2021-22 Pickleball Study

- Builds off 2019 Pilot Study Recommendations:
 - Document the growth of pickleball
 - Refine where (which sites) and how (standards) for **dual-striping** tennis courts
 - Identify and recommend locations for **dedicated** outdoor pickleball courts
 - Evaluated 16 sites
 - Concepts for 2 sites
- Engage with Pickleball + Tennis Community:
 - 1:1 Interviews
 - Advisory Committee (9 meetings)
 - Online Survey (3,378 responses)
 - Public Meetings (2)

COMMUNITY ENGAGEMENT

Engagement: Community Survey

- A qualitative engagement tool, not statistically representative.
- January 25 – February 11, 2022
- 3,378 total responses, 75% response rate, average time: 6 minutes
- Good mix of respondents:

Pickleball players are **generally dissatisfied** with the quality and quantity of pickleball courts in Seattle.

Quality

Quantity/availability

Tennis players are *also* **generally dissatisfied** with the quality and quantity of tennis courts in Seattle.

Quality

Quantity/availability

Priorities for pickleball facilities were consistent across different respondent types.

** No shared courts with tennis ranked higher among tennis players.*

When we asked whether people preferred a dedicated pickleball facility or many dual-stripped courts throughout the city, no clear single approach was preferred.

OUTDOOR
COURT
APPROACHES

Strategic Framework

Approaches

- 1. Dual striping** (immediate)
add PB lines only or with resurfacing
- 2. Convert** existing tennis courts to pickleball only (mid-term) *during resurfacing or renovation*
- 3. Construct new** dedicated pickleball facility (long-term)

Guiding Considerations

- Geographic distribution
- Accessibility
- Existing amenities (restrooms, parking/transit, lights, etc. community centers)
- Size + capacity
- Court condition
- Court Classification and Use (e.g. Joint Use Agreement or other high school use)
- Residential Proximity (noise)

Court Conversion

Process: Dual Striping and Conversion Site Selection
