the environment, and solid and hazardous waste disposal.

Mr. Perrigo's project experience ranges from management of investigations, environmental analyses and remediation at Superfund sites to small local assessments and contaminated site remediation. These have included Phase I and Phase II environmental site assessments for property transfer, evaluation and remediation of leaking underground storage tanks, spills and contaminant releases to the environment, and solid and hazardous waste disposal.

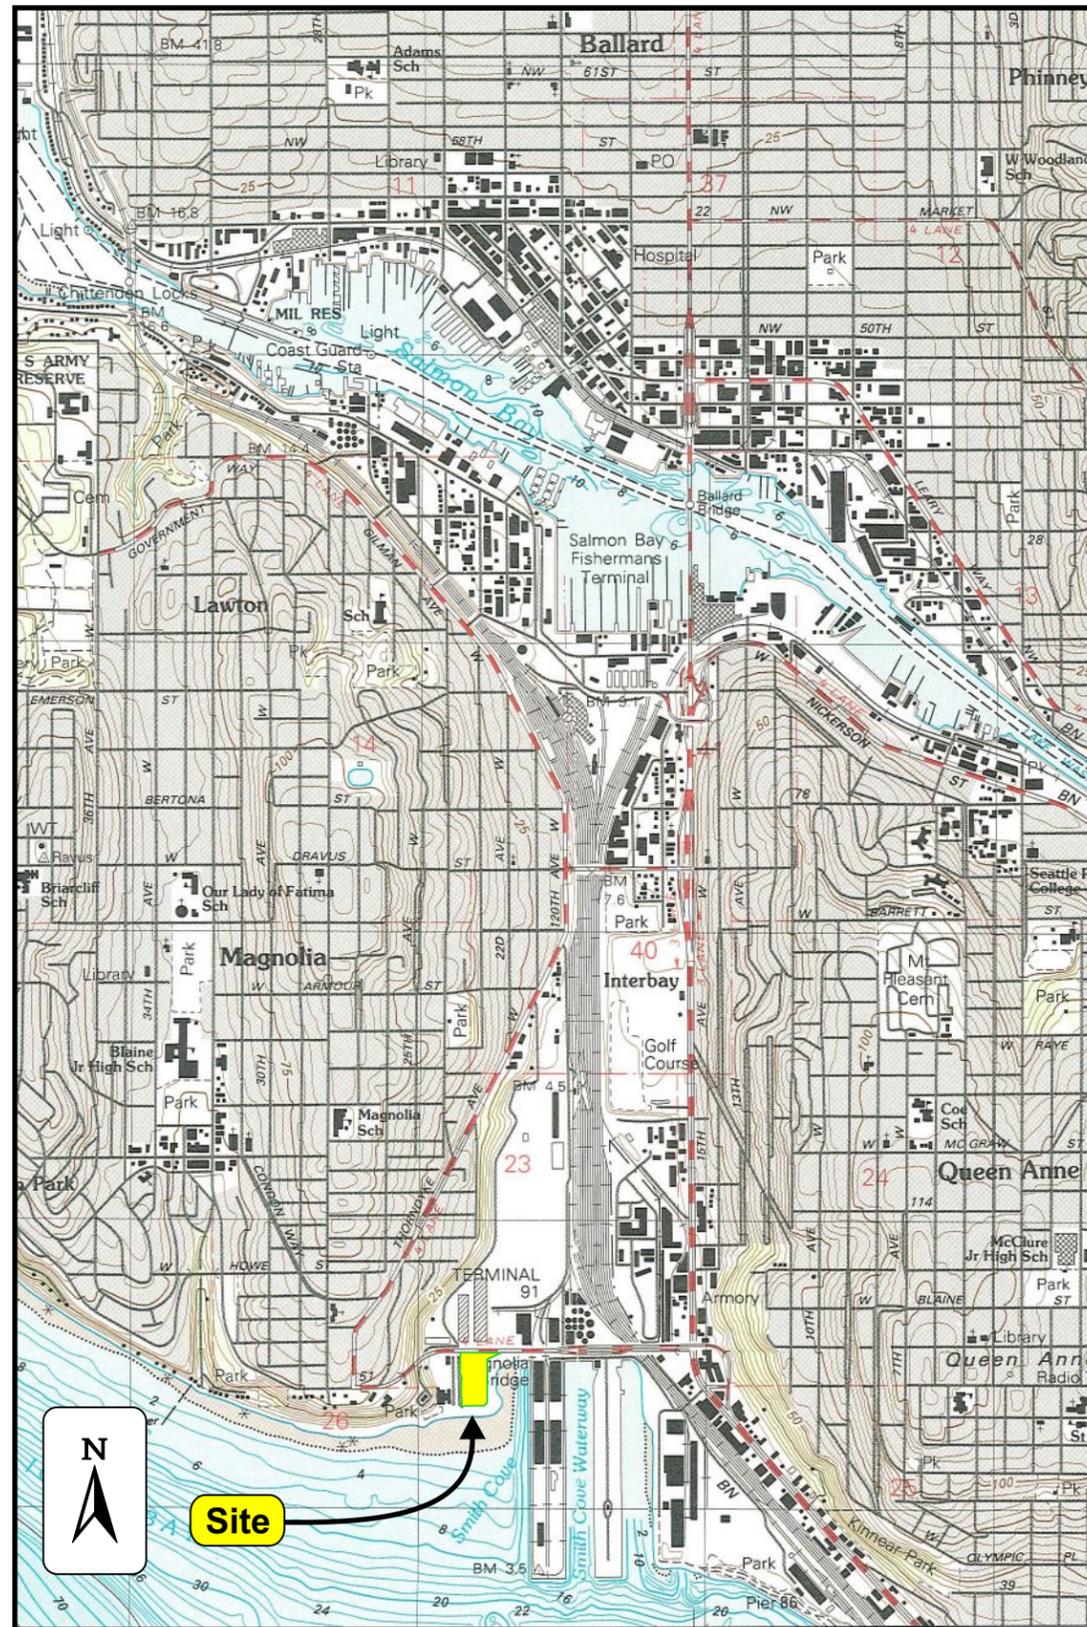

Mr. Perrigo is a Licensed Geologist and Hydrogeologist in the State of Washington (license no. 219). He holds a Bachelor of Arts in Geology from the University of Colorado earned in 1976 and is a member of the Association of Engineering Geologists.

Gail A. Perrigo
Staff Historian
Pinnacle GeoSciences, Inc.

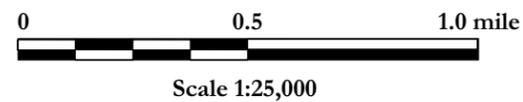

Ms. Perrigo has fourteen years of experience in historical land use research support for Phase I Environmental Site Assessments. Her experience is specific to the Puget Sound area, and she has developed an in-house compendium of historical geographical, topographical, and demographic maps, photographs, books, government publications and other literature reflective of local development. She is familiar with on-line and public sources regarding development, public works, and historical business information as well as resources for investigation of historical manufacturing practices.

Ms. Perrigo has investigated properties ranging in complexity from a straightforward historically residential property to a 135 acre, century-old multi-use shipping terminal and former defense site involving petroleum products shipping and storage, manufacturing, vehicle preparation, and other commercial uses. She has investigated multi-unit residential properties, former service stations, garbage dumps, agricultural properties, and others.

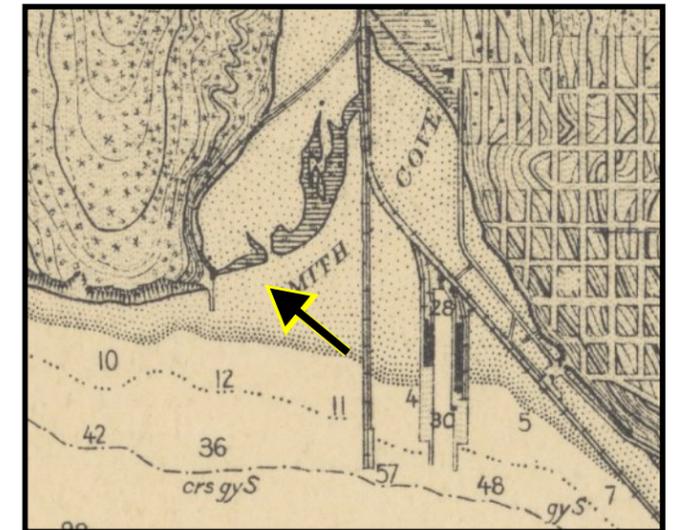

Ms. Perrigo has a Bachelor of Arts from the University of Oregon and graduate studies at the University of Washington in Natural Resources Management.

1905

1894

1912

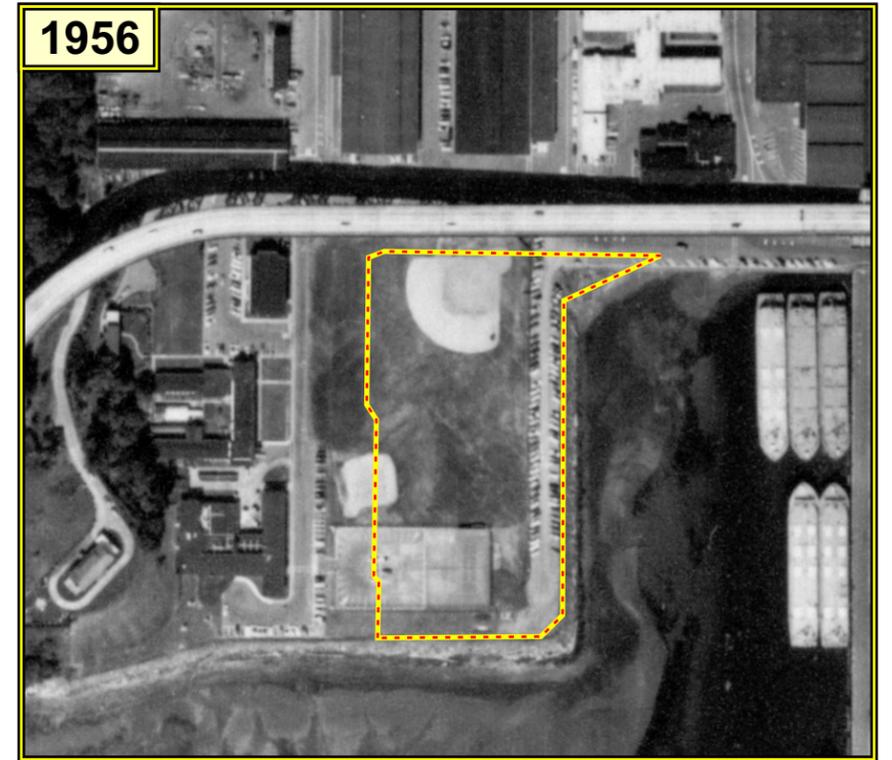

The 1841 map is from Steve Perrigo's private collection.

The 1894 through 1912 historical maps are from the collection of the University of Washington Library. These images are not scaled to a uniform scale and are only intended to show the approximate area of the subject site during its period of early development. The accuracy of these historic maps varies and often they do not reconcile with current maps with respect to absolute locations, alignments and boundaries.

Description of Photographs and Maps

A: 1931 Photograph. Museum of History and Industry Image No. 1983.10.4369.1. The subject site at low tide. 23rd Avenue West is shown with the arrow.

B: 1929 Photograph. Seattle Municipal Archive Collection #3401. The subject site at low tide. 23rd Avenue West is shown with the arrow.

C: Photograph date unknown, from Port of Seattle Year Book, 1924. The approximate location of the subject site is shown in colored outline. 23rd Avenue West traverses the east-central part of the site.

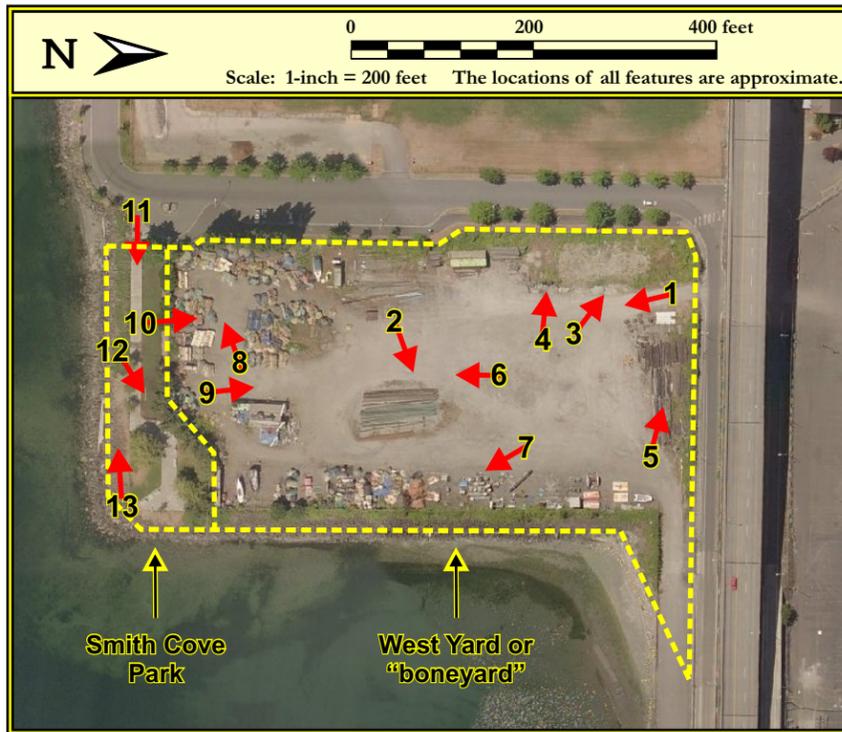

D: 1943 US Navy drawing showing the location of fill comprised of dredge spoils from west of Pier 41.

1936 Aerial Photograph

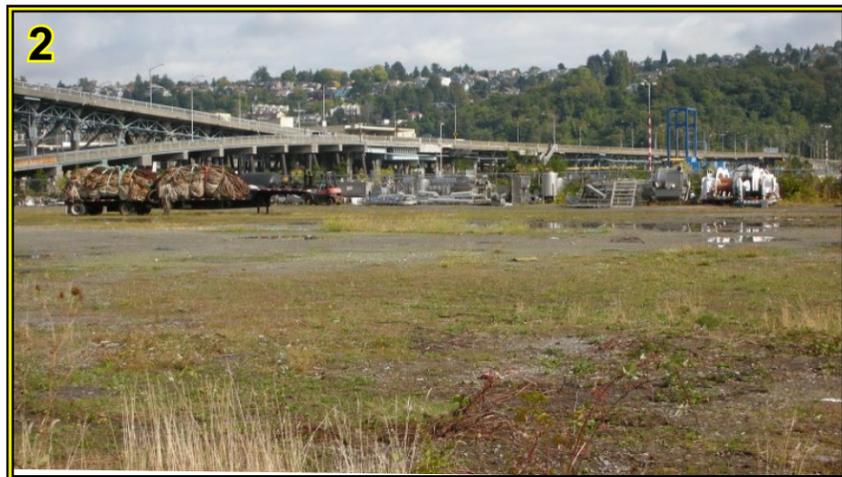

This expanded view of the 1936 aerial photograph illustrates some of the features discussed in the text of the report. Identified items are as follows:

- 1: Historic 23rd Avenue West
- 2: Alignment of present-day 23rd Avenue West.
- 3: Pier 41 (Now Pier 91)
- 4: Source of fill used to originally construct the subject site.
- 5: Blue line shows the approximate limits of the fill placed in 1943, taken from the drawing shown in item D.
- 6: Industrial area (tank farms and former refinery)
- 7: Channel for tidal flushing for the remaining Smith Cove tideflat area.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). PINNACLE GEOSCIENCES used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by PINNACLE GEOSCIENCES. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EDR Historical Cleaners.....	EDR Proprietary Historic Dry Cleaners

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by PINNACLE GEOSCIENCES of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

An online review and analysis by PINNACLE GEOSCIENCES of the CORRACTS list, as provided by EDR, and dated 03/09/2011 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

An online review and analysis by PINNACLE GEOSCIENCES of the RCRA-TSDF list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by PINNACLE GEOSCIENCES of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by PINNACLE GEOSCIENCES of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

An online review and analysis by PINNACLE GEOSCIENCES of the CSCSL list, as provided by EDR, and dated 07/28/2011 has revealed that there are 17 CSCSL sites within approximately 1 mile of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

An online review and analysis by PINNACLE GEOSCIENCES of the CSCSL NFA list, as provided by EDR, and dated 07/28/2011 has revealed that there are 3 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by PINNACLE GEOSCIENCES of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 6 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

An online review and analysis by PINNACLE GEOSCIENCES of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Hazardous Waste Summary:

Waste code: D018
Waste name: BENZENE

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F004
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Form Comm: TBG - Treatment by generator will be utilized to treat D002 water in an onsite baker tank being utilized for accumulation. The water has been tested for metals and none are present above regulated levels. This water will be treated in the accumulation tank with Dry Ice to bring the pH down to approximately 11.5. Once neutralized this material will be hauled off as a Non-Regulated water.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Classification: Non-Generator
 Description: Handler: Non-Generators do not presently generate hazardous waste

Actual:
13 ft.

Owner/Operator Summary:

Owner/operator name: BURLINGTON ENVIRONMENTAL INC
 Owner/operator address: 18000 72ND AVE S. SUITE 217
 KENT, WA 98032
 Owner/operator country: US

Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 11/14/1996
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Corrective Action Summary:

Event date: 06/30/1988
Event: RFI Imposition

Event date: 07/11/1988
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 07/11/1988
Event: RFI Imposition

Event date: 11/06/1989
Event: RFI Approved

Event date: 05/07/1990
Event: RFI Imposition

Event date: 05/12/1990
Event: RFI Imposition

Event date: 09/04/1990
Event: RFI Workplan Received

Event date: 10/08/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 07/09/1992
Event: RFI Workplan Approved

Event date: 04/01/1993
Event: RFA Completed, Assessment was an RFA.

Event date: 09/29/1993
Event: Stabilization Measures Evaluation, This facility is amenable to stabilization activity based on the status of corrective action work at the facility, technical factors, the degree of risk, timing considerations and administrative considerations.

Event date: 10/20/1993
Event: RFI Report Received

Event date: 09/15/1994
Event: Stabilization Measures Implemented, Groundwater extraction and treatment (e.g., to achieve groundwater containment, to achieve MCL).

Event date: 10/04/1994
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 04/03/1996
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 07/03/1996
Event: RFI Imposition, Focused data collection required for stabilization evaluation.

Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event date:	09/15/2005
Event:	Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 10
Land type: Private
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name: LAUREL JAMISON
Owner/operator address: 1141 NW 50TH ST
SEATTLE, WA 98107
Owner/operator country: US
Owner/operator telephone: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 03/10/1997
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FUDS Description Details:

The site is located in Seattle, King County, WA at 1600 W. Armory Way.

FUDS History Details:

The property on which the NWC is now situated (7.62 acres fee) was acquired for use of the United States Navy in 1943 through a condemnation order (Final Compensation Judgement date 15 Aug 1944) as part of the Naval Supply Depot - Seattle. The Depot was used for material storage and shipment purposes. Beginning in 1967, portions of the Supply Depot were reported excess. The GSA, through the Dept. of Health, Education and Welfare conveyed property to the NWC in two separate transactions: QCD dated 20 Nov 1967 (1.0 acre) and QCD dated 14 Sept 1972 (6.62 acres). A total of 11 structures were included in the NWC acquisitions.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011	Source: EPA

Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 09/01/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/12/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency

Number of Days to Update: 36	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency

Number of Days to Update: 70	Next Scheduled EDR Contact: 10/17/2011
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 03/01/2011	Source: Department of Ecology
Date Data Arrived at EDR: 03/18/2011	Telephone: 360-407-7200
Date Made Active in Reports: 03/30/2011	Last EDR Contact: 09/13/2011
Number of Days to Update: 12	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/28/2011	Source: Department of Ecology
Date Data Arrived at EDR: 07/29/2011	Telephone: 360-407-7200
Date Made Active in Reports: 09/08/2011	Last EDR Contact: 07/29/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 11/07/2011

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 04/08/2011

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 07/22/2011
Number of Days to Update: 98	Next Scheduled EDR Contact: 10/31/2011
	Data Release Frequency: Annually

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 60	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/13/2011	Telephone: 202-343-9775
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 34	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (206) 553-1200
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 09/13/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Daycare Centers: Daycare Center Listing
Source: Department of Social & Health Services
Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile ENE
Site Name:	BURLINGTON ENVIRONMENTAL INC PIER 91
Site EPA ID Number:	WAD000812917
Groundwater Flow Direction:	NOT AVAILABLE
Inferred Depth to Water:	3 feet
Hydraulic Connection:	The near-surface ground water at the site is brackish.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PILCHUCK

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Surficial Soil Types: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Shallow Soil Types: fine sandy loam

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.
