APPENDIX Q

E3405.3 Dedicated panelboard space .......................................................... 110.26(F)(1)(a)
E3405.4 Location of working spaces and equipment ................................. 110.26(B); 230.70(A); and 240.24(D), (E) and (F)
E3405.5 Access and entrance to working space ........................................ 110.26(C)(1)
E3405.6 Illumination ................................................................................. 110.26(D)

SECTION E3406 ELECTRICAL CONDUCTORS AND CONNECTIONS

E3406.1 General .......................................................... Articles 110, 300 and 310
E3406.2 Conductor material .......................................................... 110.5
E3406.3 Minimum size of conductors .................................................. 310.106(A)
E3406.4 Stranded conductors .......................................................... 310.106(C)
E3406.5 Individual conductor insulation ............................................. 310.10(B) and (C); and 310.106(D)
E3406.6 Conductors in parallel ......................................................... 310.10(H)(2)
E3406.7 Conductors of the same circuit ............................................. 300.3(B)
E3406.8 Aluminum and copper connections ..................................... 110.14
E3406.9 Fine stranded conductors ..................................................... 110.14
Table E3406.9 Conductor stranding ............................................... Chapter 9, Table 10
E3406.10 Terminals .......................................................... 110.14(A)
E3406.11 Splices ............................................................................. 110.14(B)
E3406.11.1 Continuity ....................................................................... 300.13(A)
E3406.11.2 Device connections .......................................................... 250.148(B) and 300.13(B)
E3406.11.3 Length of conductor for splice or termination ..................... 300.14
E3406.12 Grounded conductor continuity ........................................... 200.2(B)

SECTION E3407 CONDUCTOR IDENTIFICATION

E3407.1 Grounded conductors ..................................................... 200.6(A) and (B); and 310.110(A)
E3407.2 Equipment grounding conductors ..................................... 250.119 and 310.110(B)
E3407.3 Ungrounded conductors .................................................... 200.7(C)(1) and 310.110(C), Exception
E3407.4 Identification of terminals .................................................... 200.10
E3407.4.1 Device terminals ................................................................. 200.10(A)
E3407.4.2 Receptacles, plugs and connectors .................................. 200.10(B)

CHAPTER 35 ELECTRICAL DEFINITIONS

SECTION 3501 GENERAL

ARTICLE 100, Definitions

CHAPTER 36 SERVICES

SECTION E3601 GENERAL SERVICES

E3601.1 Scope ............................................................................. 230.1
E3601.2 Number of services .......................................................... 230.2
E3601.3 One building or other structure not to be supplied through another 230.3
E3601.4 Other conductors in raceway or cable ................................... 230.7
E3601.5 Raceway seal ..................................................................... 230.8
E3601.6 Service disconnect required .................................................. 230.70(B)
E3601.6.1 Marking of service equipment and disconnects ..................... 230.66 and 230.70(B)
E3601.6.2 Service disconnect location .................................................. 230.70(A) and 230.72(C)
E3601.7 Maximum number of disconnects ....................................... 230.71(A)
SECTION E3602

SERVICE SIZE AND RATING

E3602.1 Ampacity of ungrounded conductors ........................................... 230.79(C) and (D)
E3602.2 Service load ............................................................................. 220.82(A)
Table E3602.2 Minimum service load calculation .................................. 220.82(B) and (C)
E3602.2.1 Services under 100 amperes ............................................. None
E3602.3 Rating of service disconnect .................................................. 230.79 and 230.80
E3602.4 Voltage rating .......................................................................... 220.82(A)

SECTION E3603

SERVICE, FEEDER AND GROUNDING ELECTRODE CONDUCTOR SIZING

E3603.1 Grounded and ungrounded service conductor size ................... 310.15(B)(7)
Table E3603.1 Service conductor and grounding electrode conductor sizing .... Table 310.15(B)(7) and Table 250.66

Footnote

E3603.2 Ungrounded service conductors for accessory buildings and structures ................................................................. 230.79(D)
Exception 1 ......................................................................................... 230.42 and 230.79(A)
Exception 2 ......................................................................................... 230.42 and 230.79(B)

E3603.3 Overload protection ................................................................ 230.90
E3603.3.1 Ungrounded conductor ....................................................... 230.90(A)
Exception ......................................................................................... 230.90(A), Exception 3

E3603.3.2 Not in grounded conductor ................................................. 230.90(B)
E3603.3.3 Location .............................................................................. 230.91
E3603.4 Grounding electrode conductor size ....................................... 250.66
E3603.5 Temperature limitations ....................................................... 110.14(C)(1)

SECTION E3604

OVERHEAD SERVICE AND SERVICE-ENTRANCE CONDUCTOR INSTALLATION

E3604.1 Clearances on buildings ......................................................... 230.9
Figure E3604.1 Clearances from building openings ................................ 230.9
E3604.2 Vertical clearances ................................................................. 230.24
E3604.2.1 Above roofs ........................................................................ 230.24(A)
Exception 1 ....................................................................................... 230.24(A), Exception 1
Exception 2 ....................................................................................... 230.24(A), Exception 2
Exception 3 ....................................................................................... 230.24(A), Exception 3
Exception 4 ....................................................................................... 230.24(A), Exception 4
Exception 5 ....................................................................................... 230.24(A), Exception 5

Figure E3604.2.1 Clearances from roofs .............................................. 230.24
E3604.2.2 Vertical clearance from grade ............................................. 230.24(B)
Item 1 ................................................................................................. 230.24(B)(1)
Item 2 ................................................................................................. 230.24(B)(2)
Item 3 ................................................................................................. 230.24(B)(4)

E3604.3 Point of attachment ............................................................... 230.26
E3604.4 Means of attachment ............................................................ 230.27
E3604.5 Service masts as supports ...................................................... 230.28
E3604.6 Supports over buildings ........................................................ 230.29
APPENDIX Q

SECTION E3605  SERVICE-ENTRANCE CONDUCTORS
E3605.1 Insulation of service-entrance conductors .............................................. 230.41
  Exception 1 ................................................................. 230.41, Exception
  Exception 2 ................................................................. 230.41, Exception
E3605.2 Wiring methods for services ..................................................... 230.43
E3605.3 Spliced conductors ................................................................. 230.46
E3605.4 Protection of underground service entrance conductors ...................... 230.50(A)
E3605.5 Protection of service cables against damage .................................... 230.50(B)
E3605.6 Direct sunlight exposure ........................................................ 310.10(D)
E3605.7 Mounting supports ..................................................................... 230.51
E3605.8 Raceways to drain .................................................................... 230.53
E3605.9 Overhead service locations ...................................................... 230.54
E3605.9.1 Rain-tight service head .......................................................... 230.54(A)
E3605.9.2 Service cable, service head or gooseneck ................................... 230.54(B)
E3605.9.3 Service head location ............................................................. 230.54(C)
  Exception ................................................................. 230.54(C), Exception
E3605.9.4 Separately bushed openings ...................................................... 230.54(E)
E3605.9.5 Drip loops ........................................................................ 230.54(F)
E3605.9.6 Conductor arrangement ........................................................ 230.54(G)
E3605.9.7 Secured ........................................................................... 230.54(D)

SECTION E3606  SERVICE EQUIPMENT—GENERAL
E3606.1 Service equipment enclosures ...................................................... 230.62
E3606.2 Working space ........................................................................ 110.26
E3606.3 Available short-circuit current .................................................... 110.9
E3606.4 Marking ................................................................................ 230.66

SECTION E3607  SYSTEM GROUNDING
E3607.1 System service ground ............................................................... 250.20(B)(1) and 250.24(A)
E3607.2 Location of grounding electrode conductor connection .................... 250.24(A)(1) and (A)(5)
E3607.3 Buildings or structures supplied by feeder(s) or branch circuit(s) .... 250.32(A)
  Exception ........................................................................ 250.32(A), Exception
E3607.3.1 Equipment grounding conductor .............................................. 250.32(B) and Table 250.122
E3607.3.2 Grounded conductor ............................................................ 250.32(B)(1), Exception
E3607.4 Grounding electrode conductor .................................................. 250.24(D)
E3607.5 Main bonding jumper ............................................................... 250.24(B)
E3607.6 Common grounding electrode ...................................................... 250.58

SECTION E3608  GROUNDING ELECTRODE SYSTEM
E3608.1 Grounding electrode system ....................................................... 250.50
  Exception ........................................................................ 250.50, Exception
E3608.1.1 Metal underground water pipe ............................................... 250.52(A)(1)
E3608.1.1.1 Interior metal water piping ............................................... 250.68(C)(1)
E3608.1.2 Installation ....................................................................... 250.53(D) and 250.53(E)
E3608.1.2.1 Concrete-encased electrode ........................................... 250.52(A)(3)
E3608.1.3 Ground rings ...................................................................... 250.52(A)(4) and 250.53(F)
E3608.1.4 Rod and pipe electrodes ....................................................... 250.52(A)(5)
APPENDIX Q

E3608.1.4.1 Installation .......................... 250.53(G)
E3608.1.5 Plate electrodes .......................... 250.52(A)(7) and 250.53(H)
E3608.1.6 Other listed electrodes ......................... 250.52(A)(6)
E3608.2 Bonding jumper .......................... 250.53(C)
E3608.3 Rod, pipe and plate electrode requirements .......... 250.53(A), (B) and (E)
E3608.4 Supplemental electrode required ................. 250.53(A)(2) and (A)(3)
E3608.5 Aluminum electrodes ........................ 250.52(B)(2)
E3608.6 Metal underground gas piping system .............. 250.52(B)(1)

SECTION E3609 BONDING

E3609.1 General ........................................ 250.90
E3609.2 Bonding of service equipment ................... 250.92(A)
E3609.3 Bonding to other systems ....................... 250.94
E3609.4 Method of bonding at the service ................ 250.92(B)
E3609.4.1 Grounded service conductor ................... 250.92(B)(1)
E3609.4.2 Threaded connections ......................... 250.92(B)(2)
E3609.4.3 Threadless couplings and connectors ............ 250.92(B)(3)
E3609.4.4 Other devices ................................ 250.92(B)(4)
E3609.5 Sizing bonding jumper on supply side of service and main bonding jumper .......... 250.28(D) and 250.102(C)
E3609.6 Metal water piping bonding ....................... 250.104(A)
E3609.7 Bonding other metal piping ....................... 250.104(B)

SECTION E3610 GROUNDING ELECTRODE CONDUCTORS

E3610.1 Continuous .................................... 250.64(C) and (F)
E3610.2 Securing and protection against physical damage ........ 250.64(A) and (B)
E3610.3 Enclosures for grounding electrode conductors .... 250.64(E)
E3610.4 Prohibited use ................................ 250.121

SECTION E3611 GROUNDING ELECTRODE CONDUCTOR CONNECTION TO GROUNDING ELECTRODES

E3611.1 Methods of grounding connection to electrodes .......... 250.70
E3611.2 Accessibility ................................ 250.68(A)
E3611.3 Effective grounding path ........................ 250.68(B)
E3611.4 Interior metal water piping ....................... 250.68(C)(1)
E3611.5 Protection of ground clamps and fittings ............ 250.10
E3611.6 Clean surfaces ................................ 250.12

CHAPTER 37 BRANCH-CIRCUIT AND FEEDER REQUIREMENTS

SECTION E3701 GENERAL

E3701.1 Scope ....................................... None
E3701.2 Branch-circuit and feeder ampacity .................. 210.19(A) and 215.2(A)(1)
E3701.3 Selection of ampacity .......................... 310.15(A)(2), Exception
E3701.4 Branch circuits with more than one receptacle .... 210.19(A)(2)
E3701.5 Multiwire branch circuits ........................ 210.4
E3701.5.1 Disconnecting means .......................... 210.4(B)
E3701.5.2 Grouping .................................. 210.4(D)

2012 SEATTLE RESIDENTIAL CODE 747
APPENDIX Q

SECTION E3702

BRANCH-CIRCUIT RATINGS

E3702.1 Branch-circuit voltage limitations ............................ 210.6(A), (B) and (C)
E3702.2 Branch-circuit ampere rating ........................................ 210.3
E3702.3 Fifteen- and 20-ampere branch circuits .......................... 210.23(A)
E3702.4 Thirty-ampere branch circuits ................................. 210.23(B)
E3702.5 Branch circuits serving multiple loads or outlets .............. 210.23(A)
E3702.6 Branch circuits serving a single motor .......................... 430.22(A)
E3702.7 Branch circuits serving motor-operated and combination loads ... 220.18(A)
E3702.8 Branch-circuit inductive lighting loads ...................... 220.18(B)
E3702.9 Branch-circuit load for ranges and cooking appliances .......... Table 220.55, Note 4
E3702.9.1 Minimum branch circuit for ranges ............................ 210.19(A)(3)
E3702.10 Branch circuits serving heating loads ....................... 422.13; and 424.3(A) and (B)
E3702.11 Branch circuits for air-conditioning and heat pump equipment .... 440.4(B), 440.35 and 440.62(A)
E3702.12 Branch circuits serving room air conditioners ............... 440.62(A)
E3702.12.1 Where no other loads are supplied ......................... 440.62(B)
E3702.12.2 Where lighting units or other appliances are also supplied ... 440.62(C)
E3702.13 Branch-circuit requirement—summary ......................... 210.24 and 210.25

SECTION E3703

REQUIRED BRANCH CIRCUITS

E3703.1 Branch circuits for heating ........................................ 422.12 and 422.12, Exceptions 1 and 2
E3703.2 Kitchen and dining area receptacles ............................. 210.52(B)(1)
E3703.3 Laundry circuit ................................................... 210.11(C)(2); and 210.23(A), Exception
E3703.4 Bathroom branch circuits .............................. 210.11(C)(3)
E3703.5 Number of branch circuits .................................... 210.11(A)
E3703.6 Branch-circuit load proportioning ............................. 210.11(B)

SECTION E3704

FEEDER REQUIREMENTS

E3704.1 Conductor size .................................................. 215.2(A)(3) and (A)(4); 220.40; and Table 310.15(B)(7)
E3704.2 Feeder loads .................................................... 220.40
Table E3704.2(1) Feeder load calculation .............................. Table 220.12, 220.14, Table 220.42(C), 220.50,
220.51, 220.52, 220.53, 220.54, 220.55 and 220.60
Table E3704.2(2) Demand loads for electric ranges, wall-mounted ovens, counter-mounted cooking units and other cooking appliances over 13/4 kVA rating ............... Table 220.55
E3704.3 Feeder neutral load .............................................. 220.61
E3704.4 Lighting and general use receptacle load .................... 220.12, Table 220.12 and 220.14(J)
E3704.5 Ampacity and calculated loads ............................... 220.40
E3704.6 Equipment grounding conductor .............................. 215.6

SECTION E3705

CONDUCTOR SIZING AND OVERCURRENT PROTECTION

E3705.1 General ............................................................. 310.15(A)
Table E3705.1 Allowable ampacities .................................. Table 310.15(B)(16)
E3705.2 Correction factors for ambient temperatures .................. Table 310.15(B)(16)
Table E3705.2 Ambient temperature correction factors ................ Table 310.15(B)(2)(a)
E3705.3 Adjustment factor for conductor proximity .................... 310.15(B)(3)(a)
Table E3705.3 Conductor proximity adjustment factors ............... Table 310.15(B)(3)(a)
E3705.4 Temperature limitations ...................................... 110.14(C)

### SECTION E4206: EQUIPMENT INSTALLATION

| E4206.1 | Transformers .................................................. 680.23(A)(2) |
| E4206.2 | Ground-fault circuit-interrupters .......................... 680.23(B)(1) and (2) |
| E4206.3 | Wiring on load side of ground-fault circuit-interrupters and transformers .......... 680.23(F)(3) |
| E4206.4 | Underwater luminaires ....................................... 680.23(A)(1), (3) and (7) |
| E4206.4.1 | Maximum voltage .............................................. 680.23(A)(4) |
| E4206.4.2 | Luminaire location ........................................... 680.23(A)(5) and (6) |
| E4206.5 | Wet-niche luminaires ....................................... 680.23(B)(1), (2), (4) and (5) |
| E4206.5.1 | Servicing .................................................. 680.23(B)(6) |
| E4206.6 | Dry-niche luminaires ....................................... 680.23(C)(1) and (2) |
| E4206.7 | No-niche luminaires ........................................ 680.23(D) |
| E4206.8 | Through-wall lighting assembly ............................ 680.23(E) |
| E4206.9 | Junction boxes and enclosures for transformers or ground-fault circuit-interrupters .... 680.24(A) through (E) |
| E4206.9.1 | Junction boxes ............................................... 680.24(A)(1) and (2) |
| E4206.9.2 | Other enclosures ............................................ 680.24(B)(1) and (2) |
| E4206.9.3 | Protection of junction boxes and enclosures .................. 680.24(C) |
| E4206.9.4 | Grounding terminals ........................................ 680.24(D) |
| E4206.9.5 | Strain relief ................................................ 680.24(E) |
| E4206.10 | Underwater audio equipment ................................. 680.27(A) |
| E4206.10.1 | Speakers ...................................................... 680.27(A)(1) |
| E4206.10.2 | Wiring methods ............................................... 680.27(A)(2) |
| E4206.10.3 | Forming shell and metal screen ............................ 680.27(A)(3) |
| E4206.11 | Electrically operated pool covers .......................... 680.27(B)(1) and (2) |
| E4206.12 | Electric pool water heaters ................................ 680.27(C) |
| E4206.13 | Pool area heating ........................................... 680.27(C) |
| E4206.13.1 | Unit heaters .................................................. 680.27(C)(1) |
| E4206.13.2 | Permanently wired radiant heaters ......................... 680.27(C)(2) |
| E4206.13.3 | Radiant heating cables prohibited ......................... 680.27(C)(3) |

### SECTION E4207: STORABLE SWIMMING POOLS

| E4207.1 | Pumps ...................................................... 680.31 |
| E4207.2 | Ground-fault circuit-interrupters required ............... 680.32 |
| E4207.3 | Luminaires ................................................ 680.33 |
| E4207.3.1 | Within the low voltage contact limit ...................... 680.33(A) |
| E4207.3.2 | Over the low voltage contact limit ......................... 680.33(B) |
| E4207.4 | Receptacle locations ...................................... 680.34 |

### SECTION E4208: SPAS AND HOT TUBS

| E4208.1 | Ground-fault circuit-interrupters .......................... 680.44(A) and (B) |
| E4208.2 | Electric water heaters ...................................... 680.43(G) |
| E4208.3 | Underwater audio equipment ................................ 680.43(G) |
| E4208.4 | Emergency switch for spas and hot tubs .................... 680.41 |
APPENDIX Q

SECTION E4209
E4209.1  Ground-fault circuit-interrupters ............................................. 680.71
E4209.2  Other electric equipment .............................................................. 680.72
E4209.3  Accessibility .................................................................................. 680.73
E4209.4  Bonding ......................................................................................... 680.74

CHAPTER 43  CLASS 2 REMOTE-CONTROL, SIGNALING AND POWER-LIMITED CIRCUITS
SECTION E4301  GENERAL
E4301.1  Scope .............................................................................................. 725.1
E4301.2  Definitions ....................................................................................... Article 100 and 725.2

SECTION E4302  POWER SOURCES
E4302.1  Power sources for Class 2 circuits ..................................................... 725.121(A)
E4302.2  Interconnection of power sources ..................................................... 725.121(B)

SECTION E4303  WIRING METHODS
E4303.1  Wiring methods on supply side of Class 2 power source ..................... 725.127
E4303.2  Wiring methods and materials on load side of Class 2 power source ........................................................................... 725.130, 725.154, Table 725.154(G), 725.179
Table E4303.2  Cable uses and permitted substitutions .................................. 725.154 and Table 725.154(G)
E4303.2.1  Type CL2P cables ......................................................................... 725.154(A) and 725.179(A)
E4303.2.2  Type CL2 cables ............................................................................ 725.179(C)
E4303.2.3  Type CL2X cables ........................................................................ 725.154(E)(4) and 725.179(D)
E4303.2.4  Marking ......................................................................................... 725.179(L)

SECTION E4304  INSTALLATION REQUIREMENTS
E4304.1  Separation from other conductors .................................................... 725.136(A), (B), (C) and (D)
E4304.2  Other applications ........................................................................... 725.136(I)
E4304.3  Class 2 circuits with communication circuits ................................... 725.139(D)
E4304.4  Class 2 cables with other circuit cables .............................................. 725.139(E)(1) through (5)
E4304.5  Installation of conductors and cables .............................................. 300.11(B)(2), 725.21, 725.24 and 725.143
E4304.6  Bushing ......................................................................................... 725.3(J)
