

# Assets and Infrastructure

HOUSING AFFORDABILITY  
AND LIVABILITY AGENDA

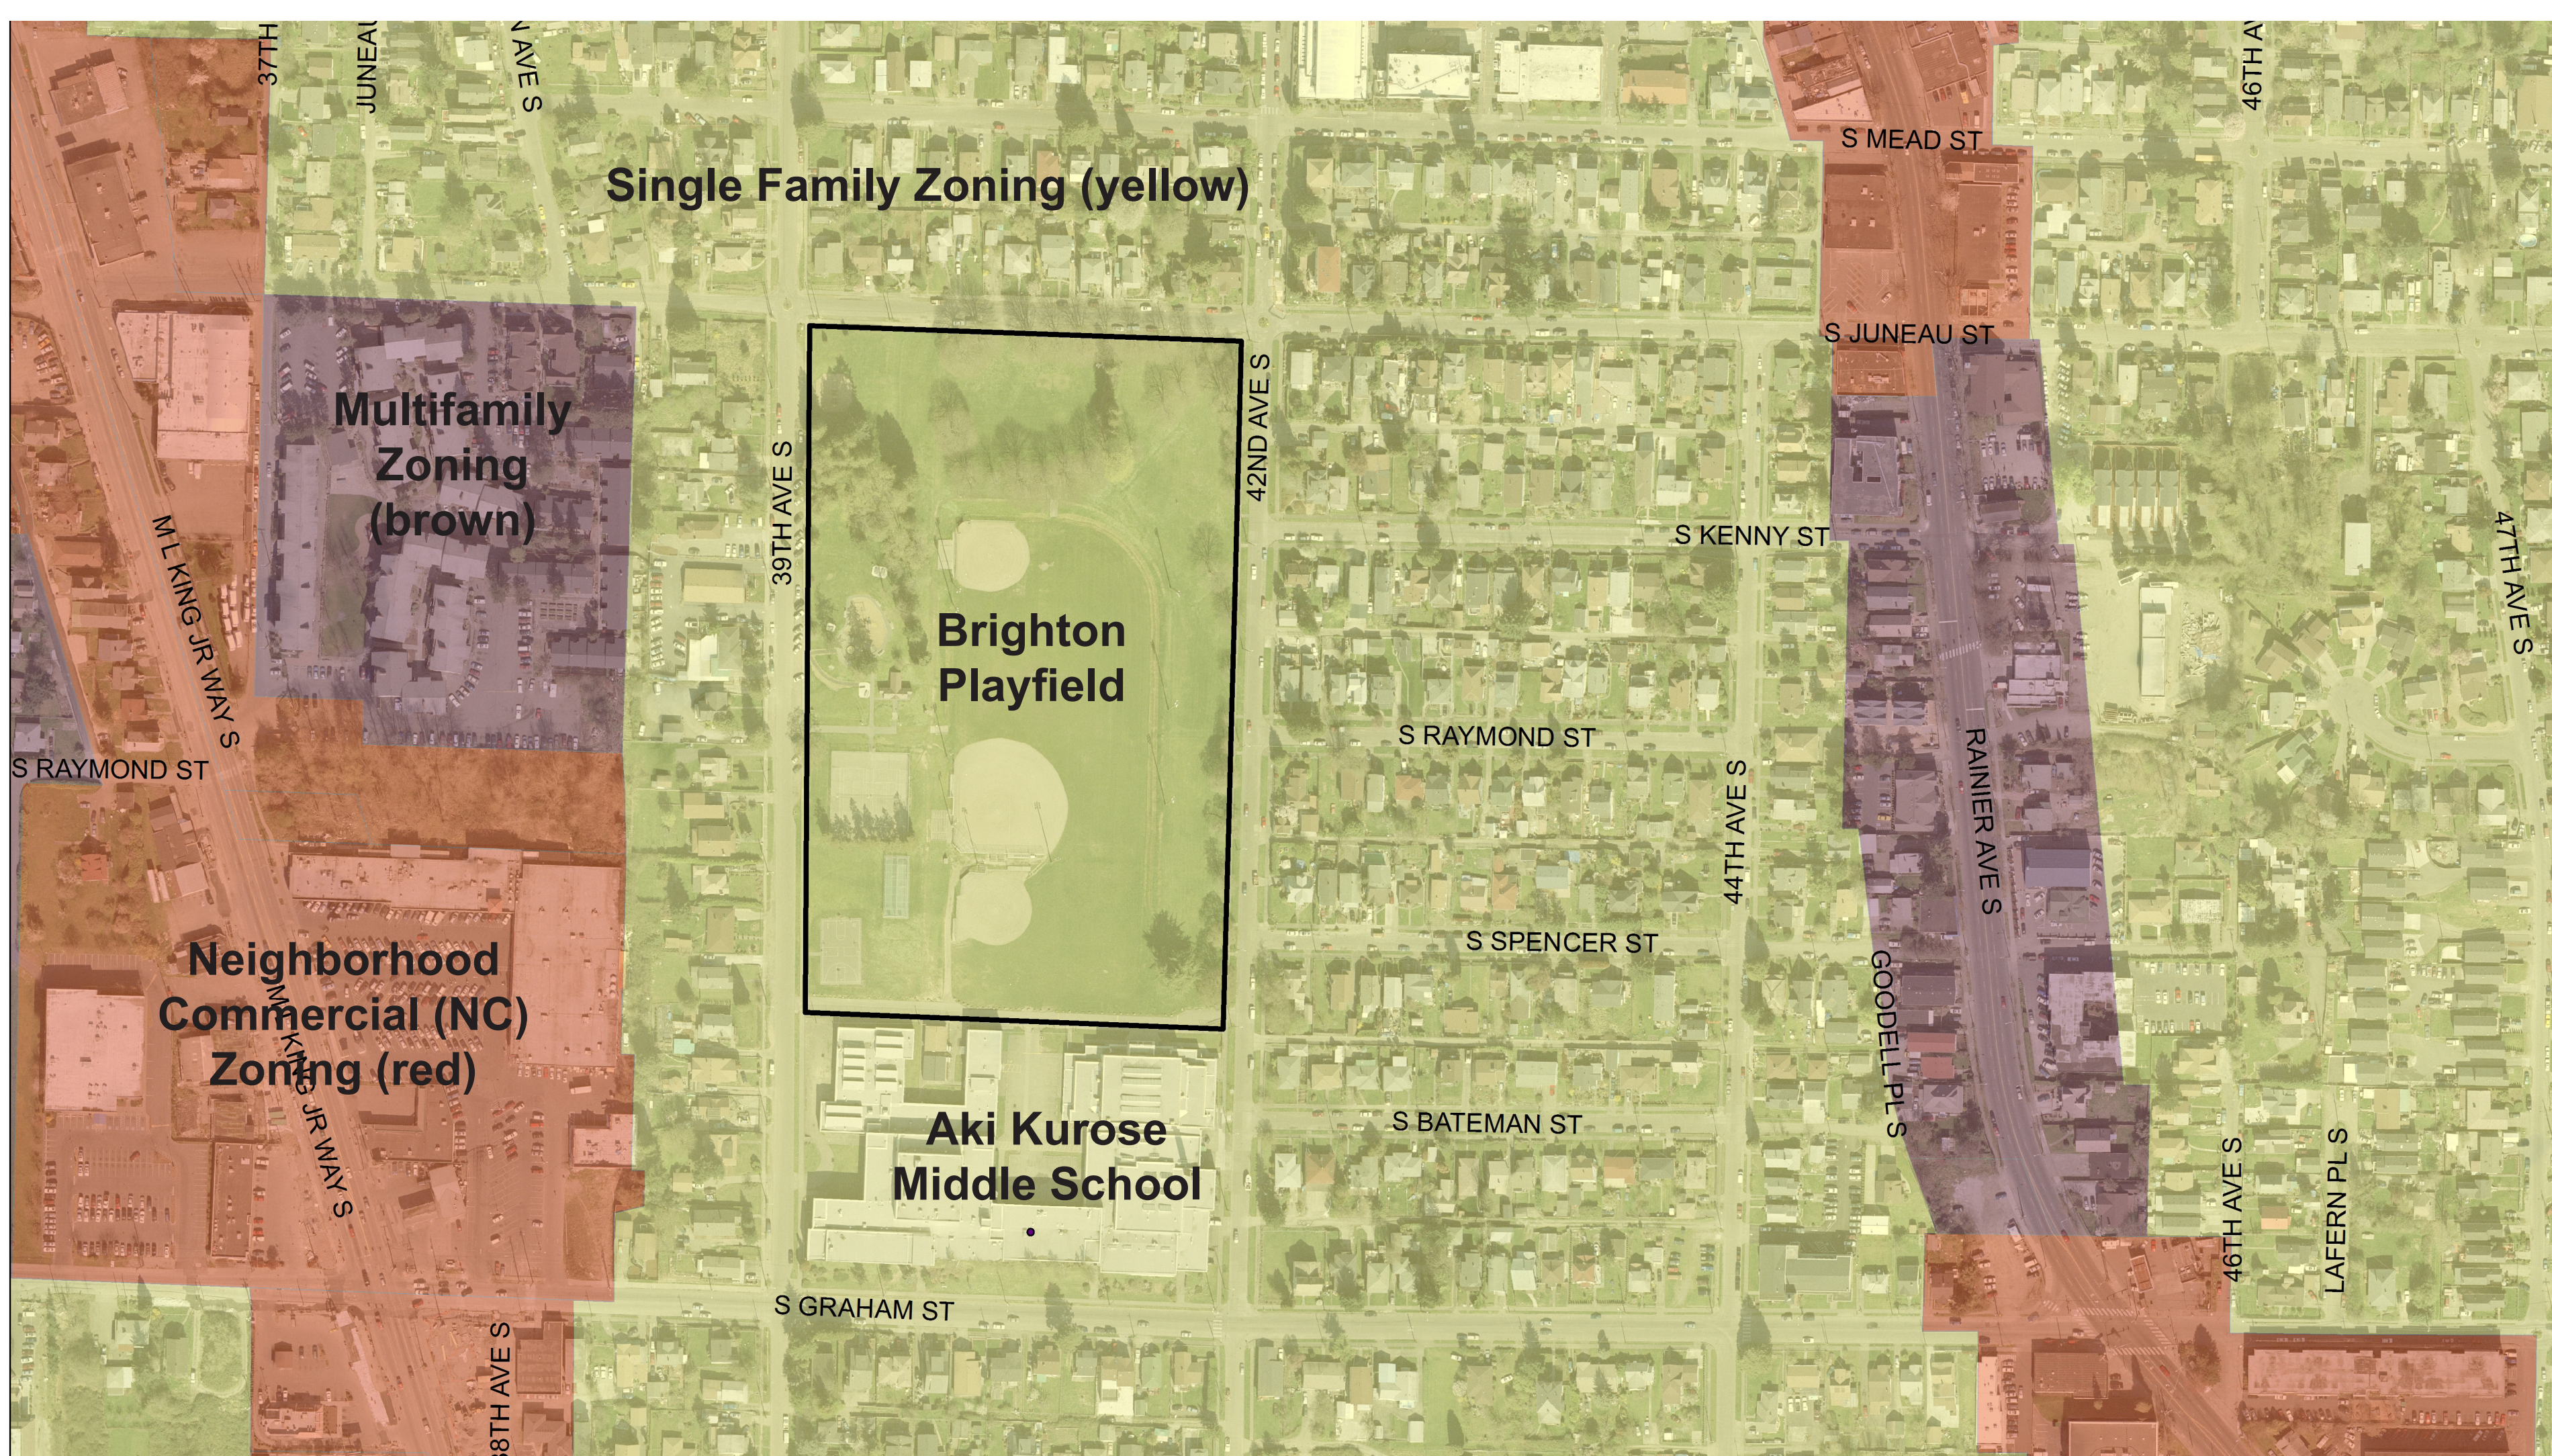

**Parks:** Multifamily housing next to or nearby a park enables residents to take advantage of the park to meet their open space needs — such as places for children to play.

**Public Space:** Public space improvements like the Bell Street Park Boulevard are amenities that serve residents of multifamily housing in the neighborhood.

**Schools:** Residents of multifamily housing near schools may have the benefit of their children attending a neighborhood school. Residents may also use school grounds informally outside of school hours for recreation, open space, and playground needs.

## Zoning near assets and infrastructure example:

Currently, Single Family zoning is adjacent to the public park and public school.

Could more multifamily housing near the park and/or school take advantage of the assets by allowing more people to live near and enjoy them?
