EXECUTIVE SUMMARY

City of Seattle Department of Finance and Administrative Services commissioned SoundEarth Strategies, Inc. to complete a Phase I Environmental Site Assessment of the 614 Roy Street Property located at 614 Roy Street in Seattle, Washington (the Property). The purpose of this environmental site assessment is to identify, to the extent feasible, recognized environmental conditions that may have resulted from the use, manufacture, storage, and/or disposal of hazardous or toxic substances that could affect the future acquisition and/or development of the Property. The scope of work included a review of historical documents regarding the Property, review of current federal and state lists citing known and potentially contaminated sites, interviews with present owners and site managers, a Property reconnaissance, and preparation of this report.

Based on information reviewed in the course of this investigation and as discussed in appropriate sections of this report, the following development history was established for the Property. It appears that the Property was initially developed by 1893 with two single-family residences. A third single-family residence was constructed on the Property in 1900. The residences were demolished by 1930 and an apartment building was moved to the Property in 1932. Heat was provided by a hot water system. The apartment building was demolished in 1972. The Property was converted to a construction storage yard in 1982. At the time of the Property visit, the Property was occupied by a construction storage yard. Adjoining properties include a mix of residential and commercial development.

The following issues of potential environmental concern were identified during the course of our investigation:

- **The potential use and storage of heating oil on the Property.** An apartment building historically located on the Property was heated by a hot water system. The fuel source for the hot water was not provided in the available records. Buildings of that vintage commonly used oil-burning furnaces. However, considering the uncertainty regarding the fuel source for the boiler, the potential use and storage of heating oil on the Property does not constitute a recognized environmental condition.
- **The current and historical operation of an automotive repair facility on the west-adjointing property.** An automotive repair facility has operated on the west-adjointing property since at least 2008. Considering the proximity to the Property and the inferred upgradient hydrologic position relative to the Property, the relatively short-term operation of an automotive repair facility on the west-adjointing property constitutes a recognized environmental condition with a low risk of impacts to the Property.
- **The historical operation of a potential heating oil distribution center on the south adjoining property.** An office building was constructed on the south-adjointing property in 1941. The property was occupied by an oil-burning furnace sales and repair facility between 1950 and 1951. A 1950 Sanborn Map indicates that oil trucks were stored on the property. Heating oil may have been stored on the property for distribution. The property was also historically heated by an oil-burning furnace. Considering the inferred cross- to downgradient hydrologic position of the site relative to the Property, the historical use and storage of heating oil on the south-adjointing property does not constitute a recognized environmental condition.
- **The historical use and storage of heating oil on the east-adjointing properties.** Buildings on the east-adjointing properties were historically heated by oil-burning furnaces. Considering the

EXECUTIVE SUMMARY (CONTINUED)

inferred cross- to downgradient hydrologic position of the properties relative to the Property, the use and storage of heating oil does not constitute a recognized environmental condition.

This executive summary is presented solely for introductory purposes and the information contained in this section should be used only in conjunction with the full text of this report. A complete description of the project, Property conditions, investigative methods, and investigation results is contained within this report.

1.0 INTRODUCTION

1.1 PURPOSE OF ASSESSMENT

SoundEarth Strategies, Inc. (SoundEarth) was commissioned by City of Seattle Department of Finance and Administrative Services (City of Seattle FAS) to complete a Phase I Environmental Site Assessment (ESA) of the 614 Roy Street Property located at 614 Roy Street in Seattle, Washington (the Property). The primary purpose of this ESA is to identify, to the extent feasible, recognized environmental conditions (RECs) resulting from the use, manufacture, storage, and/or disposal of hazardous or toxic substances that could affect the future acquisition and/or development of the Property.

This study is intended to satisfy the level of effort often referred to as "all appropriate inquiry" in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 USC § 9601, with the objective of allowing City of Seattle FAS to prepare for an upcoming sale of the Property.

1.2 METHODOLOGY/SCOPE OF WORK

This Phase I ESA was conducted in accordance with procedures outlined in American Society for Testing and Materials (ASTM) E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. ASTM E1527-13 uses the term "recognized environmental conditions" to assess environmental risks associated with a property. The term is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Two additional categories of RECs are included in ASTM E1527-13: historical recognized environmental conditions and controlled recognized environmental conditions. ASTM E1527-13 uses the term "historical recognized environmental condition" (HREC) to define environmental risks associated with "...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls." A "controlled recognized environmental condition" (CREC) is defined as "...a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority...with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

The scope of work for this Phase I ESA included the following tasks:

- A review of various sources of historical information dating back to 1893, which are identified in Section 4.0, including reverse city street directories (such as those published by Polk, Inc.), Sanborn Fire Insurance Maps (Sanborn Maps), Kroll Atlases, local planning and assessment records, and available aerial photographs of the Property and vicinity.

- A review of current federal databases, including the United States Environmental Protection Agency (EPA) Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database, the EPA National Priority List (NPL), the EPA Resource Conservation and Recovery Act (RCRA) Notifiers, RCRA Corrective Action Report, Facility Index System (FINDS), Emergency Response Notification System (ERNS), and other lists.
- A review of current state databases, including the listing of underground storage tanks (USTs), Leaking Underground Storage Tanks (LUSTs), solid waste facilities (SWFs), Voluntary Cleanup Program (VCP) sites, Confirmed and Suspected Contaminated Sites (CSCSs) and other ASTM standard databases.
- A review of United States Geological Survey (USGS) topographic maps to identify the physiographic setting of the Property.
- A reconnaissance of the Property and surrounding area to evaluate the current operations and look for visual and/or olfactory evidence of contamination, such as stained soil, unusual odors, distressed vegetation, pipes, drums, oil sheens and/or discolored water, and improper manufacturing or waste disposal practices.
- An interview with Mr. Daniel Bretzke with City of Seattle FAS (User representative). An inquiry was also made with Ms. Jennifer Guy of the Seattle Fire Marshal's Office Records Division regarding information that they may have regarding the Property.
- The preparation of this report.

1.3 LIMITATIONS OF REPORT

This Phase I ESA report is for the exclusive use of City of Seattle FAS. The purpose of this report is to provide the client with an assessment of the potential for the presence of contamination on the Property. Phase I ESAs are non-comprehensive and may not identify all environmental risk associated with the Property. This study did not include an investigation for the presence of asbestos-containing materials, lead-based paint, radon gas, electro-magnetic fields from high-voltage power transmission lines, wetlands, endangered species, floodplains, vapor intrusion, or other issues not described in the aforementioned scope of work or within the ASTM Standard E1527-13 guidance document.

Within the limitations of scope, schedule, and budget, our services have been executed in general accordance with procedures specified in ASTM E1527-13. Because the SoundEarth report is based upon readily available and reasonably ascertainable information, the accuracy of which was not verified, SoundEarth cannot and does not guarantee that the Property is free of hazardous or potentially hazardous materials or conditions, or that latent or undiscovered conditions will not become evident in the future. Since Property activities beyond the control of SoundEarth could change at any time after the completion of this assessment, the observations, findings, and opinions can only be considered valid as of the date hereof. This report should not be relied upon after 180 days from the date it was issued.

2.0 PROPERTY DESCRIPTION

The following subsections provide a summary of the location, legal description, and current use of the Property, as well as a discussion of surrounding land use.

2.1 LOCATION AND LEGAL DESCRIPTION

The Property is located at 614 Roy Street in Seattle, Washington, as shown in Figure 1. The Property consists of a rectangular-shaped tax parcel (King County Parcel No. 224900-0190) that covers approximately 6,599 square feet (0.15 acres) of land in Township 25/Range 4/Section 30. Figure 2 depicts a plan view/layout of the Property. According to the King County iMap application, the Property is located at an approximate elevation of 75 to 80 feet above mean sea level, with the highest elevations on the northwestern portion of the Property.

The legal description of the Property is provided in Appendix A, Current and Archived County Assessor Records.

2.2 STRUCTURES AND IMPROVEMENTS

The Property is currently occupied by a construction storage yard. No structures are located on the Property. Photographs taken during the Property reconnaissance are included as attachments to this report.

Potable water and sewer service, natural gas, electricity and solid waste disposal and recycling services are not currently provided to the Property. No evidence of potable or process water supply wells on the Property was found.

2.3 CURRENT PROPERTY ZONING AND USE

According to the City of Seattle Zoning Map, the Property is zoned Commercial 1-65, which is used for commercial purposes. The Property is currently occupied by a construction storage yard.

2.4 ADJOINING PROPERTIES

Development in the vicinity of the Property is a mix of residential and commercial. Uses of adjoining properties at the time of the SoundEarth Property reconnaissance are summarized below, and are also shown on Figure 2.

- **North.** A residential apartment building is located on the north- and northwest-adjoining properties.
- **East.** An office building and a warehouse are located across Aurora Avenue North to the east.
- **South.** A hotel and Emerald City Window Tinting are located across Roy Street to the south.
- **West.** An automotive repair facility is located on the west-adjoining property.

2.5 GEOLOGIC CONDITIONS

Geologic conditions often influence the environmental conditions of a property. Underlying soil types and bedrock formations may facilitate or impede the migration of chemical contaminants in groundwater or soil vapor and may be a source of contaminants such as radon and metals. This section of the report summarizes known geologic factors and conditions that may impact the Property with regard to environmental concerns.

2.5.1 Geology

The Geologic Map of Seattle—A Progress Report (Troost et al. 2005), indicates that the Property is underlain by Vashon till. These deposits consist of a dense mixture of silt, sand, gravel, and clay, which typically are characterized by relatively low vertical hydraulic conductivity.

Shannon & Wilson, Inc. completed a Geotechnical Data Report for the Mercer Street Tunnel as part of the Lake Union Combined Sewer Overflow (CSO) project in 1997. As part of the report, a monitoring well was advanced in the sidewalk on the south side of Roy Street (shown on Figure 2) to a depth of 122.8 feet below ground surface (bgs). Approximately four feet of loose to medium dense clayey sand, identified as fill material, was encountered in the boring. The fill material was underlain by approximately 80 feet of very dense gravelly silty sand, identified as glacial till.

2.5.2 Hydrologic and Hydrogeologic Environment

Both the King County iMap application and the USGS Topographic Map of the Seattle North, Washington Quadrangle, published in 1983, depict the topography in the vicinity of the Property as sloping downward to the southeast. The topographic map depicts the closest surface water body as Lake Union, which is located approximately 0.25 miles to the northeast.

Based solely upon inference from local topography, drainage patterns, and surface water flow, it appears that shallow-seated groundwater in the vicinity of the Property flows in a general southeasterly direction. Based on this inferred groundwater flow direction, potential off-Property sources of chemical contamination that might adversely affect the Property would, therefore, most likely be located to the northwest in an inferred upgradient hydrologic position relative to the Property.

Groundwater was encountered at an approximate depth of 34 feet below ground surface on the south-adjointing property monitoring well in 1997.

2.6 SUMMARY

The operation of an automotive repair facility on the west-adjointing property constitutes a potential issue of environmental concern and is discussed further in Section 9.0.

3.0 USER-PROVIDED INFORMATION

The following subsections summarize the information provided by the User of this Phase I ESA.

3.1 TITLE RECORDS

A preliminary title report or chain-of-title report was not provided by the client to SoundEarth for review prior to production of this report. These documents may provide information about the Property, including ownership and other interests in the land, easement, and liens. Not all liens, defects, and encumbrances affecting title to the land may be included in the preliminary title report.

Considering the response from the User and the previous use of the Property, the lack of a title report is not expected to affect the findings or conclusions of this report.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

According to an interview with the User (Mr. Daniel Bretzke with City of Seattle FAS), there are no environmental liens encumbering the Property or current limitations on either activity or use of the Property.

3.3 SPECIALIZED KNOWLEDGE

The Property was purchased in 1971 as part of the potential Bay Freeway project. The Property is currently used by Seattle Department of Transportation (SDOT) as a construction storage yard for the Mercer Corridor project.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No Property valuation reduction relating to environmental concerns was reported by City of Seattle FAS.

3.5 OBVIOUS OR COMMONLY KNOWN PROPERTY INFORMATION

Mr. Bretzke was unaware of environmental concerns regarding the Property.

3.6 CURRENT OWNER, PROPERTY MANAGER, AND OCCUPANT

King County Assessor records list the owner of the Property as City of Seattle SDOT. The Property is currently occupied by SDOT as a construction storage yard for the Mercer Corridor project.

3.7 REASON FOR PERFORMING PHASE I ESA

SoundEarth prepared this Phase I ESA at the request of City of Seattle FAS as part of their planned sale of the Property.

3.8 PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports related to this investigation were provided to SoundEarth.

3.9 SUMMARY

No issues of potential environmental concern were identified during our review of User-provided information.

4.0 HISTORICAL REVIEW

The history of land use for the Property and surrounding areas was evaluated to identify past uses that might have had adverse effects on the environmental conditions, primarily through the use of potentially hazardous materials. The following history of the Property and surrounding parcels is based on a compilation of information obtained from the following resources:

- King County Assessment records reviewed online and at Puget Sound Regional Archives
- City of Seattle Department of Planning and Development building permit files
- City of Seattle Engineering Department sewer cards
- Heiden's and Polk City Directories

- Historical City Atlases and Maps – Sanborn Maps and Kroll Atlases of Seattle
- Aerial Photographs

Selected copies of the information sources described above are included in the Photographs and Appendix A of this report.

4.1 HISTORICAL USE OF THE PROPERTY

CHRONOLOGICAL DEVELOPMENT AND USE HISTORY FOR THE PROPERTY

Date(s)	Source	Description	Potential Issues of Environmental Concern
1893	Sanborn Map	Two single-family residences are depicted on the eastern portion of the Property.	None
1899-1900	DPD	A single-family residence is constructed on the western portion of the Property.	None
1905-1917	Sanborn Maps	Three single-family residences are depicted on the Property.	None
1920-1925	Kroll Map, Reverse Directories	The Property is occupied by three single-family residences.	None
1932	Tax Records, DPD	A 1919-vintage, two-story, wood-framed apartment building heated by “hot water” is moved to the Property. The fuel source for the hot water system is not included in the available records, but buildings constructed in this timeframe commonly were heated by oil-burning furnaces. The single-family residences are no longer present.	None
1936-1969	Sanborn Maps, Aerial Photographs, Reverse Directories, Tax Records	An apartment building is located on the western portion of the Property. A one-story, three-car garage is located on the northwestern portion of the Property.	None
1972	Sewer Card, DPD, Tax Records	The Property is purchased by the City of Seattle for potential use. The apartment building is demolished. The sewer connection to the Property is capped.	None

Date(s)	Source	Description	Potential Issues of Environmental Concern
1977–1980	Aerial Photographs	The Property is vacant.	None
1982-2013	DPD, Tax Records, Aerial Photographs	The Property is occupied by a contractor’s storage yard.	None

4.2 HISTORICAL USE OF ADJOINING PROPERTIES

This section describes the findings of SoundEarth’s research into the historical usage of the adjoining properties. These adjoining properties are depicted on Figure 2.

North-Adjoining Property

Two 2-story, wood-framed, stove-heated single-family residences were constructed on the north-adjoining property by 1893. Both residences were demolished in 1999 and a parking lot was constructed on the property. The eastern portion of the existing wood-framed, six-story, apartment building (708 6th Avenue North) was constructed on the property in 2012.

The northwest-adjoining property was initially developed in 1953 with a one-story, masonry-framed warehouse. Heat was provided by natural gas heaters. The property was occupied by Artcraft Engraving between 1966 and 1970 and by Artcraft Colorgraphics and Superior Publishing between 1975 and 1986. Argus Optical operated on the property between 1996 and 2008. The existing wood-framed, six-story, apartment building (708 6th Avenue North) was constructed on the property in 2012.

East-Adjoining Property

The east-adjoining property was developed with a single-family residence by 1893. The residence was demolished in 1932 and a one-story, wood-framed restaurant was constructed on the property. Heat was provided by hot water heated by an oil-burning furnace. The restaurant was demolished in 1984 when the existing four-story office building (701 Dexter Avenue North) was constructed on the property.

The southeast-adjoining property was developed with a single-family residence by 1893. A one-story, masonry-framed, steam-heated commercial building was constructed on the southern portion of the property in 1926. The steam boiler was historically heated by an oil-burning furnace. The residence was demolished by 1930. A one-story, wood-framed warehouse heated by a suspended natural gas heater was constructed on the northern portion of the property in 1946. Tenants of the buildings have included Seattle Hardwood Floor Co., Colotyle Corporation, Parker Henry Glass Co., and Zephyr Aluminum Company.

South-Adjoining Property

The south-adjoining property was initially developed with a one-story, wood-framed office building and warehouse in 1941. Heat was provided by hot water heated by an oil-burning furnace. The building was occupied by an oil-burning furnace sales and service facility in at least 1950 and 1951. A 1950 Sanborn Map indicates that oil trucks were stored on the northern portion of the building. A garage addition was constructed on the northwestern portion of the property in 1953. Additional tenants included offices, technical schools, and churches.

The southwest-adjoining property was initially developed with a stable building between 1905 and 1917. A one-story, wood-framed, stove-heated building for a materials storage yard was constructed on the property in 1945. The building was demolished in 1962 and a parking lot was constructed on the property. A one-story, wood-framed office was located on the parking lot. The parking lot and the office were demolished in 1991 and the existing hotel (601 Roy Street) was constructed in 1999.

West-Adjoining Property

The west-adjoining property was initially developed with a two-story, wood-framed, stove-heated apartment building in 1910. The building was demolished in 1954 and replaced with a parking lot. The existing one-story, metal-framed commercial building (702 6th Avenue North) was constructed on the property in 1982. Heat was provided by a natural gas-burning furnace. Downtown Automotive, an automotive repair facility, has operated on the property since at least 2008.

4.3 HISTORICAL USE OF SURROUNDING PROPERTIES

A retail gasoline service station operated approximately 200 feet southeast of the Property between at least 1930 and 1944. An additional retail gasoline service station operated approximately 340 feet southeast of the Property between at least 1930 and 1940.

A retail gasoline service station operated approximately 350 feet west of the Property between at least 1935 and 1951.

4.4 SUMMARY

No potential issues of environmental concern were identified during our review of historical information regarding the Property.

The adjoining Property development, as detailed above, included the following potential environmental concerns: a west-adjoining automotive repair facility and a south-adjoining oil-burning furnace distributor. Both of these potential environmental concerns are discussed further in Section 9.0.

Review of archived building permit files at the Seattle DPD and sewer cards maintained by the Seattle Engineering Department did not convey when the Property was connected to the municipal sewer system. Based on the historical usage of the Property for residential purposes, the lack of information regarding when the Property was connected to the sewer system does not significantly affect the findings or conclusions of this report.

5.0 REGULATORY REVIEW

A review of regulatory agency records was conducted in order to identify known or potential sources of contamination that could adversely impact the Property. Records were obtained using the commercial database search services of EDR, which queries EPA, state regulatory agency, and other similar databases within the approximate minimum search distances specified in ASTM E1527-13. The commercial database search report was reviewed for accuracy of Property locations and was modified appropriately. Orphan sites (sites that EDR was unable to map) were also reviewed in an effort to evaluate whether any of those sites were also located within the respective search distance. The complete EDR report is included in Appendix B and contains figures showing the locations of the reportable sites within the search distance for each database queried. The databases searched, the corresponding search distance, and the number of sites found within the search distance for each database are summarized in the following table.

Source of Regulatory Information	Acronym	Search Distance	Sites within Search Distance
Federal Databases			
National Priorities List	NPL	1.0 mile	0
National Priorities List Deletions	Delisted NPL	1.0 mile	0
Comprehensive Environmental Response, Compensation, and Liability Information System; also CERCLIS No Further Remedial Action Planned	CERCLIS & CERCLIS-NFRAP	0.5 mile 0.5 mile	0 2
EPA-Listed Brownfields	Brownfields	0.5 mile	0
Resource Conservation and Recovery Act Information - Treatment, Storage, and Disposal Facilities; also RCRA Corrective Action Sites	RCRA TSDF and CORRACTS	0.5 mile 1.0 mile	0 0
Resource Conservation and Recovery Act Hazardous Waste Generators	RCRA GEN	Property & Adjoining Parcels Only	0
Emergency Response Notification System/National Response Center	ERNS/NRC	Property Only	0
State Databases			
Confirmed and Suspected Contaminated Sites List	CSCSL	1.0 mile	110
Confirmed and Suspected Contaminated Sites List – No Further Action	CSCSL NFA	0.5 mile	22
Solid Waste Facilities/Landfill Sites	SWF/LF	0.5 mile	0
Leaking Underground Storage Tanks	LUST	0.5 mile	20
Registered Underground Storage Tanks	UST	Property & Adjoining Parcels Only	0
State-listed Brownfields	Brownfields	0.5 mile	0
Voluntary Cleanup Program	VCP	0.5 mile	26
Independent Cleanup Reports	ICR	0.5 mile	32
Engineering & Institutional Controls	ENG/INST CONTROL	Property Only	0

The Property was not listed on any of the above databases.

According to the EDR report, numerous other sites within the applicable search distances appeared on at least one of the ASTM Standard databases listed above. However, most of these regulated sites are not considered to represent a potential issue of environmental concern for the Property for the following reasons:

- Numerous sites are listed on a database as having had a release to the environment, but are located over 0.1 miles away from the Property and have been reportedly cleaned up, issued a No Further Action determination, or involved soil impacts only.
- Numerous sites are listed on a database as having had a release to the environment where groundwater was either confirmed or suspected to have been impacted; however, the sites are all located over 0.13 miles cross- or downgradient of the Property.

The five remaining sites are discussed below:

- Complete Automotive, located at 717 Dexter Avenue North approximately 220 feet northeast of the Property, is listed in the CSCSL NFA, UST, and VCP databases. A determination of No Further Action was issued in 2012. Considering the separation distance, the crossgradient hydrologic position relative to the Property, and the issuance of a determination of No Further Action, the Complete Automotive site does not constitute a potential issue of environmental concern.
- PCY Corp, located at 601 6th Avenue North approximately 275 feet southwest of the Property, is listed in the CSCSL, LUST, and UST databases. PCY Corp is a former metal works and gasoline engine rebuild company that operated from at least 1950 to 1989. A UST was encountered at the site in 1998, with gasoline contaminated soil reported on site. Considering the separation distance, the apparent lack of groundwater impacts and the inferred crossgradient hydrologic position relative to the Property the PCY site does not constitute a potential issue of environmental concern.
- Plaid Pantry #309, 720 Taylor Avenue, is located 360 feet northwest of the Property, and is listed on CSCSL NFA, ICR, and VCP databases. The site was a gasoline service station, and gasoline reportedly leaked from three USTs. A vapor extraction system was installed, and Ecology issued a No Further Action determination in 2001, based on samples showing no detectable concentrations of volatiles in groundwater. Based on the groundwater sampling data of others and Ecology's No Further Action determination, the presence of the Plaid Pantry #309 site northwest of the Property does not constitute a potential issue of environmental concern.
- American Linen Supply Company, located at 700 Dexter Avenue approximately 400 feet east of the Property, is listed in the CSCSL and VCP databases. The site is also listed as Maryatt Industries at 773 Valley Street in the ICR, RCRA NonGen, CSCSL, and UST databases. Based upon the findings of previous investigations performed at the American Linen Supply Co. site by SoundEarth, this site includes soil, soil vapor, and/or groundwater contaminated with gasoline-, diesel-, and oil-range petroleum hydrocarbons; tetrachloroethylene; trichloroethylene; vinyl chloride, and/or cis-1,2-dichloroethylene beneath that property and portions of the south- and east-adjointing properties, as well as extending beneath the 8th, 9th and Westlake Avenues North and Valley, Roy, and Broad Streets rights-of-way. The impacts beneath this site are likely associated with the following: (1) a release of chlorinated solvents from the industrial laundry and dry cleaning facility that operated on the 700 Dexter Avenue North property between 1925 and 1995 and (2) the operation of at least two refueling facilities that historically operated on the northern portion of that property and on the east-adjointing properties (800-802 Roy Street). The highest concentrations of chlorinated solvents are located in the west-central portion of the 700 Dexter Avenue North property. Data developed by SoundEarth indicates that the lateral distribution of petroleum contamination in soil and groundwater associated with this site is bound to the west by monitoring well MW112 (in the Dexter Avenue North right of way) approximately 300 feet to the east of the Property. Tetrachloroethylene in groundwater extends from the 700 Dexter Avenue property downgradient and beneath the property to 9th Avenue North to the east. Considering the downgradient hydrologic position relative to the Property and the lack of impacts detected west of the site, the American Linen site does not constitute a potential issue of environmental concern.
- Seattle School District, 810 Dexter Avenue North, is located 480 feet northeast of the Property, and is listed on the CSCSL, RCRA NonGen, LUST, and UST databases. Benzene and GRPH were

detected in the soil and groundwater beneath the site. Considering the separation distance and the inferred crossgradient hydrologic position of the site relative to the Property, the site does not constitute a potential issue of environmental concern.

Regulatory records were requested, but were not available for review at the time of this writing. However, records available on Ecology's website were sufficient to assess the potential risks of the listed sites.

Potential issues of environmental concerns related to vapor encroachment were not identified in our review of regulatory records.

6.0 PROPERTY RECONNAISSANCE

Mr. Travis Zandi, a SoundEarth Staff Scientist, visited the Property on May 1, 2015, to review conditions and land use practices on the Property and on adjoining and nearby properties. SoundEarth was unescorted during the Property reconnaissance. Interior access was not provided to two storage containers located on the site. The lack of access is not expected to affect the findings or conclusions of this report. The purpose of the Property reconnaissance was to identify readily apparent indications of hazardous or potentially hazardous substances or petroleum products that were historically or are currently used, generated, stored, or disposed of on the Property. Selected photographs taken during the Property reconnaissance are included as an attachment to this report.

6.1 GROUNDS AND BUILDINGS

The following sections provide a description of general conditions and features observed during the Property reconnaissance.

Interior Observations

No permanent structures are located on the Property. Interior access was not provided to two storage containers located on the eastern portion of the Property.

Exterior Observations

The Property is developed with a gravel parking lot occupied by a construction storage yard. At the time of the Property visit, various construction supplies and traffic control devices were stored on the Property. Two storage containers were observed on the eastern portion of the Property. Containers of gasoline and diesel fuel are stored in a flammable materials cabinet on the eastern portion of the Property. A pile of asphalt is stored on the sidewalk south of the Property. Stormwater appears to be diverted into either the Roy Street right-of-way to the south or into the Aurora Avenue right-of-way to the east.

Specific conditions that may or may not constitute potential issues of environmental concern to the Property are presented in the following table. Those conditions identified are further discussed below.

Item	Item Present		Description (if present)	Issue of Potential Concern	
	Yes	No		Yes	No
Petroleum Products	X		Three five-gallon gasoline containers and three five-gallon diesel containers were observed inside a flammable materials cabinet stored on the eastern portion of the Property. No spills or staining was observed in the cabinet.		X
Hazardous Substances	X		Multiple five-gallon buckets of paint, concrete sealer, and release agents are stored on the Property. No spills or stains were observed in the vicinity of the buckets.		X
Hazardous Waste		X	No hazardous wastes were observed to be generated, stored, or disposed of at the Property.		X
Landfills, Dumps		X	No landfills or dumps were observed on the Property or adjoining properties.		X
Burial Sites or Solid Waste Disposal		X	No evidence of burial sites was observed on the Property or adjoining properties. No solid waste is generated at the Property.		X
Aboveground Storage Tanks (ASTs)	X		Two empty plastic totes are stored on the Property.		X
Underground Storage Tanks		X	None were observed on the Property or adjoining properties.		X
Drums and Storage Areas	X		None were observed on the Property. A 25-gallon drum of non-hazardous investigation-derived waste, dated 2014, was observed on the southern portion of the south-adjoining property.		X
Potential PCB-Containing Equipment		X	None was observed on the Property or adjoining properties.		X
HVAC System and Fuel Source		X	No heating system is present on the Property.		X
Drains, Sumps, Cisterns, or Cesspools		X	None were observed on the Property or adjoining properties.		X
Pits, Ponds, or Lagoons		X	None were observed on the Property or adjoining properties.		X
Pavement or Soil Stains		X	None were observed on the Property or adjoining properties.		X
Stains or Corrosion on walls		X	None were observed on the Property.		X
Stressed Vegetation		X	None was observed on the Property or adjoining properties.		X
Possible Fill or Grading	X		A pile of asphalt is stored on the sidewalk south of the Property.		X
Chemical/TPH/Swamp-Gas Odors	X		A petroleum odor was noted inside the flammable materials cabinet. No spills or stains were observed.		X
Stormwater or Surface Erosion		X	Stormwater appears to be directed into the adjoining right-of-ways to the south and the east.		X
Wells and Potable Water		X	No wells were observed on the Property. A groundwater monitoring well was observed in the sidewalk north of the south-adjoining property.		X

6.1.1 Discussion Regarding Property Observations

No potential issues of environmental concern were identified during our reconnaissance of the Property.

6.2 ADJOINING PROPERTIES

A monitoring well was observed in the sidewalk across Roy Street. The monitoring well appears to have been installed as part of an investigation related to the Lake Union CSO project (See Section 2.5). An automotive repair facility is located on the west-adjointing property. The apparent use of the adjoining properties was previously discussed in Section 2.4.

6.3 SUMMARY

The only issue of potential environmental concern identified during the Property reconnaissance consisted of the presence of an automotive repair facility on the west-adjointing property. Additional discussion regarding this issue is provided in Section 9.0.

7.0 INTERVIEWS

Information gathered from interviews is summarized below and is included in the appropriate sections of this report.

7.1 INTERVIEW WITH SITE MANAGER/PROPERTY OWNER

The names of key site managers were provided to SoundEarth by City of Seattle FAS. Key site managers are contacted to obtain current and historical environment information concerning the Property. SoundEarth contacted Mr. Daniel Bretzke for information regarding the Property. Mr. Bretzke indicated that the City of Seattle purchased the Property in 1971 as part of the future Bay Freeway project. He was unaware of environmental concerns regarding the Property.

7.2 INTERVIEW(S) WITH OTHERS

SoundEarth made an inquiry with the City of Seattle Fire Marshal's Office pertaining to information that they may have regarding the Property. According to Ms. Jennifer Guy of the Fire Marshal's Office Records Division, no department records were found indicating the presence of an UST at the Property. An on-line search of fire department responses to hazardous material release incidents (since 2003) was conducted on May 8, 2015. The search revealed no record of hazardous material response incidents involving the Property.

7.3 SUMMARY

No issues of potential environmental concern were identified during the interviews conducted in the course of this investigation.

8.0 DATA GAPS

Although SoundEarth reviewed the standard historical resources that were reasonably ascertainable regarding the Property, the information reviewed failed to achieve three of the historical objectives as discussed below:

- Interior access was not provided to two storage containers located on the Property. As such, no warranties or conclusions are made with respect to materials and/or conditions within those spaces. Considering the historical use of the Property, this data gap is not expected to affect the findings or conclusion of this report.
- SoundEarth was unable to confirm when Property was first developed. Our earliest records reviewed included an 1893 Sanborn Fire Insurance map that depicted two residences on the Property. However, based on the previous residential nature of the Property, it is the opinion of SoundEarth that this data gap will not likely affect the conclusions of this report.
- Review of archived building permit files at the Seattle DPD and sewer cards maintained by the Seattle Engineering Department did not convey when the Property was connected to the municipal sewer system. These records indicated that the sewer connection to the Property was capped in 1972. Based on the historical usage of the Property for residential purposes, the lack of information regarding when the Property was connected to the sewer system does not significantly affect the findings or conclusions of this report.

No other data gaps were encountered in the performance of this Phase I ESA.

9.0 FINDINGS AND OPINIONS

The following issues of potential environmental concern were identified during the course of our investigation:

- **The potential use and storage of heating oil on the Property.** An apartment building historically located on the Property was heated by a hot water system. The fuel source for the hot water was not provided in the available records. Buildings of that vintage commonly used oil-burning furnaces. However, considering the uncertainty regarding the fuel source for the boiler, the potential use and storage of heating oil on the Property does not constitute a REC.
- **The current and historical operation of an automotive repair facility on the west-adjointing property.** An automotive repair facility has operated on the west-adjointing property since at least 2008. Considering its proximity and inferred upgradient hydrologic position relative to the Property, the relatively short-term operation of an automotive repair facility on the west-adjointing property constitutes a REC with a low risk of impacts to the Property.
- **The historical operation of a potential heating oil distribution center on the south adjoining property.** An office building was constructed on the south-adjointing property in 1941. The property was occupied by an oil-burning furnace sales and repair facility between 1950 and 1951. A 1950 Sanborn Map indicates that oil trucks were stored on the property. Heating oil may have been stored on the property for distribution. The property was also historically heated by an oil-burning furnace. Considering the inferred cross- to downgradient hydrologic position of the site relative to the Property, the historical use and storage of heating oil on the south-adjointing property does not constitute a REC.
- **The historical use and storage of heating oil on the east-adjointing properties.** Buildings on the east-adjointing properties were historically heated by oil-burning furnaces. Considering the inferred cross- to downgradient hydrologic position of the properties relative to the Property, the use and storage of heating oil does not constitute a REC.

10.0 CONCLUSIONS

SoundEarth performed a Phase I ESA, in conformance with the scope and limitations of ASTM Practice E1527-13, of the 614 Roy Street Property located at 614 Roy Street in Seattle, Washington (the Property). Any exceptions to, or deletions from, this practice are described in Section 12.0 of this report. This assessment has revealed no evidence of RECs in connection with the Property except for the following:

- The operation of an automotive repair facility on the west-adjointing property.

11.0 PREPARER'S CREDENTIALS

This Phase I ESA was researched and written by Mr. Travis Zandi, a staff scientist with a Masters of Arts degree in history who has completed over 100 Phase I ESAs. Mr. Ryan Bixby, an environmental professional as defined in 312.10 of 40 CFR 312, supervised the preparation of this Phase I ESA and reviewed and interpreted the information upon which this report is based. He holds a bachelor's degree in geology and has been a professional environmental consultant for more than 16 years. During his career in the environmental field, he has completed more than 1,000 Phase I ESAs in Washington, Oregon, and California, and he has directed the completion of hundreds more by corporate technical staff. In addition, Mr. Bixby has completed and managed more than 100 Phase II ESAs, and has initiated and managed the remediation of more than 50 contaminated properties (Appendix C).

12.0 DEVIATIONS

No deviations from the scope of work were required by Property conditions.

13.0 ADDITIONAL SERVICES

No additional services beyond the scope of work described in Section 1.2 were requested by the client.

15.0 STATEMENT OF THE ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a Property of the nature, history, and setting of the Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set for in 40 CFR Part 312.

Ryan Bixby
President

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Inquiry # 4274375.3

Contact: Ryan Thompson

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Sound Earth Strategies were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). SOUND EARTH STRATEGIES used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by SOUND EARTH STRATEGIES. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed

EXECUTIVE SUMMARY

and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

An online review and analysis by SOUND EARTH STRATEGIES of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by SOUND EARTH STRATEGIES of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by SOUND EARTH STRATEGIES of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

An online review and analysis by SOUND EARTH STRATEGIES of the WA HSL list, as provided by EDR, and dated 02/19/2015 has revealed that there are 29 WA HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

An online review and analysis by SOUND EARTH STRATEGIES of the WA CSCSL list, as provided by EDR, and dated 01/20/2015 has revealed that there are 110 WA CSCSL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

WA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

An online review and analysis by SOUND EARTH STRATEGIES of the WA LUST list, as provided by EDR, and dated 02/18/2015 has revealed that there are 20 WA LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

An online review and analysis by SOUND EARTH STRATEGIES of the WA UST list, as provided by EDR, and dated 04/08/2015 has revealed that there are 12 WA UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

WA ICR: These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

An online review and analysis by SOUND EARTH STRATEGIES of the WA ICR list, as provided by EDR, and dated 12/01/2002 has revealed that there are 32 WA ICR sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

An online review and analysis by SOUND EARTH STRATEGIES of the WA CSCSL NFA list, as provided by EDR, and dated 01/20/2015 has revealed that there are 22 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by SOUND EARTH STRATEGIES of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

WA Inactive Drycleaners: A listing of inactive drycleaner facility locations.

An online review and analysis by SOUND EARTH STRATEGIES of the WA Inactive Drycleaners list, as provided by EDR, and dated 12/31/2013 has revealed that there are 2 WA Inactive Drycleaners sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and

EXECUTIVE SUMMARY

non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

An online review and analysis by SOUND EARTH STRATEGIES of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

WASHINGTON NATURAL G	815 MERCER ST	ESE 1/8 - 1/4 (0.158 mi.)	J73	118

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by SOUND EARTH STRATEGIES of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 55 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by SOUND EARTH STRATEGIES of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 24 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

 EPA Region: 10
 Classification: Non-Generator
 Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
 Mixed waste (haz. and radioactive): No
 Recycler of hazardous waste: No
 Transporter of hazardous waste: No
 Treater, storer or disposer of HW: No
 Underground injection activity: No
 On-site burner exemption: No
 Furnace exemption: No
 Used oil fuel burner: No
 Used oil processor: No
 User oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/operator telephone: (000)000-0000
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 05/02/1996
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Facility Has Received Notices of Violations:

Regulation violated: SR - -145(2)(c)(i)
Area of violation: Generators - General
Date violation determined: 01/17/1992
Date achieved compliance: 03/03/1992
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 03/03/1992
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Regulation violated: SR - -170(1)(a)

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

CSCSL:

Facility ID: 1996895

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

WA MANIFEST:

Facility Site ID Number: 46445373
EPA ID: WAH000015289
NAICS: 447190
SWC Desc: Not reported
FWC Desc: Not reported
Form Comm: No wastes generated in 2009. Tanks removed in 2008.
Data Year: 2009
Permit by Rule: False

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

EPA Region: 10
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name: DANIEL BOONE PA D
Owner/operator address: 1401 DEXTER AVE N
SEATTLE, WA 98109
Owner/operator country: US
Owner/operator telephone: (000)000-0000
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 05/02/1996
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

CSCSL:

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

CSCSL:

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name: WESTLAKE CHEVER W
Owner/operator address: 2030 8TH AVE
SEATTLE, WA 98121
Owner/operator country: US
Owner/operator telephone: (000)000-0000
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 05/02/1996
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110005318272

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name: GRAPHICOLOR INC G
Owner/operator address: 3018 WESTERN AVE
SEATTLE, WA 98121
Owner/operator country: US
Owner/operator telephone: (000)000-0000
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 05/02/1996
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 04/02/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/08/2015
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/21/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/07/2014	Telephone: 703-603-8704
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 04/08/2015
Number of Days to Update: 13	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 04/02/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/08/2015

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 02/26/2015
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/19/2015	Source: Department of Ecology
Date Data Arrived at EDR: 03/13/2015	Telephone: 360-407-7200
Date Made Active in Reports: 03/20/2015	Last EDR Contact: 03/10/2015
Number of Days to Update: 7	Next Scheduled EDR Contact: 06/22/2015
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/20/2015	Source: Department of Ecology
Date Data Arrived at EDR: 01/21/2015	Telephone: 360-407-7200
Date Made Active in Reports: 02/24/2015	Last EDR Contact: 04/21/2015
Number of Days to Update: 34	Next Scheduled EDR Contact: 08/03/2015
	Data Release Frequency: Semi-Annually

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/12/2015	Source: Department of Ecology
Date Data Arrived at EDR: 03/13/2015	Telephone: 360-407-6132

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> KING, WA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map

---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Groundwater Flow Direction:	TOWARD LAKE UNION
Inferred Depth to Water:	not available
Hydraulic Connection:	The Lawton clay formation impedes the downward migration of ground water to the lower aquifer.
Sole Source Aquifer:	A sole source aquifer is not present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PILCHUCK
Soil Surface Texture: loamy sand
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class: Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.10
2	20 inches	38 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 5.60
3	38 inches	60 inches	gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 6.10
4	60 inches	70 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 5.60

OTHER SOIL TYPES IN AREA

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX C
QUALIFICATIONS OF THE ENVIRONMENTAL PROFESSIONAL

Ryan K. Bixby, LG
President

Mr. Bixby has 20 years of experience completing hundreds of Phase I and Phase II Environmental Site Assessments and directing numerous Brownfield remediation projects to evaluate the sources and extent of contamination associated with current and historical land use. He has completed remedial investigations and feasibility studies on dozens of sites, working with regulatory agencies to receive site closure through the Voluntary Cleanup Program and Ecology's formal programs. He has provided litigation support to assign and direct cost recovery efforts under the Washington State Model Toxics Control Act.

PROJECT EXAMPLES

Jorgensen Forge Corporation (JFC), Washington. Currently serves as the Principal-in-Charge for the investigation and remediation of the JFC property, a roughly 20-acre property located on the eastern bank of the Duwamish River. Operations at the facility have included metal melting, forging, heat-treating, galvanizing, machining, and distribution, which have resulted in adverse environmental impacts to soil, groundwater, and other media at the site. Impacts encountered at the JFC property include those from polychlorinated biphenyls, chlorinated solvents, petroleum hydrocarbons, metals, and polycyclic aromatic hydrocarbons (PAHs). As part of the remediation efforts associated with the Lower Duwamish Waterway, contaminated sediments and associated bank materials along the JFC property have been investigated and are scheduled to be dredged and removed in 2013 as part of an Early Action Area under an Administrative Settlement Agreement and Order on Consent for Removal Action Implementation issued by the U.S. Environmental Protection Agency. In addition, SoundEarth is developing an RI/FS Work Plan for the uplands portion of the JFC property, which is being implemented as part of an Agreed Order with the Washington State Department of Ecology (Ecology). SoundEarth's activities at the JFC property also include the operation, maintenance, and optimization of a stormwater treatment system that is intended to minimize the concentration of chemicals of concern to the stormwater outfalls that discharge to the Duwamish River.

Duwamish Marine Center Remediation, Lower Duwamish Waterway, Seattle, Washington. Principal-in-charge for an RI under an Agreed Order with Ecology to assess the nature and extent of contamination in soil, groundwater, air, stormwater, and sediments at a property located adjacent to the Lower Duwamish Waterway. The investigation will include installation of a monitoring well network in two water-bearing zones; a tidal influence study; sampling of catch basin sediments, riverbank sediments, seeps and off-shore sediments; a risk evaluation; and development of a conceptual site model. At the completion of the RI, an FS report will be prepared to develop remedial alternatives and select a remedy.

Seattle Parks and Recreation Bryant Building, Portage Bay, Seattle, Washington. Principal-in-charge for the Phase I and II ESAs, hazardous material survey, and sediment sampling of a property located on Portage Bay. Delineated impacts from petroleum hydrocarbons, PAHs, metals, and volatile organic compounds. Performed sediment sampling and a stormwater outfall investigation and is currently helping Seattle Parks and Recreation with future planning efforts. Provided a remedial cost estimate and remedial plan that aided in future planning efforts and negotiations with project stakeholders, and facilitated discussion on capitol cost budgeting.

Seattle Parks and Recreation Due Diligence Program, City of Seattle, Seattle, Washington. Managed this program for approximately 6 years until taking over the Principal review responsibilities in 2008. Provided reporting and guidance for environmental due diligence associated with potential property acquisition by the City of Seattle Parks and Recreation Department (SPR). Participated in the development of over 50 Phase I ESAs and additional investigations and hazardous material surveys to aid in the purchase and rehabilitation of SPR properties into open space and other park facilities.

Hungry Whale Gasoline Station, Port of Grays Harbor, Grays Harbor, Washington. Oversaw the completion of the RI phase of the Agreed Order for this project and worked with the

EXPERIENCE AND KNOWLEDGE

- Completed over 500 Phase I Environmental Site Assessments (ESAs) on residential, commercial, and heavy industrial properties.
- Manages 2 large petroleum programs consisting of 60 sites and 3 former bulk fuel facilities.
- Oversaw the implementation of petroleum remediation systems of various types at 16 sites.
- Conducted numerous Phase II subsurface soil and groundwater investigations on properties, such as retail gasoline stations, automotive service centers, dry cleaning facilities, abandoned landfills, shipyards, bulk fuel facilities, and other industrial sites.
- Prepared and oversaw Remedial Investigations (RIs), Feasibility Studies (FSs)/Disproportionate Cost Analyses, Cleanup Action Reports, and Closure Reports.
- Identified potentially liable persons and established cost allocation via forensic analyses.

EDUCATION

BA in Geology, Whitman College, Walla Walla, WA, Minor in Anthropology

Graduate School, University of Montana

LICENSES AND CERTIFICATIONS

- Washington State Licensed Professional Geologist #1691
- State of Colorado, Petroleum Storage Tank Listed Consultant (No. 6272)
- HAZWOPER—40-hour OSHA

Port of Grays Harbor toward completion of their remaining obligations. The Hungry Whale is an operational retail gasoline station with confirmed impacts to the subsurface from leaking underground storage tanks. The Port of Grays Harbor currently owns the property on which the gasoline station operates and entered into an Agreed Order with Ecology to conduct the RI and FS, and to prepare a cleanup action plan.

Washington State Department of Transportation, Washington. Performed principal review on eight Phase I ESAs of properties located adjacent to the Alaskan Way viaduct in preparation for condemnation and property acquisition associated with the SR 99 bored tunnel. The due diligence efforts were performed in an effort to identify potential releases that may be encountered in the course of the planned excavation effort as well as assignment of liability.

Trammell Crow Residential, Washington. Performed due diligence on several multiparcel properties that have historically been occupied by dry cleaning facilities and/or retail gasoline stations. The due diligence efforts included Phase I ESAs and subsurface investigations, the results of which allowed the client to make informed decisions regarding the value and liabilities associated with the properties.

Goodman Real Estate. Performed principal review of numerous Phase I ESAs for properties that were owned or being considered for purchase by Goodman Real Estate, including commercial, residential, and industrial properties. The client-imposed schedules frequently required that the due diligence efforts be completed in less than 2 weeks in order to allow the transaction to proceed.

KeyBank Due Diligence, KeyBank, Washington. Managed numerous Phase I and II ESAs conducted for KeyBank in conjunction with lending activities. Completed more than a dozen reports for a variety of client and property types.

Due Diligence and Environmental Site Assessments. Completed more than 500 Phase I ESAs on residential, commercial, and heavy industrial properties throughout the Pacific Northwest, California, and Colorado. Conducted numerous Phase II subsurface soil and groundwater investigations, including direct-push technology, sonic rig, hollow-stem auger, and test pit excavation on properties such as current and former retail gasoline stations and automotive service centers, dry cleaning facilities, abandoned landfills, shipyards, and bulk fuel facilities. Oversaw more than 50 soil and groundwater remediation projects, many of which were involved in Agreed Orders or the Voluntary Cleanup Program and which subsequently resulted in No Further Action (NFA) determinations from the regulatory agency.

TOC Holdings Co. Petroleum Program, TOC Holdings Co., Washington and Oregon. Responsible for the program management and oversight of the TOC Holdings Co. retail petroleum program since 2005, which includes more than 60 facilities. Oversees the completion of field activities, including groundwater monitoring, operation and maintenance visits, and underground storage tank (UST) removal and excavation activities; coordinates the preparation of Phase I and Phase II ESAs, RIs, FSs, and corrective action plans/reports; and ensures the proper design and installation of remedial systems. Also responsible for the development of proposals, client management, and communications with local, state, and federal regulatory agencies. In 2008, TOC Holdings Co. adopted an aggressive 7-year plan to obtain closure for all of its facilities. Mr. Bixby has worked with Oregon Department of Environmental Quality and Ecology to achieve NFA determinations at more than a dozen of the facilities, and others have been prepared for successful property transactions.

North Colfax Petroleum Contamination Site, Colfax, Washington. Principal-in-Charge for the RI and FS that are being performed under an Agreed Order with Ecology. This multiple potentially liable persons site has been impacted by releases from retail gasoline stations that have operated on three separate properties. The impacts from the site extend beneath adjoining rights-of-way and a railroad spur.

Tesoro Petroleum Program, Tesoro Refining and Marketing Company, Washington and Idaho. Managed the investigation, monitoring, and remediation of numerous current and former retail gasoline stations for the Tesoro Petroleum Program since 2005. In addition to retail gasoline stations, the program includes a former bulk fuel facility in Mount Vernon, Washington, that was discovered in the course of an RI at the adjacent operational gasoline station.
