

Landslide Dos

1. Maintain drainage system (pipes, ditches, etc., on your property and keep street drains free of leaves and debris).
2. Direct stormwater away from steep slopes, if possible.
3. Perform periodic inspections of property before winter and during storms keeping safety as the #1 concern.
4. Check weep holes on walls and keep them open.
5. Be alert during and following storms.
6. If you have an irrigation system, shut it off and check it out seasonally.
7. Keep fill and yard waste off slopes.
8. Leave stumps in the ground on slopes.
9. Call a professional, if you have questions or a problem!

Landslide Don'ts

1. Don't direct storm or other water onto a slope.
2. Don't denude vegetation on slope without a re-vegetation plan.
3. Don't cut into the toe (or bottom) of a slope.
4. Don't remove tree stumps from slopes.
5. Don't install a permanent irrigation system in landslide-prone areas.
6. Don't put fill or yard debris on a steep slope.
