This report contains selected tables from Summary File 3 for Washington State. Summary File 3 contains sample characteristics from the Census long form that was filled out by approximately 1 in 6 persons nationally. The Washington State file became available on September 17, 2002.

This report includes tables related to the current employment status and work status in 1999 of the general population and are detailed below. See Appendix A for subject and geographic definitions. The geographic coverage is for King, Kitsap, Pierce, and Snohomish counties. There are separate sections for counties, incorporated places and Census Designated Places (CDP), and census tracts.

Appendices document the change in Census Tract geography between 1990 and 2000, and compare 1990 and 2000 population based on 1990 Census Tract geography. The printed report includes Census Tract and Census Designated Place maps. On the PSRC website, electronic versions of these maps are available separately from the downloadable PDF version of this report.

Limitations of the Data

The data contained in this report are based on the Census 2000 sample. The data are estimates of the actual figures that would have been obtained from a complete count. Estimates derived from a sample are expected to be different from the 100-percent figures because they are subject to sampling and nonsampling errors. Sampling error in data arises from the selection of people and housing units included in the sample. Nonsampling error affects both sample and 100-percent data and is introduced as a result of errors that may occur during the data collection and processing phases of the census.

For more information, please refer to Chapter 8., Accuracy of the Data in *TECHNICAL DOCUMENTATION: Census 2000 Summary File 3* available at the Census website http://www.census.gov/prod/cen2000/index.html.
