APPENDIX D: MAPS.....	D-1

Foreword

This report contains selected tables from Summary File 3 for Washington State. Summary File 3 contains sample characteristics from the Census long form that was filled out by approximately 1 in 6 persons nationally. The Washington State file became available on September 17, 2002.

This report includes tables related to journey to work of persons 16 years and older and vehicle availability of occupied housing units. These tables are detailed below. See Appendix A for subject and geographic definitions. The geographic coverage is for King, Kitsap, Pierce, and Snohomish counties. There are separate sections for counties, incorporated places and Census Designated Places (CDP), and census tracts.

Appendices document the change in Census Tract geography between 1990 and 2000, and compare 1990 and 2000 population based on 1990 Census Tract geography. The printed report includes Census Tract and Census Designated Place maps. On the PSRC website, electronic versions of these maps are available separately from the downloadable PDF version of this report.

Tables in this report

- P28. PLACE OF WORK FOR WORKERS 16 YEARS AND OVER--MSA/PMSA LEVEL
Universe: Workers 16 years and over
- P30. MEANS OF TRANSPORTATION TO WORK
Universe: Workers 16 years and over
- P31. TRAVEL TIME TO WORK
Universe: Workers 16 years and over
- P32. TRAVEL TIME TO WORK BY MEANS OF TRANSPORTATION TO WORK FOR WORKERS 16 YEARS AND OVER WHO DID NOT WORK AT HOME
Universe: Workers 16 years and over who did not work at home
- P33. AGGREGATE TRAVEL TIME TO WORK (IN MINUTES) BY TRAVEL TIME TO WORK BY MEANS OF TRANSPORTATION TO WORK
Universe: Workers 16 years and over who did not work at home
- P34. TIME LEAVING HOME TO GO TO WORK
Universe: Workers 16 years and over
- P35. PRIVATE VEHICLE OCCUPANCY
Universe: Workers 16 years and over
- H44. TENURE BY VEHICLES AVAILABLE
Universe: Occupied housing units
- H46. AGGREGATE NUMBER OF VEHICLES AVAILABLE BY TENURE
Universe: Occupied housing units

Limitations of the Data

The data contained in this report are based on the Census 2000 sample. The data are estimates of the actual figures that would have been obtained from a complete count. Estimates derived from a sample are expected to be different from the 100-percent figures because they are subject to sampling and nonsampling errors. Sampling error in data arises from the selection of people and housing units included in the sample. Nonsampling error affects both sample and 100-percent data and is introduced as a result of errors that may occur during the data collection and processing phases of the census.

For more information, please refer to Chapter 8., Accuracy of the Data in *TECHNICAL DOCUMENTATION: Census 2000 Summary File 3* available at the Census website <http://www.census.gov/prod/cen2000/index.html>.

Data Availability

Orders for additional printed reports may be directed to the Regional Council Information Center at (206) 464-7532. Electronic data files may also be downloaded from the Regional Council's website at <http://www.psrc.org/>.

Journey to Work Characteristics

Census 2000, Summary File 3

County: **King**

P30. MEANS OF TRANSPORTATION

Universe: Workers 16 years and over

Total:	911,677	100.0%
Car, truck, or van:	736,149	80.7%
Drove alone	626,576	68.7%
Carpooled	109,573	12.0%
Public transportation:	87,298	9.6%
Bus or trolley bus	84,997	9.3%
Streetcar or trolley	296	0.0%
Subway or elevated	227	0.0%
Railroad	118	0.0%
Ferryboat	975	0.1%
Taxicab	685	0.1%
Motorcycle	1,833	0.2%
Bicycle	7,819	0.9%
Walked	33,137	3.6%
Other means	5,026	0.6%
Worked at home	40,415	4.4%

P31. TRAVEL TIME TO WORK

Universe: Workers 16 years and over

Total:	911,677	100.0%
Did not work at home:	871,262	95.6%
Less than 5 minutes	17,995	2.0%
5 to 9 minutes	64,993	7.1%
10 to 14 minutes	104,065	11.4%
15 to 19 minutes	130,658	14.3%
20 to 24 minutes	143,755	15.8%
25 to 29 minutes	64,750	7.1%
30 to 34 minutes	144,601	15.9%
35 to 39 minutes	30,200	3.3%
40 to 44 minutes	39,639	4.3%
45 to 59 minutes	73,091	8.0%
60 to 89 minutes	40,889	4.5%
90 or more minutes	16,626	1.8%
Worked at home	40,415	4.4%

P34. TIME LEAVING HOME TO GO TO WORK

Universe: Workers 16 years and over

Total:	911,677	100.0%
Did not work at home:	871,262	95.6%
12:00 a.m. to 4:59 a.m.	28,357	3.1%
5:00 a.m. to 5:29 a.m.	27,813	3.1%
5:30 a.m. to 5:59 a.m.	41,545	4.6%
6:00 a.m. to 6:29 a.m.	75,701	8.3%
6:30 a.m. to 6:59 a.m.	90,284	9.9%
7:00 a.m. to 7:29 a.m.	128,818	14.1%
7:30 a.m. to 7:59 a.m.	118,918	13.0%
8:00 a.m. to 8:29 a.m.	95,924	10.5%
8:30 a.m. to 8:59 a.m.	56,686	6.2%
9:00 a.m. to 9:59 a.m.	64,832	7.1%
10:00 a.m. to 10:59 a.m.	25,456	2.8%
11:00 a.m. to 11:59 a.m.	12,401	1.4%
12:00 p.m. to 3:59 p.m.	58,542	6.4%
4:00 p.m. to 11:59 p.m.	45,985	5.0%
Worked at home	40,415	4.4%

P35. PRIVATE VEHICLE OCCUPANCY

Universe: Workers 16 years and over

Total:	911,677	100.0%
Car, truck, or van:	736,149	80.7%
Drove alone	626,576	68.7%
Carpooled:	109,573	12.0%
In 2-person carpool	88,752	9.7%
In 3-person carpool	12,496	1.4%
In 4-person carpool	4,044	0.4%
In 5- or 6-person carpool	2,070	0.2%
In 7-or-more-person carpool	2,211	0.2%
Other means *	175,528	19.3%

*Including those who worked at home

H44. TENURE BY VEHICLES AVAILABLE

Universe: Occupied housing units

	Total	Owner Occupied	Renter Occupied
Total	710,916	425,451	285,465
No vehicle	66,244	12,996	53,248
1 vehicle	251,637	111,956	139,681
2 vehicles	266,665	195,270	71,395
3 vehicles	90,533	75,642	14,891
4 vehicles	25,277	21,281	3,996
5 or more	10,560	8,306	2,254
Avg vehicles available	1.7	2.0	1.2

P32/33. TRAVEL TIME TO WORK FOR WORKERS WHO DID NOT WORK AT HOME

Universe: Workers 16 years and over

	Total	Average
Total:	871,262	26.5 min.
Less than 30 minutes:	526,216	60.4%
Public transportation	26,175	3.0%
Other means	500,041	57.4%
30 to 44 minutes:	214,440	24.6%
Public transportation	29,447	3.4%
Other means	184,993	21.2%
45 to 59 minutes:	73,091	8.4%
Public transportation	15,001	1.7%
Other means	58,090	6.7%
60 or more minutes:	57,515	6.6%
Public transportation	16,675	1.9%
Other means	40,840	4.7%

Total Public Transp.	87,298	10.0%	39.4 min.
Total Other Means	783,964	90.0%	25.1 min.

P28. PLACE OF WORK--MSA/PMSA LEVEL

Universe: Workers 16 years and over

Total:	911,677	100.0%
Living in a central city:	372,967	40.9%
Worked in MSA/PMSA of residence:	365,100	40.0%
Central city	285,419	31.3%
Remainder of this MSA/PMSA	79,681	8.7%
Worked outside MSA/PMSA of residence:	7,867	0.9%
Worked in a different MSA/PMSA:	6,525	0.7%
Central city	3,837	0.4%
Remainder of different MSA/PMSA	2,688	0.3%
Worked outside any MSA/PMSA	1,342	0.1%
Living in remainder of an MSA/PMSA:	538,710	59.1%
Worked in MSA/PMSA of residence:	515,918	56.6%
Central city	192,463	21.1%
Remainder of this MSA/PMSA	323,455	35.5%
Worked outside MSA/PMSA of residence:	22,792	2.5%
Worked in a different MSA/PMSA:	20,854	2.3%
Central city	9,297	1.0%
Remainder of different MSA/PMSA	11,557	1.3%
Worked outside any MSA/PMSA	1,938	0.2%

Worked outside any MSA/PMSA	12	0.9%

Appendix A: Definitions

Subject Definitions

Age

The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information

Place of Work

The data on place of work were derived from answers to long-form questionnaire Item 22, which was asked of a sample of the population 15 years old and over. This question was asked of people who indicated in question 21 that they worked at some time during the reference week. (For more information, see “Reference Week”.)

Data were tabulated for workers 16 years old and over; that is, members of the armed forces and civilians who were at work during the reference week. Data on place of work refer to the geographic location at which workers carried out their occupational activities during the reference week. The exact address (number and street name) of the place of work was asked, as well as the place (city, town, or post office); whether or not the place of work was inside or outside the limits of that city or town; and the county, state or foreign country, and ZIP Code. If the person’s employer operated in more than one location, the exact address of the location or branch where the respondent worked was requested. When the number and street name were unknown, a description of the location, such as the building name or nearest street or intersection, was to be entered.

In areas where the workplace address was coded to the block level, people were tabulated as working inside or outside a specific place based on the location of that address, regardless of the response to Question 22c concerning city/town limits. In areas where it was impossible to code the workplace address to the block level, people were tabulated as working in a place if a place name was reported in Question 22b and the response to Question 22c was either “yes” or the item was left blank. In selected areas, census designated places (CDPs) may appear in the tabulations as places of work. The accuracy of place-of-work data for CDPs may be affected by the extent to which their census names were familiar to respondents, and by coding problems caused by similarities between the CDP name and the names of other geographic jurisdictions in the same vicinity.

Means of Transportation to Work

The data on means of transportation to work were derived from answers to long-form questionnaire Item 23a, which was asked of a sample of the population 15 years old and over. This question was asked of people who indicated in Question 21 that they worked at some time during the reference week. (For more information, see “Reference Week”.) Means of transportation to work refers to the principal mode of travel or type of conveyance that the worker usually used to get from home to work during the reference week. Data were tabulated

for workers 16 years old and over; that is, members of the armed forces and civilians who were at work during the reference week.

People who used different means of transportation on different days of the week were asked to specify the one they used most often, that is, the greatest number of days. People who used more than one means of transportation to get to work each day were asked to report the one used for the longest distance during the work trip. The category “Car, truck, or van —drove alone” includes people who usually drove alone to work, as well as people who were driven to work by someone who then drove back home or to a nonwork destination during the reference week. The category “Car, truck, or van —carpooled ”includes workers who reported that two or more people usually rode to work in the vehicle during the reference week. The category “Public transportation ”includes workers who usually used a bus or trolley bus, streetcar or trolley car, subway or elevated, railroad, ferryboat, or taxicab during the reference week. The category “Other means ”includes workers who used a mode of travel that is not identified separately. The category “Other means” may vary from table to table, depending on the amount of detail shown in a particular distribution.

The means of transportation data for some areas may show workers using modes of public transportation that are not available in those areas (for example, subway or elevated riders in a metropolitan area where there actually is no subway or elevated service). This result is largely due to people who worked during the reference week at a location that was different from their usual place of work (such as people away from home on business in an area where subway service was available) and people who used more than one means of transportation each day but whose principal means was unavailable where they lived (for example, residents of nonmetropolitan areas who drove to the fringe of a metropolitan area and took the commuter railroad most of the distance to work).

Private Vehicle Occupancy

The data on private vehicle occupancy were derived from answers to long-form questionnaire Item 23b, which was asked of a sample of the population 15 years old and over. This question was asked of people who indicated in Question 21 that they worked at some time during the reference week and who reported in Question 23a that their means of transportation to work was “Car, truck, or van”. (For more information, see “Reference Week”.) Data were tabulated for workers 16 years old and over; that is, members of the armed forces and civilians who were at work during the reference week.

Private vehicle occupancy refers to the number of people who usually rode to work in the vehicle during the reference week. The category “Drove alone” includes people who usually drove alone to work as well as people who were driven to work by someone who then drove back home or to a nonwork destination. The category “Carpooled” includes workers who reported that two or more people usually rode to work in the vehicle during the reference week.

Workers per car, truck, or van. This is obtained by dividing the number of people who reported using a car, truck, or van to get to work by the number of such vehicles that they used. The number of vehicles used is derived by counting each person who drove alone as one vehicle, each person who reported being in a 2-person carpool as one-half of a vehicle, each person who

reported being in a three-person carpool as one-third of a vehicle, and so on, and then summing all the vehicles. Workers per car, truck, or van is rounded to the nearest tenth.

Reference Week

The data on employment status and commuting to work are related to a 1-week time period, known as the reference week. For each person, this week is the full calendar week, Sunday through Saturday, preceding the date the questionnaire was completed. This calendar week is not the same for all people since the enumeration was not completed in 1 week. The occurrence of holidays during the enumeration period probably had no effect on the overall measurement of employment status.

Time Leaving Home to Go to Work

The data on time leaving home to go to work were derived from answers to long-form questionnaire Item 24a, which was asked of a sample of the population 15 years old and over. This question was asked of people who indicated in Question 21 that they worked at some time during the reference week and who reported in Question 23a that they worked outside their home. The departure time refers to the time of day that the person usually left home to go to work during the reference week. (For more information, see “Reference Week”.) Data were tabulated for workers 16 years old and over; that is, members of the armed forces and civilians who were at work during the reference week.

Travel Time to Work

The data on travel time to work were derived from answers to long-form questionnaire Item 24b, which was asked of a sample of the population 15 years old and over. This question was asked of people who indicated in Question 21 that they worked at some time during the reference week and who reported in Question 23a that they worked outside their home. Travel time to work refers to the total number of minutes that it usually took the person to get from home to work each day during the reference week. The elapsed time includes time spent waiting for public transportation, picking up passengers in carpools, and time spent in other activities related to getting to work. (For more information, see “Reference Week”.) Data were tabulated for workers 16 years old and over; that is, members of the armed forces and civilians who were at work during the reference week.

Aggregate travel time to work (minutes). Aggregate travel time to work (minutes) is calculated by adding together all the number of minutes each worker traveled to work (one way) for specified travel times and/or means of transportation. Aggregate travel time to work is zero if the aggregate is zero, is rounded to 4 minutes if the actual aggregate is 1 to 7 minutes, and is rounded to the nearest multiple of 5 minutes for all other values (if the aggregate is not already evenly divisible by 5) for *any piece of geography if at least one of the cells has only one or two unweighted cases (cells with zero cases are exempt)*. Otherwise, all cells in the matrix are rounded to the nearest whole minute.

Mean travel time to work (minutes). Mean travel time to work is the average travel time in minutes that workers usually took to get from home to work (one way) during the reference week. This measure is obtained by dividing the total number of minutes taken to get from home to

work by the number of workers 16 years old and over who did not work at home. The travel time includes time spent waiting for public transportation, picking up passengers in carpools, and time spent in other activities related to getting to work. Mean travel times of workers having specific characteristics also are computed. For example, the mean travel time of workers traveling 45 or more minutes is computed by dividing the aggregate travel time of workers whose travel time was 45 or more minutes by the number of workers whose travel time was 45 or more minutes. Mean travel time to work is rounded to the nearest tenth.

Tenure

All occupied housing units are classified as either owner occupied or renter occupied. A housing unit is owner occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for. All occupied housing units which are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter occupied.

Worker

The terms “worker ” and “work ” appear in connection with several subjects: employment status, journey-to-work, class of worker, work status in 1999. Their meaning varies and, therefore, should be determined by referring to the definition of the subject in which they appear.

Geographic Definitions

Census Designated Place (CDP)

Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide census data for concentrations of population, housing, and commercial structures that are identifiable by name but are not within an incorporated place. CDP boundaries usually are defined in cooperation with state, local, and tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary.

For Census 2000, for the first time, CDPs did not need to meet a minimum population threshold to qualify for tabulation of census data. For the 1990 census and earlier censuses, the U.S. Census Bureau required CDPs to qualify on the basis of various minimum population size criteria.

FIPS Codes

Federal Information Processing Standard (FIPS, provides a 2-character FIPS State code and a 5-character FIPS numeric code to uniquely identify each entity contained in a list of names of

incorporated places, other communities and settlements, primary county divisions (such as townships, New England towns, and census county divisions), American Indian and Alaska Native areas, airports, military bases, national parks, post offices, and other locational entities (except natural or physical features). A 2-character class code distinguishes the different types of geographic entities. The purpose of the codes is to promote the interchange of formatted, machine-sensible data.

Split Cities

Some cities have extended their boundaries so they cross county boundaries. In the table of Incorporated Places (Table 2), there is a separate listing for each part of such a city located in a single county. Table 4 contains the total population for these split cities. The affected cities are Auburn, Bothell, Enumclaw, Milton, and Pacific.

Metropolitan Areas

The United States Office of Management and Budget (OMB) defines metropolitan areas (MAs) according to published standards that are applied to Census Bureau data. The general concept of an MA is that of a core area containing a large population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. The collective term "metropolitan area" (MA) became effective in 1990. MAs include metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs).

Metropolitan Statistical Area (MSA) — The 1990 standards provide that each newly qualifying MSA must include at least:

- one city with 50,000 or more inhabitants, or
- a Census Bureau-defined urbanized area (of at least 50,000 inhabitants) and a total metropolitan population of at least 100,000.

Under the standards, the county (or counties) that contains the largest city becomes the "central county" (counties), along with any adjacent counties that have at least 50 percent of their population in the urbanized area surrounding the largest city. Additional "outlying counties" are included in the MSA if they meet specified requirements of commuting to the central counties and other selected requirements of metropolitan character (such as population density and percent urban). There

Consolidated Metropolitan Statistical Area (CMSA) — An area that meets the requirements for recognition as an MSA and also has a population of one million or more may be recognized as a CMSA if:

- separate component areas (see PMSA below) can be identified within the entire area by meeting statistical criteria specified in the standards, and
- local opinion indicates there is support for the component areas.

Primary Metropolitan Statistical Area (PMSA) —The component area(s) of a CMSA. PMSAs, like the CMSAs that contain them, are composed of entire counties. If no PMSAs are recognized, the entire area is designated as an MSA.

The Puget Sound region is covered by the following metropolitan areas:

SEATTLE-TACOMA-BREMERTON, WA CMSA

Appendix C: Change in Population

APPENDIX C: Change in Census Tract Population, 1990-2000

This table provides population for 1990 and 2000 based on 1990 census tract geography.

In most cases where a 1990 tract was split in 2000, the 2000 population for those split tracts were aggregated. In cases where two 1990 tracts were merged in 2000, or where 1990 boundaries were moved in 2000, the 2000 population was obtained by aggregating 2000 block population by the appropriate 1990 geography. Those tracts are in **bold** and the aggregated population is in *italics*.

* This column shows the number of 2000 tracts formed from the 1990 tract. '0' indicates the tract was merged into a neighboring tract in 2000. See Appendix B for census tract correspondence.
