Example: neighborhood greenway improvements to help people cross busy streets.

Example: microsurfacing pavement repair work.

WHAT IS A NEIGHBORHOOD GREENWAY?
Neighborhood greenways are safer, calmer residential streets for you, your family, and neighbors that make people walking and biking the priority. We will add signs and pavement markings to help people find their way and make it easier to cross busy streets with curb ramps, crosswalks, and flashing lights (see map for locations of crossing improvements). We'll also make pathway improvements where the route connects between streets and build a new connection to the Mountains to Sound Trail.

We want to keep you informed!

HOW WAS THIS ROUTE SELECTED?
Our planning team worked with community members since 2014 to determine the best north – south route in Rainier Valley. Hundreds of people gave feedback through public meetings, site visits with community members, an online survey, and direct communication. Based on that input, we selected residential streets that have lower car volumes and speeds, aren't too steep, and connect people to destinations like schools, libraries, local businesses, community centers, and parks.

TREE PRUNING
Before the neighborhood greenway improvements are built, our Urban Forestry team will need to prune any vegetation and trees that extend into the street. The purpose of the tree pruning is to make sure street signs are visible, the sidewalk area is clear for people walking, and to allow large equipment through without impacting the trees. We are following up with individual homes that have trees that need pruning – please be on the lookout for a separate mailer with more information.

MICROSURFACING
Crews will complete “microsurfacing” on about half of the streets along the neighborhood greenway route. Microsurfacing is a cost-effective method to maintain roads by coating them with a top layer of asphalt mix that extends the life of the pavement. The streets that are being microsurfaced are shown on the map in orange. If your street is being microsurfaced, you will receive a separate mailer with more details on what to expect.

RAINIER VALLEY NORTH-SOUTH NEIGHBORHOOD GREENWAY

Legend

- ⋯ Rainier Valley Neighborhood Greenway
- Existing family-friendly routes
- Microsurfacing (pavement maintenance work)
- Street repair
- Pathway improvements
- ◆ Flashing beacon
- ◆ Crossing improvements

SCHEDULE
 Our anticipated schedule is below, but it may change depending on weather and coordination with nearby projects.

Spring 2017
 Filling potholes and patching streets to prepare for microsurfacing

Mid-May to mid-June 2017
 Tree pruning along whole neighborhood greenway route

Mid-summer 2017
 Microsurfacing work

Late summer 2017 to spring 2018
 Neighborhood greenway construction

2018
 Curb ramps installed along microsurfacing streets

Future all ages and abilities connection opportunities to be studied
