

# 11TH & 12TH AVE NE PAVING PROJECT

December 2022

## We're planning improvements to your street!

This spring, we'll repave and restripe approximately 1.8 miles of 11th and 12th Ave NE (between NE 43rd St and NE 67th St). This allows us to extend the life of the pavement and make the roadway safer and more comfortable for travel. The project design includes elements called for in the City's modal plans as well as in community feedback from the RapidRide J Line project.

In addition to paving, new street design concepts include:

- New protected bike lanes
- Parking changes- see map (reverse) for parking removal locations
- Signal improvements
