

CITY OF SEATTLE

.Net Developer (IT Pro A - Exempt)

SALARY:	\$38.36 - \$49.33 Hourly
LOCATION:	Seattle Justice Center, 600 5th Ave., Seattle, Washington
JOB TYPE:	Civil Service Exempt, Regular, Full-time
SHIFT:	Day
DEPARTMENT:	Municipal Court of Seattle
BARGAINING UNIT:	Not represented
CLOSING DATE	06/21/11 04:00 PM Pacific Time

POSITION DESCRIPTION:

The Seattle Municipal Court has an exciting opportunity for an experienced .Net Developer to work with court and technology staff to modernize our current Informix based case management system. The incumbent will play an important role in this transformational effort to develop and deliver .Net web-based applications, as well as participate in the entire software development lifecycle by researching, analyzing, determining structure, designing, building, testing, implementing, and maintaining software applications. This position reports to the Court Technology Director.

JOB RESPONSIBILITIES:

- Lead in the development of high-performing, high quality, useful, and innovative solutions for .Net applications and components
- Work closely with business and information technology experts to identify and solve common technical problems
- Develop software models that are coherent, concise, accurate, and clear to the customer, and enhance those models to cover systems constraints
- Assist in gathering business requirements and application design specifications
- Develop initial database designs
- Review and approve designs with database architect
- Coordinate with quality assurance staff during testing activities
- Track the technical progress of projects to ensure compliance with or enhancement of the existing architecture of design

QUALIFICATIONS:

- A minimum of three years of design, development and implementation experience using C# .Net , ASP.NET and Visual Studio in a .Net environment.
- Experience with development and use of XML, XSLT, CSS, XHTML, Java Script and .Net web Services.
- A minimum of three years demonstrated SQL experience in database design, development including the creation of stored procedures.
- The equivalent of a Bachelor's degree in Computer Science, Information Systems, related

field or additional qualifying experience.

- A thorough understanding of traditional software development life cycle and processes.
- Strong practical experience in developing reliable, responsive and user friendly web applications and web based software components and web services.
- Demonstrated ability to identify business and external constituents
- Develop and maintain excellent interpersonal relationships, with the ability to communicate effectively with internal staff and clients from multiple disciplines.

ADDITIONAL INFORMATION:

Desired Qualifications:

- Prefer five years of design, development and implementation experience using C# .Net , ASP.NET and Visual Studio in a .Net environment.
- Prefer four years demonstrated SQL experience in database design, development including the creation of stored procedures.
- Additional consideration will be given to candidates with experience in developing Informix 4GL modules and procedures.
- Experience building relational data access layers utilizing Microsoft WCF, ADO.NET entity Framework, and other related technology
- Experience using AJAX
- Experience using SQL Reporting Services
- Experience using Telerik controls
- Ability to work as part of a team, flexible and creative thinker and a good big picture of general development and IT issues is a plus.
