EXECUTIVE SUMMARY

City of Seattle Finance and Administrative Services commissioned SoundEarth Strategies, Inc. to complete a Phase I Environmental Site Assessment of Fire Station 20 located at 3205 13th Avenue West in Seattle, Washington (the Property). The purpose of this environmental site assessment is to identify, to the extent feasible, recognized environmental conditions (RECs) that may have resulted from the use, manufacture, storage, and/or disposal of hazardous or toxic substances that could affect the future acquisition and/or development of the Property. The scope of work included a review of historical documents regarding the Property, review of current federal and state lists citing known and potentially contaminated sites, interviews with present owners and site managers, a Property reconnaissance, and preparation of this report.

Based on information reviewed in the course of this investigation and as discussed in appropriate sections of this report, the following is a brief summary of the historical development and uses of the Property. The Property was initially developed with a residential structure in 1905. The Property was vacant from at least 1930 until the construction of the existing fire station in 1949. The fire station was originally heated by an oil-burning furnace, the fuel for which was stored in a 1,500 gallon heating oil tank, located on the southeast corner of the Property. The heating oil tank was closed in place in 1998. The current heating system is powered by natural gas.

A 500 gallon diesel tank was present on the Property from 1982 to 1999, when it was closed in place.

The station has undergone a remodel of the interior in 1997, and is still in use as an operational fire station. Surrounding properties are primarily residential.

The following recognized environmental conditions were identified during the course of our investigation:

- **The historical use and storage of diesel fuel at the Property.** A 500-gallon capacity diesel underground storage tank (UST) was closed in place in 1999. The UST was emptied and cleaned prior to closure; however, no documentation of confirmation soil sampling was found for this UST. The historical use and storage of diesel fuel constitutes a REC with a moderate risk for impacts to the Property.
- **The historical use and storage of heating oil at the Property.** A 1,500-gallon capacity heating oil tank was closed in place in 1998. The UST was emptied and cleaned prior to closure; however, no documentation of confirmation sampling was found for this UST. The historical use and storage of heating oil constitutes a REC with a moderate risk for impacts to the Property.
- **The presence of asbestos-containing materials, lead paint, and polychlorinated biphenol (PCB)-containing light ballasts.** These materials, which were identified during a hazardous building material survey conducted in 1999, are not Comprehensive Environmental Response, Compensation, and Liability Act-related issues and in their current condition, they do not appear

EXECUTIVE SUMMARY (CONTINUED)

to be RECs. However, in the event of future demolition or remodeling, the materials will require proper abatement and disposal and therefore constitute a business environmental risk.

This executive summary is presented solely for introductory purposes and the information contained in this section should be used only in conjunction with the full text of this report. A complete description of the project, Property conditions, investigative methods, and investigation results is contained within this report.

1.0 INTRODUCTION

1.1 PURPOSE OF ASSESSMENT

SoundEarth Strategies, Inc. (SoundEarth) was commissioned by the City of Seattle Finance and Administrative Services (FAS) to complete a Phase I Environmental Site Assessment (ESA) of Fire Station 20 located at 3205 13th Avenue West in Seattle, Washington (the Property). The primary purpose of this ESA is to identify, to the extent feasible, recognized environmental conditions (RECs) resulting from the use, manufacture, storage, and/or disposal of hazardous or toxic substances that could affect the future acquisition and/or development of the Property.

This study is intended to satisfy the level of effort often referred to as "all appropriate inquiry" in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 USC § 9601, with the objective of allowing City of Seattle FAS to qualify for the landowner liability protections afforded by CERCLA.

1.2 METHODOLOGY/SCOPE OF WORK

This Phase I ESA was conducted in accordance with procedures outlined in American Society for Testing and Materials (ASTM) E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. ASTM E1527-13 uses the term "recognized environmental conditions" to assess environmental risks associated with a property. The term is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Two additional categories of RECs are included in ASTM E1527-13: historical recognized environmental conditions and controlled recognized environmental conditions. ASTM E1527-13 uses the term "historical recognized environmental condition" to define environmental risks associated with "...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls." A "controlled recognized environmental condition" is defined as "...a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority...with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

The scope of work for this Phase I ESA included the following tasks:

- A review of various sources of historical information dating back to 1905, which are identified in Section 4.0, including reverse city street directories (such as those published by Polk, Inc.), Sanborn Fire Insurance Maps (Sanborn Maps), Kroll Atlases, local planning and assessment records, and available aerial photographs of the Property and vicinity.
- A review of current federal databases, including the United States Environmental Protection Agency (EPA) Comprehensive Environmental Response, Compensation, and Liability Information System database, the EPA National Priority List, the EPA Resource Conservation and Recovery Act (RCRA) Notifiers, RCRA Corrective Action Report, Facility Index System, Emergency Response Notification System, and other lists.
- A review of current state databases, including the listing of underground storage tanks (USTs), Leaking Underground Storage Tanks, solid waste facilities, Voluntary Cleanup Program sites, Confirmed and Suspected Contaminated Sites and other ASTM standard databases.
- A review of United States Geological Survey (USGS) topographic maps to identify the physiographic setting of the Property.
- A reconnaissance of the Property and surrounding area to evaluate the current operations and look for visual and/or olfactory evidence of contamination, such as stained soil, unusual odors, distressed vegetation, pipes, drums, oil sheens and/or discolored water, and improper manufacturing or waste disposal practices.
- An interview with Ms. Sabrina Buchanan, of City of Seattle Finance and Administrative Services (User representative). Written inquiries were sent to the Property owners. An inquiry was also made with Mr. Eric Peterson, the manager at the station, and Ms. Iris Murphy of the Seattle Fire Marshal's Office Records Division regarding information that they may have regarding the Property.
- The preparation of this report.

1.3 LIMITATIONS OF REPORT

This Phase I ESA report is for the exclusive use of the City of Seattle FAS. The purpose of this report is to provide the client with an assessment of the potential for the presence of contamination on the Property. Phase I ESAs are non-comprehensive and may not identify all environmental risk associated with the Property. This study did not include an investigation for the presence of asbestos-containing materials, lead-based paint, radon gas, electro-magnetic fields from high-voltage power transmission lines, wetlands, endangered species, floodplains, vapor intrusion, or other issues not described in the aforementioned scope of work or within the ASTM Standard E1527-13 guidance document.

Within the limitations of scope, schedule, and budget, our services have been executed in general accordance with procedures specified in ASTM E1527-13. Because the SoundEarth report is based upon readily available and reasonably ascertainable information, the accuracy of which was not verified,

SoundEarth cannot and does not guarantee that the Property is free of hazardous or potentially hazardous materials or conditions, or that latent or undiscovered conditions will not become evident in the future. Since Property activities beyond the control of SoundEarth could change at any time after the completion of this assessment, the observations, findings, and opinions can only be considered valid as of the date hereof. This report should not be relied upon after 180 days from the date it was issued.

2.0 PROPERTY DESCRIPTION

The following subsections provide a summary of the location, legal description, and current use of the Property, as well as a discussion of surrounding land use.

2.1 LOCATION AND LEGAL DESCRIPTION

The Property consists of a rectangular-shaped tax parcel (King County Parcel No. 2770604505) that covers approximately 6,000 square feet (0.14 acres) of land in Township 25/Range 3/Section 13. The Property is located at 3205 13th Avenue West in Seattle, Washington, approximately 2.5 miles northwest of downtown Seattle, Washington, as shown in Figure 1. Figure 2 depicts a plan view/layout of the Property. According to the King County iMap application, the Property is located at an approximate elevation of 147 to 160 feet above mean sea level, with the highest elevations on the eastern portion of the Property.

The following is a legal description of the Property:

GILMAN ADD, PLAT BLOCK:35 PLAT LOT 14, SEATTLE, IN KING COUNTY WASHINGTON.

2.2 STRUCTURES AND IMPROVEMENTS

The Property is currently occupied by a 1949-vintage, 1-story building that encloses approximately 2,856 square feet of space and includes a finished basement. The masonry-framed structure is heated by natural gas. Additional improvements include a parking area on the western portion of the Property, as shown on Figure 2. Photographs taken during the Property reconnaissance are included as attachments to this report.

Potable water and sewer service are provided to the Property by Seattle Public Utilities. According to sewer cards on file with the City of Seattle Department of Planning and Development, the sanitary sewer was connected to the on-Property building in 1949. Information regarding the sewer system used at the Property prior to 1949 was not observed in the available public record. Puget Sound Energy provides natural gas, and Seattle City Light provides electricity to the building. Solid waste disposal and recycling services are provided by Waste Management. No evidence of potable or process water supply wells on the Property was found.

2.3 CURRENT PROPERTY ZONING AND USE

According to King County Tax Assessor records, the Property is zoned SF 5000, which is used for single-family residential purposes. The building is currently in use as a fire station. Exterior areas of the Property include a parking lot and lawn.

2.4 ADJOINING PROPERTIES

Development in the vicinity of the Property is primarily residential. Uses of adjoining properties at the time of the SoundEarth Property reconnaissance are summarized below, and are also shown on Figure 2.

- **North.** The property to the north is developed with a single-family residence.
- **East.** Single-family residences are located to the east of the Property, across 13th Avenue West.
- **South.** The two properties to the south are occupied by single-family residences.
- **West.** A parking lot is located across an alley to the west of the Property, with a church across 14th Avenue West beyond.

2.5 GEOLOGIC CONDITIONS

Geologic conditions often influence the environmental conditions of a property. Underlying soil types and bedrock formations may facilitate or impede the migration of chemical contaminants in groundwater or soil vapor and may be a source of contaminants such as radon and metals. This section of the report summarizes known geologic factors and conditions that may impact the Property with regard to environmental concerns.

2.5.1 Geology

The Geologic Map of Seattle—A Progress Report (Troost et al. 2005), indicates that the Property is underlain by advance outwash deposits, consisting of a dense to very dense, predominantly medium grained sand with hard silt beds common throughout.

Pacific Testing Laboratories conducted a foundation investigation at a site located approximately 100 feet northwest of the Property in 1986. Four test borings were drilled, ranging in depth from 19 to 29 feet below ground surface. The borings encountered approximately 3 to 4 feet of loose silty sand, overlying 20-25 feet of dense silt with some sand and trace gravel.

2.5.2 Hydrologic and Hydrogeologic Environment

Both the King County iMap application and the USGS Topographic Map of the Seattle North, Washington Quadrangle, published in 1983, depict the topography in the vicinity of the Property as sloping downward toward the west. The topographic map depicts the closest surface water body as the Ship Canal, which is located approximately 0.6 miles to the northeast.

Based solely upon inference from local topography, drainage patterns, and surface water flow, it appears that shallow-seated groundwater in the vicinity of the Property flows in a general westerly direction. Based on this inferred groundwater flow direction, potential off-Property sources of chemical contamination that might adversely affect the Property would, therefore, most likely be located to the east in an inferred up gradient hydrologic position relative to the Property.

Review of a subsurface investigation report completed by Pacific Testing Laboratories in 1986 indicated that groundwater was encountered at an approximate depth of 10 feet below ground surface at a location 100 feet northwest of the Property.

2.6 SUMMARY

No issues of potential environmental concern were identified during our review of current Property use conditions. The apparent absence of information regarding the sewer system used at the Property prior to 1949 constitutes a data gap.

3.0 USER-PROVIDED INFORMATION

The following subsections summarize the information provided by the User of this Phase I ESA.

3.1 TITLE RECORDS

A preliminary title report or chain-of-title report was not provided by the client to SoundEarth for review prior to production of this report. These documents may provide information about the Property, including ownership and other interests in the land, easement, and liens. Not all liens, defects, and encumbrances affecting title to the land may be included in the preliminary title report.

Considering the use of the Property as a fire station and the responses to interviews with the User and the Property owner, this data gap is not considered significant.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

According to information provided during an interview with the User (Ms. Sabrina Buchanan, City of Seattle FAS), and responses to the written inquiry with the station manager (Mr. Eric Peterson), there are no environmental liens encumbering the Property or current limitations on either activity or use of the Property.

3.3 SPECIALIZED KNOWLEDGE

No specialized knowledge regarding the Property was provided by City of Seattle FAS.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No Property valuation reduction relating to environmental concerns was reported by City of Seattle FAS.

3.5 OBVIOUS OR COMMONLY KNOWN PROPERTY INFORMATION

Ms. Sabrina Buchanan was unaware of environmental concerns regarding the Property.

3.6 CURRENT OWNER, PROPERTY MANAGER, AND OCCUPANT

King County Assessor records list the owner of the Property as City of Seattle FAS. The Property is currently developed with a fire station and parking area.

3.7 REASON FOR PERFORMING PHASE I ESA

SoundEarth prepared this Phase I ESA at the request of City of Seattle FAS for qualification for Landowner Liability Protection under CERCLA in an effort to identify potential issues of environmental concern associated with the Property in preparation for selling the Property.

3.8 PREVIOUS ENVIRONMENTAL REPORTS

City of Seattle FAS provided SoundEarth with copies of prior environmental reports, which are summarized below.

3.8.1 NHS, Inc. Asbestos Study

NHS, Inc. (NHS) completed a survey to identify asbestos containing materials on July 14, 1986. NHS identified the following asbestos containing materials:

- Thermal System Insulation in the kitchen and boiler room, as well as the crawl space near the main stairwell. The materials were noted to be in excellent condition at the time of the NHS survey.

3.8.2 Clayton Environmental Consultants Hazardous Materials Investigative Report

In 1999, Clayton Environmental Consultants (Clayton) conducted a hazardous materials survey of Fire Station 20. Clayton identified the following hazardous materials:

- Asbestos containing material (ACM) identified was the tar sealant at roof penetrations.
- Lead based paint was found in the garage, kitchen, boiler room, and exterior wall paint.
- Forty polychlorinated biphenol (PCB) containing fluorescent light ballasts were discovered.

3.9 SUMMARY

The ACM, lead-based paint, and PCB-containing light ballasts are not CERCLA issues, but they would constitute a business environmental risk in the event of demolition and/or future disposal.

Otherwise, no issues of potential environmental concern were identified during our review of User-provided information.

4.0 HISTORICAL REVIEW

The history of land use for the Property and surrounding areas was evaluated to identify past uses that might have had adverse effects on the environmental conditions, primarily through the use of potentially hazardous materials. The following history of the Property and surrounding parcels is based on a compilation of information obtained from the following resources:

- King County Assessment records reviewed online and at Puget Sound Regional Archives
- City of Seattle Department of Planning and Development building permit files
- City of Seattle Engineering Department sewer cards
- Polk City Directories
- Historical City Atlases and Maps – Sanborn Maps and Kroll Atlases of Seattle
- Aerial Photographs

Selected copies of the information sources described above are included in the Photographs and Appendix A of this report.

4.1 HISTORICAL USE OF THE PROPERTY

CHRONOLOGICAL DEVELOPMENT AND USE HISTORY FOR THE PROPERTY

Date(s)	Source	Description	Potential Issues of Environmental Concern
1905	Sanborn Map	The Property is partially occupied by a structure. The heating source is not indicated.	None
1917	Sanborn Map	A smaller structure is present on the Property.	None
1930	Sanborn Map	The Property appears vacant	None
1944	Aerial Photo	The Property appears vacant	None

Date(s)	Source	Description	Potential Issues of Environmental Concern
1949	Historical Tax Records	A masonry-framed, one-story building with basement was constructed on the Property. Heating is reportedly provided by an oil burning unit.	The use and storage of heating oil.
1950 through present day	Historical City Directories, Sanborn Map, Aerial Photos	The Property is in use as a fire station for the City of Seattle.	None
1982	Fire department records	A 500 gallon UST containing diesel was installed at the Property.	The use and storage of diesel.
1997	Seattle Department of Planning and Development	Fire Station 20 is remodeled.	None
1998	Fire department records	The 1,500 gallon heating oil tank was cleaned and closed in place.	The use and storage of heating oil.
1999	Fire department records	The 500 gallon diesel UST was cleaned and closed in place in 1999.	The use and storage of diesel.
2006, 2009, 2011	Aerial photos	No significant changes were observed to the Property on aerial photos from 2006 through 2011.	None

4.2 HISTORICAL USE OF ADJOINING PROPERTIES

This section describes the findings of SoundEarth’s research into the historical usage of the adjoining properties. These adjoining properties are depicted on Figure 2.

North-Adjoining Property

The north-adjoining property was developed as a single-family residence in 1900. Historical tax records indicate the residence was heated using a wood stove. The existing residence is heated by natural gas.

East-Adjoining Property

The east-adjoining property, located across 13th Avenue West, was developed as a single-family residence in 1914, and was reportedly to have been heated with a hot water heating system. The existing residence is heated by natural gas.

South-Adjoining Property

The south-adjoining parcels were developed as single-family residences in 1908 and 1914. The southeastern adjoining parcel was reportedly heated by a wood stove. The existing residence is heated using electricity. The southwestern adjoining parcel was reportedly heated with a hot air furnace, and the existing residence is heated using natural gas.

West-Adjoining Property

The west-adjoining parcel was developed as a single-family residence in 1913. The residence was demolished in 1961, and the property has been a parking lot since that time. The single-family residence was reportedly heated by a hot air furnace (fuel source not described).

4.3 HISTORICAL USE OF SURROUNDING PROPERTIES

Surrounding properties have been in residential use since 1900. A church was located 300 feet west of the Property since at least 1917.

4.4 SUMMARY

A diesel fuel UST was used on the Property from at least 1982 through 1999, and a heating oil UST was in use from 1949 through 1998. The use and storage of diesel and heating oil are considered potential environmental concerns and are discussed further in Section 9.0.

The adjoining property development, as detailed above, included the following potential environmental concern: the use and storage of heating oil on adjoining properties. This potential environmental concern is discussed further in Section 9.0.

5.0 REGULATORY REVIEW

A review of regulatory agency records was conducted in order to identify known or potential sources of contamination that could adversely impact the Property. Records were obtained using the commercial database search services of Environmental Data Resources (EDR), which queries EPA, state regulatory agency, and other similar databases within the approximate minimum search distances specified in ASTM E1527-13. The commercial database search report was reviewed for accuracy of Property locations and was modified appropriately. Orphan sites (sites that EDR was unable to map) were also reviewed in an effort to evaluate whether any of those sites were also located within the respective search distance. The complete EDR report is included in Appendix B and contains figures showing the locations of the reportable sites within the search distance for each database queried. The databases searched, the corresponding search distance, and the number of sites found within the search distance for each database are summarized in the following table.

Source of Regulatory Information	Acronym	Search Distance	Sites within Search Distance
Federal Databases			
National Priorities List	NPL	1.0 mile	0
National Priorities List Deletions	Delisted NPL	1.0 mile	0
Comprehensive Environmental Response, Compensation, and Liability Information System; also CERCLIS No Further Remedial Action Planned	CERCLIS & CERCLIS-NFRAP	0.5 mile 0.5 mile	0 2
EPA-Listed Brownfields	Brownfields	0.5 mile	0
Resource Conservation and Recovery Act Information - Treatment, Storage, and Disposal Facilities; also RCRA Corrective Action Sites	RCRA TSDF and CORRACTS	0.5 mile 1.0 mile	0 0
Resource Conservation and Recovery Act Hazardous Waste Generators	RCRA GEN	Property & Adjoining Parcels Only	0
Emergency Response Notification System/National Response Center	ERNS/NRC	Property Only	0
State Databases			
Confirmed and Suspected Contaminated Sites List	CSCSL	1.0 mile	38
Confirmed and Suspected Contaminated Sites List – No Further Action	CSCSL NFA	0.5 mile	11
Solid Waste Facilities/Landfill Sites	SWF/LF	0.5 mile	1
Leaking Underground Storage Tanks	LUST	0.5 mile	6
Registered Underground Storage Tanks	UST	Property & Adjoining Parcels Only	1
State-listed Brownfields	Brownfields	0.5 mile	0
Voluntary Cleanup Program	VCP	0.5 mile	7
Independent Cleanup Reports	ICR	0.5 mile	13
Engineering & Institutional Controls	ENG/INST CONTROL	Property Only	1

The Property was listed on the UST database as having a 500 gallon capacity UST containing diesel. The UST status is closed in place. The on-Property heating oil UST is exempt from UST regulations, and would therefore not be expected to be listed on the UST database.

According to the EDR report, numerous other sites within the applicable search distances appeared on at least one of the ASTM Standard databases listed above. However, none of these sites are considered to represent a potential environmental concern for the Property for the following reasons:

- 28 sites are listed only as having been a RCRA notifier and are located at least 250 feet from the Property.
- 13 sites are listed on a database as having had a release to the environment, but are located over 0.1 miles away from the Property and have been reportedly cleaned up, issued a No Further Action determination, or involved soil impacts only.
- 20 sites are listed on a database as having had a release to the environment where groundwater was either confirmed or suspected to have been impacted; however, the sites are all located over 0.1 miles and in inferred cross- or downgradient hydrologic positions relative to the Property.

Regulatory records for the Property that were available on Washington State Department of Ecology's (Ecology) website were reviewed, regarding USTs on the Property. Files were requested from Ecology, but were not available at the time of the writing of this report. Information from the City of Seattle Fire Department confirmed that USTs were rinsed out and closed in place in 1998-1999. Although no evidence of a release was documented during the closure of the USTs, no documentation of confirmation soil sampling was found; therefore, the former USTs are considered to be a potential issue of environmental concern.

6.0 PROPERTY RECONNAISSANCE

Ada Hamilton, a SoundEarth Project Scientist, visited the Property on February 12, 2014, to review conditions and land use practices on the Property and on adjoining and nearby properties. SoundEarth was escorted by Ms. Sabrina Buchanan, as well as on-site personnel during the Property reconnaissance. The purpose of the Property reconnaissance was to identify readily apparent indications of hazardous or potentially hazardous substances or petroleum products that were historically or are currently used, generated, stored, or disposed of on the Property. Selected photographs taken during the Property reconnaissance are included as an attachment to this report.

6.1 GROUNDS AND BUILDINGS

The following sections provide a description of general conditions and features observed during the Property reconnaissance.

Interior Observations

The fire station includes a garage to house the fire engine and firefighting equipment, as well as a cabinet containing gas cans and retail size containers of automotive fluids. The main floor includes an office, bathroom, and sleeping quarters, as well as a loft storage area. The basement includes a kitchen, additional sleeping quarters, and the boiler room.

Exterior Observations

An asphalt paved parking area is located on the western edge of the Property. A lawn separates the parking area and the building. Additional lawn is located on the eastern portion of the Property, on either side of the driveway leading from the garage. Stormwater appears to be diverted into the alley on the western edge of the Property.

Specific conditions that may or may not result in the presence of RECs to the Property are presented in the following table. Those conditions identified are further discussed below.

Item	Item Present		Description (if present)	Issue of Potential Concern	
	Yes	No		Yes	No
Petroleum Products	X		Two 1-gallon containers of gasoline and retail sized containers of motor oil were observed in the fire station and are used for minor maintenance on vehicles. No spills or stains were observed in the vicinity of the containers.		X
Hazardous Substances	X		Retail size containers of automotive fluids, used for minor maintenance on vehicles, were observed in a cabinet in the fire station. No spills or stains were observed in the vicinity of the containers.		X
Hazardous Waste		X	No hazardous wastes were observed to be generated, stored, or disposed of at the Property.		X
Landfills, Dumps		X	No landfills or dumps were observed on the Property or adjoining properties.		X
Burial Sites or Solid Waste Disposal		X	No evidence of burial sites was observed on the Property or adjoining properties. No solid waste is generated at the Property.		X
Aboveground Storage Tanks (ASTs)		X	None were observed on the Property or adjoining properties.		X
Underground Storage Tanks	X		No surface indications of USTs (vent pipes or fill ports) were observed on the Property or adjoining properties. However, we were aware of the presence and location of the two closed in-place USTs based on the review of historical documents. These areas are currently landscaped.	X	
Drums and Storage Areas		X	None were observed on the Property or adjoining properties.		X
Potential PCB-Containing Equipment		X	None was observed on the Property.		X
HVAC System and Fuel Source	X		The building is heated using natural gas.		X

Item	Item Present		Description (if present)	Issue of Potential Concern	
	Yes	No		Yes	No
Drains, Sumps, Cisterns, or Cesspools	X		Floor drains were observed in the bathrooms. No spills or stains were observed around the floor drains.		X
Pits, Ponds, or Lagoons		X	None were observed on the Property or adjoining properties.		X
Pavement or Soil Stains		X	None were observed on the Property or adjoining properties.		X
Stains or Corrosion on walls		X	None were observed on the Property.		X
Stressed Vegetation		X	None was observed on the Property or adjoining properties.		X
Possible Fill or Grading		X	None was observed on the Property.		X
Chemical/TPH/Swamp-Gas Odors		X	None were observed on the Property or adjoining properties.		X
Stormwater or Surface Erosion		X	Stormwater appears to be directed either into the adjoining alley to the west.		X
Wells and Potable Water		X	No wells were observed on the Property or adjoining properties.		X

6.1.1 Issues of Potential Concern

No potential issues of environmental concern were identified during our reconnaissance of the Property. No vent pipes or fill ports were observed in the location of the USTs that were closed in place. The USTs are discussed further in Section 9.0.

6.2 ADJOINING PROPERTIES

No readily apparent environmental issues were noted on the adjoining properties. The apparent use of the adjoining properties was previously discussed in Section 2.4.

6.3 SUMMARY

Other than the two previously identified USTs, no issues of potential environmental concern were observed during the course of our reconnaissance.

7.0 INTERVIEWS

Information gathered from interviews is summarized below and is included in the appropriate sections of this report.

7.1 INTERVIEW WITH SITE MANAGER/PROPERTY OWNER

The names of key site managers were provided to SoundEarth by City of Seattle FAS. Key site managers are contacted to obtain current and historical environment information concerning the Property. SoundEarth contacted and interviewed Chief Eric Peterson at the time of the Property visit and subsequently by telephone. The following is a summary of the information revealed during the interviews.

- Contact information for the site manager was provided to SoundEarth by City of Seattle FAS. Mr. Eric Peterson, the manager at the station, was contacted by phone. Mr. Peterson indicated that he has been familiar with the Property for 3 years and that he was not aware of any spills or releases of hazardous materials at the Property, or of any environmental liens, activity or land use limitations, or any environmental concerns related to the Property. Mr. Peterson was aware of the closed in place USTs on the Property.

7.2 INTERVIEW(S) WITH OTHERS

SoundEarth made an inquiry with the City of Seattle Fire Marshal's Office pertaining to information that they may have regarding the Property. According to Ms. Iris Murphy of the Fire Marshal's Office Records Division, records indicate that two USTs were closed in place. Ms. Murphy provided documentation that a 500-gallon capacity UST containing diesel was cleaned out and closed in place in 1998, and a 1,500-gallon capacity UST containing heating oil was closed in place in 1999. An on-line search of fire department responses to hazardous material release incidents (since 1995) was conducted on February 10, 2014. The search revealed no record of hazardous material response incidents involving the Property.

7.3 SUMMARY

Other than the USTs, no issues of potential environmental concern were identified during the interviews conducted in the course of this investigation.

8.0 DATA GAPS

Although SoundEarth reviewed the standard historical resources that were reasonably ascertainable regarding the Property, the information reviewed failed to achieve of the historical objectives as discussed below:

- Ecology UST files were requested, but were not available at the time of the writing of this report. Additional information regarding the USTs on the Property could affect the conclusions of this report if a significant release was documented.
- Information regarding the sewer system used at the Property prior to 1949 was not observed in the available public record. However, considering the residential use of the Property, this data gap is not considered to be significant and does not warrant additional investigation.

No other data gaps were encountered in the performance of this Phase I ESA.

9.0 FINDINGS AND OPINIONS

The following issues of potential environmental concern were identified during the course of our investigation:

The historical use and storage of diesel fuel at the Property. A 500-gallon capacity diesel UST was closed in place at the Property in 1999. The UST was emptied and cleaned prior to closure; however, no documentation of confirmation soil sampling was found for this UST. The historical use and storage of diesel fuel constitutes a REC with a moderate risk for impacts to the Property.

The historical use and storage of heating oil at the Property. A 1,500-gallon capacity heating oil tank was closed in place at the Property in 1998. The UST was emptied and cleaned prior to closure; however, no documentation of confirmation soil sampling was found for this UST. The historical use and storage of heating oil constitutes a REC with a moderate risk for impacts to the Property.

The presence of asbestos-containing materials, lead paint, and PCB-containing light ballasts. These materials, which were identified during a hazardous building material survey conducted in 1999, are not CERCLA-related issues and in their current condition, they do not appear to be RECs. However, in the event of future demolition or remodeling, the materials will require proper abatement and disposal and therefore constitute a business environmental risk.

10.0 CONCLUSIONS

SoundEarth performed a Phase I ESA, in conformance with the scope and limitations of ASTM Practice E1527-13, of Fire Station 20 located at 3205 13th Avenue West in Seattle, Washington (the Property). Any exceptions to, or deletions from, this practice are described in Section 12.0 of this report. This assessment has revealed no evidence of RECs in connection with the Property except for the following:

- The historical use and storage of diesel fuel at the Property.
- The historical use and storage of heating oil at the Property.

11.0 PREPARER'S CREDENTIALS

This Phase I ESA was researched and written by Ada Hamilton, an environmental professional as defined in 312.10 of 40 CFR 312. Ms. Hamilton holds a bachelor's degree in geology and has been a professional environmental consultant for more than 12 years (Appendix C). During her career in the environmental field, she has completed more than 200 Phase I ESAs and numerous Phase II ESAs throughout the Pacific Northwest. Mr. Ryan Bixby, an environmental professional as defined in 312.10 of 40 CFR 312, reviewed and interpreted the information upon which this report is based. He holds a bachelor's degree in geology and has been a professional environmental consultant for more than 15 years. During his career

in the environmental field, he has completed more than 500 Phase I ESAs in Washington, Oregon, and California, and he has directed the completion of hundreds more by corporate technical staff. In addition, Mr. Bixby has completed and managed more than 100 Phase II ESAs, and has managed the remediation of more than 20 contaminated properties (Appendix C).

12.0 DEVIATIONS

No deviations from the scope of work were required by Property conditions.

13.0 ADDITIONAL SERVICES

No additional services beyond the scope of work described in Section 1.2 were requested by the client.

15.0 STATEMENT OF THE ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a Property of the nature, history, and setting of the Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set for in 40 CFR Part 312.

A handwritten signature in blue ink that reads "Ada Hamilton". The signature is written in a cursive style and is positioned above a horizontal line.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). SOUND EARTH STRATEGIES used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by SOUND EARTH STRATEGIES. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP..... EDR Proprietary Manufactured Gas Plants

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by SOUND EARTH STRATEGIES of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by SOUND EARTH STRATEGIES of the RCRA-CESQG list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

An online review and analysis by SOUND EARTH STRATEGIES of the WA HSL list, as provided by EDR, and dated 08/26/2013 has revealed that there are 9 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

An online review and analysis by SOUND EARTH STRATEGIES of the WA CSCSL list, as provided by EDR, and dated 10/22/2013 has revealed that there are 38 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

An online review and analysis by SOUND EARTH STRATEGIES of the WA SWF/LF list, as provided by EDR, and dated 09/25/2013 has revealed that there is 1 WA SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

WA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

An online review and analysis by SOUND EARTH STRATEGIES of the WA LUST list, as provided by EDR, and dated 11/19/2013 has revealed that there are 6 WA LUST sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

An online review and analysis by SOUND EARTH STRATEGIES of the WA CSCSL NFA list, as provided by EDR, and dated 10/22/2013 has revealed that there are 11 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by SOUND EARTH STRATEGIES of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/10/2013 has revealed that there are 13 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by SOUND EARTH STRATEGIES of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 32 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

 Seattle WA 98119
 LAT/LONG: 47.6488 / 122.374

CLIENT: Sound Earth Strategies
 CONTACT: Ada Hamilton
 INQUIRY #: 3837102.2s
 DATE: January 22, 2014 8:24 pm

DETAIL MAP - 3837102.2s

-  Target Property
-  Sites at elevations higher than or equal to the target property
-  Sites at elevations lower than the target property
-  Manufactured Gas Plants
-  Sensitive Receptors
-  National Priority List Sites
-  Dept. Defense Sites

-  Indian Reservations BIA
-  Power transmission lines
-  Oil & Gas pipelines from USGS
-  100-year flood zone
-  500-year flood zone

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

USED OIL FUEL MRKTR MEETS SPECS: False

Facility Site ID Number: 66428986
SWC Desc: Not reported
FWC Desc: Not reported
Form Comm: The only waste that is generated at this site is used motor oil and antifreeze. The only waste generated is used motor oil and antifreeze.

Data Year: Not reported
Permit by Rule: FALSE
Treatment by Generator: FALSE
Mixed radioactive waste: FALSE
Importer of hazardous waste: FALSE
Immediate recycler: FALSE
Treatment/Storage/Disposal/Recycling Facility: FALSE
Generator of dangerous fuel waste: FALSE
Generator marketing to burner: FALSE
"Other marketers (i.e., blender, distributor, etc.)": FALSE
Utility boiler burner: FALSE
Industry boiler burner: FALSE
Industrial Furnace: FALSE
Smelter deferral: FALSE
Universal waste - batteries - generate: FALSE
Universal waste - thermostats - generate: FALSE
Universal waste - mercury - generate: FALSE
Universal waste - lamps - generate: FALSE
Universal waste - batteries - accumulate: FALSE
Universal waste - thermostats - accumulate: FALSE
Universal waste - mercury - accumulate: FALSE
Universal waste - lamps - accumulate: FALSE
Destination Facility for Universal Waste: FALSE
Off-specification used oil burner - utility boiler: FALSE
Off-specification used oil burner - industrial boiler: FALSE
Off-specification used oil burner - industrial furnace: FALSE

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Site Description:

Interbay Dump, officially known as Sanitary Fill No. 2 was established in April, 1911, under City Ordinance 15095. The Interbay disposal site was essentially north of Pier 91 Naval Station between Magnolia Bluff and Queen Anne Hill. Fifteenth Avenue West bordered the east; West Wheeler on the south; West Dravus and Barrett Streets on the north; and railroad tracks on the west. It consisted of about 55 acres and received waste primarily from the city west of Aurora Avenue and north of Denny Way.

Past & Present Uses:

This was a low-lying former tidal area filled and made available for recreational purposes. It was turned over to the Park Department when the fill was completed and in 1963, 29 acres were leased and used as a small nine-hole golf course and driving range under private operation of Sterling Theaters, Inc. It is also the site for the Interbay Athletic Field. In 1961, a major portion of the area was made available for overflow parking from the Century 21 World's Fair, although little was used. Facilities exist for soccer, handball and softball. The garbage fill was still "unsettled" in 1971 when additional development was considered, so the major "development" was a "P-Patch" site. Historically, a "shanty town" was found on site between the fire and garbage dumps adjacent to the railroad tracks. A major sociological study of the settlement was conducted in 1937. It was the scene of "intense economic activity" in which quantities of salvage were reclaimed and sold. It was an economic community of self-supporting resident squatters which began in 1929. Soil and foundation studies done by the Seattle Engineering Department at the Interbay Park site in 1977 reported that: "...compact drift of unknown depth but at least 1,000 feet deep lies beneath the site, hence bedrock is at great

MAP FINDINGS

INTERBAY (Continued)

S105805988

depth. Long ago, an arm of Smith Cove extended beneath the park site (as evidence by sea shells in the samples) leaving soft bay deposits. On top of this intertidal soil are stream and pond sediments including peat from the stream that flowed from Salmon Bay to the south. Also, the area adjacent to 15th Avenue West probably is mantled with colluvium or slide debris from the east judging by the layers of soft, gray silt and loose sand. "On top of all these natural soils are hydraulic fills and a sanitary landfill, the latter being up to 40 feet deep consisting of garbage and debris interbedded with the silty sand used for cover." There is some evidence of high groundwater levels (within 7-10 feet of ground surface) in a few soil logs. The uneven rate of settlement has limited development at the site.

Suspected Problems: This particular site was one of the longest fill projects in the City. It started about 1911 and continued to be filled off and on as late as 1968. The original site was a garbage disposal at the north end of Interbay. Residents of the community celebrated its closure in 1926. In the 1930's the "sanitary fill" was in operation again. Garbage was dumped at the southend and northend received combustible wastes and was the "fire dump." The southend received the contents of garbage cans collected from homes and business establishments in the City. No fire was kept at the southend, but sand and earth were spread and watered down over the garbage routinely. Industrial areas ran to the north and south from Elliott Bay to Salmon Bay and their wastewas deposited here. In 1946 there was a major operation and plans were made to bring the fill level with 15th Avenue West. This operation ceased in March 1962, but as a result of the closure of the Ravenna disposal site the Interbay site was reopened on December 1, 1964, to permit rubbish disposal by passenger cars and pickup trucks. This continued until 1968. Eyewitness accounts note that all sorts of material were dumped there, but no extensive drilling has been done to determine exactly what is there. It was also used by the military for waste disposal. In essence any putrescible or non-putrescible waste is there.

Suspected Problems: Despite the age of the garbage at this site, methane generation is vigorous and will continue for years. It has been recommended that special precautions must be taken to reduce noxious and offensive gases from escaping if construction or other ground breaking activities take place. There have been additional precautions against gas buildups at the site to prevent explosive hazards. Additional information shows that a fire occurred at the dump as a result of a gas explosion on property of Standard Oil Company in the mid-1960's. An eyewitness at the site suggests there could be soil contamination from the same company as a result of oil spills. The cracked condition of 17th Avenue West at West Barrett Street is evidence of the tendency of the area to settle. Any buildings on the site would need to be designed for pile support. The potential for high groundwater and consequent leachate formation are also concerns at this site.

Results & Discussion: On June 28, 1984 sixteen bore holes were tested at the Interbay site for methane and non-specific trace gases. These data are presented in Table II. Of note, nine of the fifteen methane samples collected exhibited concentrations within or above the explosive range for methane gas (4% - 18%). Trace gases (non-specific organic/inorganic gas not including methane) were observed ranging from ambient air levels to a peak level of 79.5 parts per million (ppm). Due to the steep banks at the north, west, and south perimeters of the site, groundwater seepage was observed ponding at the base of these embankments. Water sample data, appearing in Table III, reflects relatively low dissolved oxygen concentrations and elevated electrical conductivity values suggesting that leachate from the landfill is seeping through the clay sidecaps and draining off site. The odor, color, and algal build-up in the sampling sites provided a visual indicator for the presence of leachate. An inspection of an existing golf clubhouse at the south end of the landfill revealed severe settling and damage to its concrete foundation indicating the instability of

the site property.
Conclusions & Recommendations: This site exhibited active off gasing of both methane and non-specific organics/inorganics. Concentrated leachate is draining off-site from the steep banks on the north, west and south perimeters of the site. The relatively recent closure of the landfill and the variety of waste placed there are consistent with the field survey findings. We recommend: a. No further building construction be placed on-site until the property has stabilized. b. Soil and surface groundwater samples be taken and analyzed for priority organics and inorganics. c. The bans that border three sides of the property be redesigned to prevent future groundwater seepage.

Date form received by agency: 12/04/1985
Facility name: EPA W SAYBOLT CO INC
Facility address: 3217 20TH AVE W
SEATTLE, WA 98199
EPA ID: WAD092875855
Contact: EPA W SAYBOLT C EPA W SAYBOLT C
Contact address: 3217 20TH AVE W
SEATTLE, WA 98199-2301
Contact country: US
Contact telephone: (000)000-0000
Contact email: Not reported
EPA Region: 10
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Actual:
57 ft.

Owner/Operator Summary:

Owner/operator name: EPA W SAYBOLT C E
Owner/operator address: 3217 20TH AVE W
SEATTLE, WA 98199
Owner/operator country: US
Owner/operator telephone: (000)000-0000
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 05/02/1996
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Airs Minor Details:

EPA plant ID: 110000489846
Plant name: DYNO BATTERY CO
Plant address: 4248 23RD AVE W
SEATTLE, WA 981991211
County: KING
Region code: 10
Dunn & Bradst #: Not reported
Air quality cntrl region: 229
Sic code: 3691
Sic code desc: STORAGE BATTERIES
North Am. industrial classf: 335911
NAIC code description: Storage Battery Manufacturing
Default compliance status: IN COMPLIANCE - INSPECTION
Default classification: POTENTIAL UNCONTROLLED EMISSIONS < 100 TONS/YEAR
Govt facility: ALL OTHER FACILITIES NOT OWNED OR OPERATED BY A FEDERAL, STATE, OR LOCAL GOVERNMENT
Current HPV: Not reported

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

Waste code: D011
Waste name: SILVER
Amount (Lbs): 8843

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 1216

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1216

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Amount (Lbs): 31860

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS
Amount (Lbs): 18559

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.
Amount (Lbs): 241

Waste code: F009
Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.
Amount (Lbs): 7519

Waste code: F019
Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.
Amount (Lbs): 31860

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: TSD IS-Tank System Standards
Date violation determined: 05/03/2013
Date achieved compliance: 08/13/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 01/09/2014
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 01/09/2014
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 11/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 03/10/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 11/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 03/10/2014
	Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 09/10/2013

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013
Date Data Arrived at EDR: 10/02/2013

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013
Date Data Arrived at EDR: 10/02/2013
Date Made Active in Reports: 12/16/2013
Number of Days to Update: 75

Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2013
Date Data Arrived at EDR: 10/02/2013
Date Made Active in Reports: 12/16/2013

Telephone: (206) 553-1200
Last EDR Contact: 01/02/2014
Next Scheduled EDR Contact: 04/14/2014
Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013
Date Data Arrived at EDR: 10/02/2013
Date Made Active in Reports: 12/16/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 12/09/2013
Number of Days to Update: 104	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 12/09/2013
Number of Days to Update: 104	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/20/2013	Source: Department of the Navy
Date Data Arrived at EDR: 08/23/2013	Telephone: 843-820-7326
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 11/18/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/01/2013	Telephone: 202-267-2180
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 66	Next Scheduled EDR Contact: 04/14/2014
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 08/26/2013	Source: Department of Ecology
Date Data Arrived at EDR: 09/13/2013	Telephone: 360-407-7200
Date Made Active in Reports: 10/16/2013	Last EDR Contact: 12/10/2013
Number of Days to Update: 33	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 10/22/2013	Source: Department of Ecology
Date Data Arrived at EDR: 10/25/2013	Telephone: 360-407-7200
Date Made Active in Reports: 01/02/2014	Last EDR Contact: 10/25/2013
Number of Days to Update: 69	Next Scheduled EDR Contact: 02/03/2014
	Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/25/2013	Source: Department of Ecology
Date Data Arrived at EDR: 09/25/2013	Telephone: 360-407-6132
Date Made Active in Reports: 10/16/2013	Last EDR Contact: 12/09/2013
Number of Days to Update: 21	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Annually

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tanks Site List

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 11/19/2013	Source: Department of Ecology
Date Data Arrived at EDR: 11/22/2013	Telephone: 360-407-7183
Date Made Active in Reports: 01/02/2014	Last EDR Contact: 11/22/2013
Number of Days to Update: 41	Next Scheduled EDR Contact: 03/03/2014
	Data Release Frequency: Quarterly

INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 03/01/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2013	Telephone: 415-972-3372
Date Made Active in Reports: 04/12/2013	Last EDR Contact: 10/28/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 02/11/2014
	Data Release Frequency: Quarterly

INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 08/27/2013	Source: EPA Region 7
Date Data Arrived at EDR: 08/27/2013	Telephone: 913-551-7003
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 10/28/2013
Number of Days to Update: 66	Next Scheduled EDR Contact: 02/11/2014
	Data Release Frequency: Varies

INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 11/06/2013	Source: EPA Region 10

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 10/22/2013	Source: Department of Ecology
Date Data Arrived at EDR: 10/25/2013	Telephone: 360-725-4030
Date Made Active in Reports: 01/02/2014	Last EDR Contact: 10/25/2013
Number of Days to Update: 69	Next Scheduled EDR Contact: 02/03/2014
	Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/06/2013

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Date of Government Version: 10/22/2013	Source: Department of Ecology
Date Data Arrived at EDR: 10/25/2013	Telephone: 360-407-7170

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 06/30/2013	Source: Environmental Protection Agency

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Date of Government Version: 09/01/2002	Source: Tacoma-Pierce County Health Department
Date Data Arrived at EDR: 03/24/2003	Telephone: 206-591-6500

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> KING, WA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	53033C0340F - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> SEATTLE NORTH	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile NW
Site Name:	UNITED SERVICES
Site EPA ID Number:	WAD044605244
Groundwater Flow Direction:	NOT AVAILABLE
Inferred Depth to Water:	10 feet to 15 feet
Hydraulic Connection:	The uppermost aquifer is situated in artificial fill composed of sand, gravel, and clay.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
6	1/2 - 1 Mile South	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PILCHUCK

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sandy loam
silt loam
gravelly - loam
silty clay loam
muck
gravelly - coarse sand
loam

Surficial Soil Types: fine sandy loam
silt loam

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX C
QUALIFICATIONS OF THE ENVIRONMENTAL PROFESSIONAL

Ada Hamilton Project Scientist

Ms. Hamilton has more than 10 years of experience in coordinating and conducting environmental investigation and remediation projects. She has completed a wide variety of tasks associated with due diligence, subsurface investigations, and remedial investigations. She excels in report writing, data management, and historical research, as well as project planning coordination.

PROJECT EXAMPLES

- **Phase I Environmental Site Assessments, Seattle Housing Authority, Seattle, Washington.** Reviewed Washington State Department of Ecology (Ecology) documents and archived tax records, building plans, historical maps, and reverse telephone directories; conducted site reconnaissance; synthesized findings into Phase I Environmental Site Assessments (ESA) for several properties.
- **Phase I Environmental Site Assessments, Suquamish Tribe, Suquamish, Washington.** Conducted site assessments to meet Bureau of Indian Affairs requirements for fee-to-trust transfers.
- **Phase II Subsurface Investigation, Aggregate Supply Yard, Snohomish, Washington.** Conducted subsurface investigation at former aggregate supply yard, including soil sampling from test pits, data analysis, and report writing.
- **Phase II Subsurface Investigation, Historical Drycleaners, Enumclaw, Washington.** Coordinated drilling and groundwater sampling field events at a drycleaning facility. Performed data evaluation and prepared deliverables, including a technical memorandum, supplemental investigation work plan, and cost estimate.
- **Site Assessment, Superfund Technical Assessment & Response Team (START), Region X US Environmental Protection Agency.** Conducted site assessments to assess threats to human health and the environment as part of the Superfund Technical Assessment & Response Team in support of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Site assessments included collecting samples of sediment, soil, surface water, groundwater, and air at numerous sites throughout EPA Region X (Washington, Oregon, Idaho, and Alaska).
- **Preliminary Investigation, Fueling Station, Sand Point, Idaho.** Investigated an oil bloom which appeared on a river bank. Coordinated with local tribe to conduct sediment sampling, and used hydrocarbon fingerprinting to identify potentially responsible party.
- **Remedial Investigation/Feasibility Study, Lakewood, Washington.** Assisted in Hydrogen Release Compound (HRC) injection into contaminated groundwater and followed up with quarterly groundwater monitoring.
- **Remedial Investigation/Feasibility Study, Burlington, Washington.** Conducted a series of vapor extraction and air sparging pilot tests. Continuing work included drilling of several monitoring wells, installation of the remedial system, and equipment operations and maintenance.
- **Aquifer Characterization, Frederickson, Washington.** Conducted pump tests on shallow aquifers to determine hydraulic conductivity, transmissivity, and groundwater velocity. Oversaw installation of monitoring wells to determine hydraulic gradient. Aquifer characterizations were completed for the design and feasibility of soil and groundwater remediation.
- **Voluntary Cleanup Program Application, Confidential Client, Sunnyside, Washington.** Completed Voluntary Cleanup Program application on Client's behalf, and coordinated with Ecology to complete all steps to receive a No Further Action determination.
- **FedEx Stormwater Monitoring, Puget Sound, FedEx, Washington.** Collected stormwater samples at six FedEx facilities in Puget Sound. Coordinated team of six field staff, tracked weather, and tested for metals, coliform, pH, and turbidity to meet NPDES permit requirements.

Experience and Knowledge

- Wrote over 200 Phase I Environmental Site Assessments or historical reviews of sites.
- Prepared and provided oversight of numerous RIs, FSs, cleanup action plans, cleanup action reports, sampling and analysis plans, quality assurance plans, and health and safety plans.
- Project management of subsurface investigations.
- Prepared cost estimates, and conducted budget analysis in project planning efforts.
- Experienced in sampling groundwater, surface water, stormwater, sediment, soil, soil gas, and ambient air.

Education

BA, Geology, Carleton College, Northfield, Minnesota

Licenses and Certifications

- HAZWOPER—40-Hour OSHA 29 CFR 1910.120
- Environmental Professional by ASTM E1527-00
- Certificate of Geographical Information Systems, University of Washington, Seattle, WA
