

Urban Forestry Commission - Project/Policy Review

(Adopted 7-31-12)

Name of Project:

Purpose:

Name of City Department or Private Entity:

Contact:

Email:

The Urban Forestry Commission requests that presenters review and complete the following general questions as applicable to the project being considered:

- Please name department lead for this project
- Please verify the City department permitting lead for this project:
- Identify other city departments that may have an interest or role:
- Please list city codes or ordinances that may be a factor for this project:
- Is this project requesting any policy or permit exemptions? (i.e. from DPD or SDOT)
- Does this project link (within ½ mile) to another significant project, site or city park? Y/N If so please describe.
- Does this project involve the use of any public funds (city, county, state or federal)? Y/N Please provide source and amount.
- How does this project tie into the goals of the urban forest management plan? What are the specific goals for this project?
- Are there impacts to existing trees or vegetation? Y/N Please describe: (include positive or negative impacts including maintenance)
- Does this project involve invasive removal (trees or vegetation)? Y/N If so please describe:
- Does this project involve re-vegetation with native species? Y/N If so please describe extent:
- Is there a long term maintenance plan associated with this project?
- Does this project involve the planting of street trees? Has this project allocated for early street tree management such as pruning within the first 7 years?
- Will this project/policy promote an increase in tree canopy from existing conditions through the number and type of trees planted (or required), also considering potential trees removed? Please explain.
- Will this project/policy improve the overall ecosystem health of the affected site (or citywide if applicable) through benefits to habitat from trees encouraged, planted, or retained? Please explain.
- Does this project/policy promote community outreach related to the urban forest? Yes/No
- Are there any unique conditions or unique trees associated with this project?
- Describe the benefit of this project at 20 years: (i.e. size and mix of trees; extent of vegetation; canopy coverage)
