Summary

The Privacy Office received 52 total requests for privacy reviews during Q1 of 2022. 52 technologies and projects were applicable for this report. None of the technologies reviewed during Q1 of 2022 were determined to be surveillance technology.

About This Report

The Seattle City Council passed SMC 14.18 (“Surveillance Ordinance”) to provide greater transparency to City Council and the public when the City acquires technology that meets the City’s criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the CTO to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City’s website.

How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City’s definition of "surveillance technology" as defined by the City’s Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between January 1, 2022 and March 31, 2022. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.
# Table of Department Acronyms

Surveillance Technologies

No technologies reviewed during Q1 of 2022 were determined to be surveillance technologies.
Non-Surveillance Technologies

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix, below.

Department: SCL  
Case No.: 3636

Criteria

Does the technology meet the definition a Surveillance Technology?

No  
Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A  
Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A  
Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

N/A  
Technologies used for everyday office use.

N/A  
Body-worn cameras.

N/A  
Cameras installed in or on a police vehicle.

N/A  
Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.

N/A  
Cameras installed on City property solely for security purposes.

N/A  
Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A  
Technology that monitors only City employees in the performance of their City functions.

Do any of the following inclusion criteria apply?

N/A  
The technology disparately impacts disadvantaged groups.
There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

**Result**

**Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

2/4/2022

Technology Description

<table>
<thead>
<tr>
<th>Technology Name</th>
<th>FEMA's Benefit-Cost Analysis (BCA) Toolkit Version 6.0</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>Benefit-Cost Analysis (BCA) is a method that determines the future risk reduction benefits of a hazard mitigation project and compares those benefits to its costs. The result is a Benefit-Cost Ratio (BCR). A project is considered cost-effective when the BCR is 1.0 or greater. Applicants and subapplicants must use FEMA-approved methodologies and tools—such as the BCA Toolkit—to demonstrate the cost-effectiveness of their projects.</td>

Criteria

Does the technology meet the definition a Surveillance Technology?

No

Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A

Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A

Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

N/A

Technologies used for everyday office use.

N/A

Body-worn cameras.

N/A

Cameras installed in or on a police vehicle.

N/A

Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.

N/A

Cameras installed on City property solely for security purposes.

N/A

Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A  Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

<table>
<thead>
<tr>
<th>N/A</th>
<th>The technology disparately impacts disadvantaged groups.</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td>There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.</td>

Technology Description

<table>
<thead>
<tr>
<th>Technology Name</th>
<th>Yubikey 5 Series Hardware Authenticator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>The Yubikey 5 series is a hardware authenticator providing strong authentication options. Yubikey supports strong two-factor authentication, multi-factor and passwordless authentication capabilities. Yubikey can be used for access hundreds of applications including O365, Remote Access/VPN and at computer login (workstation, laptop login). We are looking at the below three scenarios for initial use of these hardware tokens. 1) enable remaining City of Seattle employees with a mechanism to use Azure Multifactor Authentication (MFA) when not on the city’s network. There is a sizable number of employees that do not have city issued cell phones. Yubikey will be used to access O365 or any other web-based City applications that are enabled for MFA (example: timelabor.seattle.gov). Certain field employees are often working in areas of low or no cellular coverage. Yubikey can be used for logging in to their laptops/tablets 2) Administrator access into Azure, AWS, Server, and workstation access.</td>

<td>Replacement Servers for NICE 911 Calls Recording System at the Fire Alarm Center</td>
<td>The 3 Windows 2008 servers at the Fire Alarm Center are at end of life and need to be replaced. These servers are running the NICE recording system that records all 911 calls at the Fire Alarm Center. The calls are recorded for quality assurance and firefighter safety. All the calls have a 90 day retention policy set and are automatically deleted off the servers after 90 days. We are moving from the NICE vendor to the Stancil vendor to get better service from the vendor and save money. The Stancil system has been used by City Light for many years at their call center. There is no additional functionality being implemented with this system. It is a like for like replacement.</td>

Technology Description

<table>
<thead>
<tr>
<th>Technology Name</th>
<th>SFD Incident Safety Officer Report (ISO) Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Description</td>
<td>The SFD ISO application allows users in the Safety division of the Seattle Fire Department to write reports on incidents that the department is dispatched to. It will only be accessed from the City of Seattle private network, by authorized users (authenticated via Active Directory). Incident data is pulled from the Computer Aided Dispatch (CAD) reporting server, an on-premises SQL Server instance. Report data, which is comprised of freeform narrative, uploaded photos, answers to defined sets of questions, and which personnel served in certain roles on the incident, is saved to an on-premises SQL Service database. This modernized app replaces the functionality present in an existing but very outdated ISO application.</td>

Do any of the following exclusion criteria apply?

N/A Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A Technologies used for everyday office use.
N/A Body-worn cameras.
N/A Cameras installed in or on a police vehicle.
N/A Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A Cameras installed on City property solely for security purposes.
| **N/A** | Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs. |
| **N/A** | Technology that monitors only City employees in the performance of their City functions |

**Do any of the following inclusion criteria apply?**

| **N/A** | The technology disparately impacts disadvantaged groups. |
| **N/A** | There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service. |
| **N/A** | The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection. |
| **N/A** | The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice. |

**Result**

**Does the technology meet the criteria for surveillance technology and require a review?**

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Criteria

Does the technology meet the definition a Surveillance Technology?

No

Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

N/A Technologies used for everyday office use.

N/A Body-worn cameras.

N/A Cameras installed in or on a police vehicle.

N/A Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.

N/A Cameras installed on City property solely for security purposes.

N/A Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.
